Perspectives On Topicalization The Case Of Japanese Wa Typological Studies In Language Vol 14:

Perspectives on Topicalization John Hinds, Shoichi Iwasaki, Senko K. Maynard, 1987-01-01 Within the field of Japanese linguistics few areas have generated as much controversy as the morpheme *wa* traditionally described as a marker of old or contrasted information its function as a discourse marker has also been studied This work aims to deepen the understanding of *wa* through careful examination of the particle at both sentence and discourse levels in old Japanese as well as present day Japanese Previous studies have concentrated on syntactic analyses of *wa* The contributors to this volume challenge the old approach and uncover new properties of *wa* The four topics discussed are WA in Narrative and Expository Discourse WA and other Syntactic Phenomena Historical Perspectives on WA and Pragmatic Perspectives on WA Japanese/Korean Linguistics: Volume 1 Hajime Hoji, Patricia Marie Clancy, 1990 The annual Japanese Korean Linguistics Conference provides a forum for presenting research that will broaden the understanding of these two languages especially through comparative study The sixteenth Japanese Korean Linguistics Conference held in October of 2006 at Kyoto University was the first in the history of the conference to be held outside of the United States The thirty six papers in this volume encompass a variety of areas such as phonetics phonology morphology syntax semantics pragmatics discourse analysis and the geographical and historical factors that influence the development of languages sociolinguistics and psycholinguistics Book Jacket **Toward a Poetic Theory of Narration** Sylvie Patron, 2014-07-28 The volume consists of six essays by S Y Kuroda on narrative theory with a substantial introduction notes a bibliography and an index of proper names This is the English version of a French critical edition published by Editions Armand Colin in their Recherches series in October 2012 translated from English by Cassian Braconnier Ti n Fauconnier and Sylvie Patron edition with an introduction and notes by Sylvie Patron

Coordinating Constructions Martin Haspelmath, 2004-07-29 This is the first book on coordinating constructions that adopts a broad cross linguistic perspective Coordination has been studied intensively in English and other major European languages but we are only beginning to understand the range of variation that is found world wide This volume consists of a number of general studies as well as fourteen case studies of coordinating constructions in languages or groups of languages Africa Iraqw Fongbe Hausa the Caucasus Daghestanian Tsakhur Chechen the Middle East Persian and other Western Iranian languages Southeast Asia Lai Karen Indonesian the Pacific Lavukaleve Oceanic N l mwa and the Americas Upper Kuskokwim Athabaskan A detailed introductory chapter summarizes the main results of the volume and situates them in the context of other relevant current research Ergativity in Amazonia Spike Gildea, Francisco Queixalós, 2010 This volume presents a typological theoretical introduction plus eight papers about ergative alignment in 16 Amazonian languages All are written by linguists with years of fieldwork and comparative experience in the region all describe details of the synchronic systems and several also provide diachronic insight into the evolution of these systems The five papers in Part I focus on languages from four larger families with ergative patterns primarily in morphology The typological contribution is in detailed consideration of

unusual splits changes in ergative patterns and parallels between ergative main clauses and nominalizations The three papers in Part II discuss genetically isolated languages Two present dominant ergative patterns in both morphology and syntax the other a syntactic inverse system that is predominantly ergative in discourse In each the authors demonstrate that identification of traditional grammatical relations is problematic These data will figure in all future typological and theoretical debates about grammatical relations

Clusivity Elena Filimonova, 2005-11-30 This book presents a collection of papers on clusivity a newly coined term for the inclusive exclusive distinction Clusivity is a widespread feature familiar from descriptive grammars and frequently figuring in typological schemes and diachronic scenarios However no comprehensive exploration of it has been available so far This book is intended to make the first step towards a better understanding of the inclusive exclusive opposition by documenting the current linguistic knowledge on the topic The issues discussed include the categorial and paradigmatic status of the opposition its geographical distribution realization in free vs bound pronouns inclusive imperatives clusivity in the 2nd person honorific uses of the distinction etc These case studies are complemented by the analysis of the opposition in American Sign Language as opposed to spoken languages In depth areal and family surveys of clusivity consider this opposition in Austronesian Tibeto Burman central western South American Turkic languages and in Mosetenan and Shuswap

Iconicity in Syntax John Haiman, 1985-01-01 The papers in this volume all explore one kind of functional explanation for various aspects of linguistic form iconicity linguistic forms are frequently the way they are because they resemble the conceptual structures they are used to convey or linguistic structures resemble each other because the different conceptual domains they represent are thought of in the same way The papers in Part I of this volume deal with aspects of motivation the ways in which the linguistic form is a diagram of conceptual structure and homologous with it in interesting ways Most of the papers in Part II focus on isomorphism the tendency to associate a single invariant meaning with each single invariant form The papers in Part III deal with the apparent arbitrariness that arises from competing motivations

Voice and Grammatical Relations Masayoshi Shibatani, Tasaku Tsunoda, Tar? Kageyama, 2006-01-01 This volume presents thirteen original papers dealing with various aspects of two related areas of research of major concern to linguists of all theoretical persuasions voice and grammatical relations The papers are written from typological functional and cognitive perspectives and contain a number of general studies as well as studies focusing on specific issues and offer a wealth of data from a broad range of languages The volume provides up to date discussions of an array of issues of theoretical concern including the nature of grammatical relations voice in agent patient systems the expression vs non expression of participant roles and personal vs impersonal passives The papers in the volume demonstrate that investigations into the nature of voice and grammatical relations can still yield fresh theoretical and typological insights

Gradience, Gradualness and Grammaticalization Elizabeth Closs Traugott, Graeme Trousdale, 2010 This volume which emerged from a workshop at the New Reflections on Grammaticalization 4 conference held at KU Leuven in July 2008 contains a collection of

papers which investigate the relationship between synchronic gradience and the apparent gradualness of linguistic change largely from the perspective of grammaticalization. In addition to versions of the papers presented at the workshop the volume contains specially commissioned contributions some of which offer commentaries on a subset of the other articles. The articles address a number of themes central to grammaticalization studies such as the role of reanalysis and analogy in grammaticalization, the formal modelling of grammaticalization and the relationship between formal and functional change using data from a range of languages and in some cases from particular electronic corpora. The volume will be of specific interest to historical linguists working on grammaticalization and general linguists working on the interface between synchrony and diachrony.

Suppletion in Verb Paradigms Ljuba N. Veselinova, 2006. This book examines stem change in verb paradigms as in English *go* *go* PRESENT vs *went* *go* PAST, a phenomenon referred to as suppletion in current linguistic theory. The work is based on a broad sample of 193 languages and examines this long neglected phenomenon from a typological perspective. In addition to identifying types of suppletion which occur cross linguistically, the study brings to light areal patterns of the occurrence of suppletive forms in verb paradigms. Several hypotheses as regards the diachronic development of suppletive forms are presented as well. The author also seeks to explore the methodological issues of evaluating the frequency of linguistic features in large language samples by introducing a method of weighting languages according to their genetic relatedness. All figures obtained in this way are compared to the proportions yielded by more familiar counting methods and the results and implications of the different procedures are compared and discussed throughout.

A Typology of Purpose Clauses Karsten Schmidtke-Bode, 2009-10-22. This book presents the first comprehensive typology of purpose clause constructions in the world's languages. Based on a stratified variety sample of 80 languages it uncovers the unity and diversity of the morphosyntactic means by which purposive relations are coded and discusses the status of purpose clauses in the syntactic and conceptual space of complex sentences. Explanations for significantly recurrent coding patterns are couched in a usage based approach to language structure which pays due attention to the cognitive and communicative pressures on usage events involving purpose clauses to frequency distributions of grammatical choices in corpora and to the ways in which usage preferences conventionalize in pathways of diachronic change. The book integrates diverse previous strands of research on purpose clauses with a thorough empirical analysis in its own right and thus reflects the current state of the art of crosslinguistic research into this distinctive type of adverbial clause. An appendix to *A Typology of Purpose Clauses* can be found on the author's website www.karsten-schmidtke.net/purpose.

Formulaic Language Roberta Corrigan, 2009. This book is the second of the two volume collection of papers on formulaic language. The collection is among the first in the field. The authors of the papers in this volume represent a diverse group of international scholars in linguistics and psychology. The

language data analyzed come from a variety of languages including Arabic Japanese Polish and Spanish and include analyses of styles and genres within these languages While the first volume focuses on the very definition of linguistic formulae and on their grammatical semantic stylistic and historical aspects the second volume explores how formulae are acquired and lost by speakers of a language in what way they are psychologically real and what their functions in discourse are Since most of the papers are readily accessible to readers with only basic familiarity with linguistics the book may be used in courses on discourse structure pragmatics semantics language acquisition and syntax as well as being a resource in linguistic research

Non-nominative Subjects Peri Bhaskararao, Karumuri V. Subbarao, 2004-01-01 Volume 2 of Non nominative Subjects NNSs presents the most recent research on this topic from a wide range of languages from diverse language families of the world with ample data and in depth analysis A significant feature of these volumes is that authors with different theoretical perspectives study the intricate questions raised by these constructions Some of the central issues include the subject properties of noun phrases with ergative dative accusative and genitive case case assignment and checking anaphor antecedent coreference the nature of predicates with NNSs whether they are volitional or non volitional possibilities of control coreference and agreement phenomena These analyses have significant implications for theories of syntax and verbal semantics first language acquisition of NNSs convergence of case marking patterns in language contact situations and the nature of syntactic change

Variations on Polysynthesis Marc-Antoine Mahieu, Nicole Tersis, 2009 This work is comprised of a set of papers focussing on the extreme polysynthetic nature of the Eskaleut languages which are spoken over the vast area stretching from Far Eastern Siberia on through the Aleutian Islands Alaska and Canada as far as Greenland The aim of the book is to situate the Eskaleut languages typologically in general linguistic terms particularly with regard to polysynthesis The degree of variation from more to less polysynthesis is evaluated within Eskaleut Inuit Yupik vs Aleut even in previously insufficiently explored domains such as pragmatics and use in context including language contact and learning situations and over typologically related language families such as Athabascan Chukotko Kamchatkan Iroquoian Uralic and Wakashan

Tense-aspect Paul J. Hopper, 1982-01-01 The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker s reported experience They are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization Nevertheless their treatment in contemporary linguistics is often restricted and narrow based often involving mere recapitulatoin of traditional semantic and morphotactic studies The present volume arises out of a symposium held at UCLA in May 1979 in which a group of linguists gathered to re open the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language Creolization and diachronic change The languages

discussed in this volume include Russian Turkish English Indonesian Ameslan Eskimo various Creoles Mandari Hebrew Bantu and others The emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of tense and aspect In particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems **Studies in Language** ,1999

Studies in African Linguistic Typology F. K. Erhard Voeltz,2006-03-22 The twenty one papers that make up this volume reflect the broad perspective of African linguistic typology studies today Where previous volumes would present language material from a very restricted area and perspective the present contributions reflect the global interest and orientation of current African linguistic studies The studies are nearly all implicational in nature Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area conclusions are drawn about the general nature about this phenomenon in the languages of Africa and beyond They represent as such a first step that may ultimately lead to a more thorough understanding of African linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here

Defining Pragmatics Mira Ariel,2010-06-24 This groundbreaking book challenges the prominent definitions of pragmatics and the assumption that specific topics belong on the pragmatics turf
