Exploring the Philosophy of Death and Dying Travis Timmerman, Michael Cholbi, 2020-12-30 *Exploring the Philosophy of Death and Dying: Classical and Contemporary Perspectives* is the first book to offer students the full breadth of philosophical issues that are raised by the end of life. Included are many of the essential voices that have contributed to the philosophy of death and dying throughout history and in contemporary research. The 38 chapters in its nine sections contain classic texts by authors such as Epicurus, Hume, Nietzsche, and Schopenhauer, and new short argumentative essays specially commissioned for this volume by world-leading contemporary experts. *Exploring the Philosophy of Death and Dying* introduces students to both theoretical issues (whether we can survive death, whether death is truly bad for us, whether immortality would be desirable, etc.) and urgent practical issues (the ethics of suicide, the value of grief, the appropriate medical criteria for declaring death, etc.) raised by human mortality, enabling instructors to adapt it to a wide array of institutions and student audiences. As a pedagogical benefit, PowerPoints, discussion questions, and test questions for each chapter are included as online ancillary materials.

On Death Svante Nordin, 2025-05-15 Death is man's basic condition, the fixed point of our fears and the prerequisite for our aspirations. Ideas about death characterize all cultures and have given rise to both world religions and local myths. In secular environments, however, the existence of death is more obscured. Life-prolonging measures have replaced the idea of death as meaningful in itself or a passage into the unknown. This volume covers the full spectrum of death's guises with global scope and historical depth, from some of the earliest recorded poetic texts via religious sources and shamanistic practices to prevailing philosophical and scientific perspectives. In twenty-four essays, Swedish and international experts explore different ways of approaching death. Contributions include Egyptian and Sumerian realms of the dead, the ethics of the major religions, ancient and modern theories of the soul and consciousness, and artistic and literary representations. At the center of this richly illustrated anthology is the question of what history can teach us about our own dealings with death and the dead.
