

# Secular perspectives on equality

- **When two people have equal status, they should be treated equally.**
  - From the scholar Plato *"treat like cases as like"*.
- **Kant** – it is immoral to treat a person as a means to an end. All people should be treated as ends in themselves.
- **Nagel** - Fundamental equality means that people are alike in important relevant and specified respects alone, and not that they are all generally the same or can be treated in the same way.

## **Perspectives On Equality:**

**Perspectives on Equality** Mary Ann Lyons, Fionnuala Waldron, 2005 Based on a lecture by poet Seamus Heaney

*Perspectives on Equality* Christine M. Koggel, 1998 Beginning with liberalism's foundational idea of moral equality as the basis for treating people with equal concern and respect Christine Koggel offers a modified account of what makes human beings equal and what is needed to achieve equality Koggel utilizes insights from care ethics but switches the focus from care as a moral response within personal relationships to the broader network of relationships within which care is given or withheld The result is an account of moral personhood and agency that is richer than the view propounded by liberal theory and care ethics This exciting and original work challenges theoretical resistance to the idea that relationships are relevant to an understanding of equality and it provides an opening to a critical analysis of relationships and care that informs and transforms our understanding of what is needed to treat all people with equal concern and respect Equality François

Levrault, Noël Clycq, 2020-10-19 Equality as an ideal has a long history and while some progress has obviously been made the persistence of certain inequalities is remarkable In order to draw a detailed picture of equality's nature value relevance and scope this book provides a multidisciplinary analysis Using a classic three part framework the book looks at the macro level broader systemic historical conceptual societal and European level the meso level concrete social institutions such as the labour market and the welfare state and the micro level of the individuals and their relations and thoughts about equality psychological reactions cultural depictions and sociological analyses The chapters not only provide an overview of the state of equality but also identify promising areas of future research and will be of interest to students and scholars across a number of fields including European studies history law political philosophy psychology sociology and economics *Global Perspectives on Gender Equality* Naila Kabeer, Agneta Stark, Edda Magnus, 2008-01-07 The Nordic countries have long been seen as pioneers in promoting gender equality This book brings together scholars from the global South and post socialist economies to explore from a comparative perspective the vision values policies mechanisms and political processes that help to explain Nordic achievements on gender equality Gender Equality in a Global Perspective Anders Ortenblad, Raili Marling, Snjezana Vasiljevic, 2017-01-06 Gender Equality in a Global Perspective looks to discuss whether Gender Equality can be adopted as it has been defined in international documents anywhere or whether it needs to be adapted in a more local context discuss which factors and perspectives need to be taken into account when adapting Gender Equality to specific contexts suggest research approaches for studies on whether a universal Western concept of Gender Equality fits in certain specific contexts and finally suggests challenges to the existing interpretation of Gender Equality e.g. theory of intersectionality and the development of legal and policy framework This book is situated within the tradition of comparative gender studies While most other such books take up and compare various ways of implementing or not implementing gender equality this book studies and compares whether or not and to what extent a specific definition of Gender Equality GE could

be adopted by various nations Thus all chapter contributors will engage with the same definition of GE which will be presented within the book and discuss the possibilities and constraints related to applying such a definition in their particular national context The readers will learn about the problems of applying a universal concept of Gender Equality and the possible reasons for and modes of adapting Gender Equality to different contexts Gender Equality in a Global Perspective looks to maintain a critical and reflexive stance towards the issues raised and will seek to present multiple perspectives and open ended answers As such it hopes to contribute to the international discussion of human rights more broadly and Gender Equality specifically The intended audience is not limited only to but will include policy makers scholars and students with an interest in Gender issues Organizational Theory Political Science Human Development Policy Analysis Globalization and other management sub disciplines

**Handbook of Equality of Opportunity**  
, 2024-07-12 This Handbook provides an authoritative exposition of equality of opportunity It presents the different concepts most commonly associated with equality of opportunity and discusses the many problems dominating the controversies on equality of opportunity at the theoretical policy or practical level The chapters give a concise exposition of the different conceptions and basic concepts of equal opportunities They clarify variables that are part of the algorithm of equal opportunities e g opportunity equality non discrimination fairness responsibility chance and choice excellence qualifications effort talent merit desert inequality and risk The idea of equality of opportunity has traditionally been associated with a set of largely unquestioned ideals and over the last 50 years it has been at the very centre of the major progressive social changes and firmly entrenched in political rhetoric Yet the idea of equality of opportunity is far from unquestionable or unproblematic as the only solid assumption different conceptions have in common is their rejection of fixed social relations but not hierarchy itself Disagreements over the fundamental principles criticism over the inefficiency of policies aiming to ensure equal opportunities and objections to their unfairness all pose questions that current conceptions answer in different ways This Handbook examines a wide variety of questions about issues of motivation procedures genealogy taxonomy and compensation
