French Muslims in Perspective Joseph Downing,2019-05-24 With the largest Muslim population in Western Europe France has faced a number of critiques in its attempts to assimilate Muslims into an ostensibly secular but predominantly Catholic state and society This book challenges traditional analyses that emphasise the conflict between Muslims and the French state and broader French society by exploring the intersection of Muslim faith with other identities as well as the central roles of Muslims in French civil society politics and the media The tensions created by attacks on French soil by Islamic State have contributed to growing acceptance of the Islamophobic discourse of Marine Le Pen and her far right Front National party and debates about issues such as headscarves and burkinis have garnered worldwide attention Downing addresses these issues from a new angle eschewing the traditional us and them narrative and offering a more nuanced account based on people's actual lived experiences *French Muslims in Perspective* will be of interest to students and scholars across sociology politics international relations cultural studies European Studies and French studies as well as policy makers and practitioners involved in immigration education and media

Perspectives on International Relations Henry R. Nau,2018-01-03 *Perspectives on International Relations Power Institutions and Ideas* shows students new to the field how theories perspectives of international affairs realism liberalism constructivism identity and critical theory play a decisive role in explaining every day debates about world affairs Why for example do politicians and political scientists disagree about the causes of the ongoing conflict in Syria even though they all have the same facts Or why do policymakers disagree about how to deal with North Korea when they are all equally well informed The new Sixth Edition of this best seller includes updates on Brexit the rise of Donald Trump and other populist leaders and continuing developments for ISIS Syria and Russia

Stereo: Comparative Perspectives on the Sociological Study of Popular Music in France and Britain Philippe Le Guern,2016-04-01 The term Popular Music has traditionally denoted different things in France and Britain In France the very concept of popular music has been fiercely debated and contested whereas in Britain and more largely throughout what the French describe as the Anglo saxon world popular music has been more readily accepted as a description of what people do as leisure or consume as part of the music industry and as something that academics are legitimately entitled to study French researchers have for some decades been keenly interested in reading British and American studies of popular culture and popular music and have often imported key concepts and methodologies into their own work on French music but apart from the widespread use of elements of French theory in British and American research the Anglo saxon world has remained largely

ignorant of particular traditions of the study of popular music in France and specific theoretical debates or organizational principles of the making and consuming of French music. French, British and American research into popular music has thus coexisted with considerable cross fertilization for many years but the barriers of language and different academic traditions have made it hard for French and anglophone researchers to fully appreciate the ways in which popular music has developed in their respective countries and the perspectives on its study adopted by their colleagues. This volume provides a comparative and contrastive perspective on popular music and its study in France and the UK.

The Police, State and Society: Perspectives from India and France Mehra and Levy, 2010. This book is a parallel study between criminal justice systems in India and France. It covers the institutional, democratic and functional aspects of the police and law in the two countries. It discusses the modern aspects of policing and human rights issues in the criminal justice system against a backdrop of violence and conflict. Agencies in European and Comparative Perspective Tom Zwart, L. F. M. Verhey, 2003. This book analyses the role played by agencies in several countries.

French Civil Liability in Comparative Perspective Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26. The French law of torts or of extra contractual liability is widely seen as exceptional. For long it was based on a mere five articles of the Civil Code of 1804 but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance. While the rest of the general law of obligations including contract in the Civil Code was reformed in 2016 by executive ordonnance, this area was left aside, being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability, a new legislative category to include both contractual and extra contractual liability. This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems. In doing so it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future.

The French Revolution and Religion in Global Perspective Bryan A. Banks, Erica Johnson, 2017-09-18. This volume examines the French Revolution's relationship with and impact on religious communities and religion in a transnational perspective. It challenges the traditional secular narrative of the French Revolution, exploring religious experience and representation during the Revolution as well as the religious legacies that spanned from the eighteenth century to the present. Contributors explore the myriad ways that individuals, communities and nation states reshaped religion in France, Europe, the Atlantic Ocean and around the world.

Collective Bargaining and Wages in Comparative Perspective Roger Blanpain, Thomas Blanke, Edgar Rose, Kerstin Ahlberg, 2005-01-01. Remarkably, the core element of labour relations, wage determination, has been excluded from the European social dialogue about harmonisation of working conditions and national systems of social security. The present study responds by analysing the

prospects of building up structures of wage formation in Europe through a reevaluation of collective bargaining and collective agreements as they exist under the law of the most industrialized Member States The impetus for the study is the widely debated crisis of the system of concluding regional collective agreements on wages Social partners seem to have been trapped in fruitless conflicts on how the system must be reformed It has become obvious that no party concerned employers trade unions the state has the capacity to resolve the growing difficulties of collective wage formation In an introductory essay by the distinguished editors this important study takes the situation in Germany the most prominent manifestation of this European crisis as its starting point Then academic experts from France the United Kingdom the Netherlands and Sweden describe comparable problems in their own countries detail approaches to dealing with them and provide a critical commentary including judgements and suggestions in relation to the German case Then follows a reexamination of the situation in Germany in the light of the experience of the other countries A final chapter outlines some preliminary interpretations of European prospects Salient issues investigated include the following the erosion of such ideological and legal categories and concepts as dependent work solidarity subsidiarity and social self regulation as preconditions of traditional collective bargaining structures at national level the decreasing membership of the bargaining partners on both sides the shrinking rate of employees covered by collective agreements attempts to establish a national social pact increasing competition on global markets decentralizing management strategies including the abandonment of collective bargaining and individualized employees The authors examine the various state structures to determine if the legal and institutional developments of the different national systems of collective bargaining constitute starting points for mutual learning in order to meet the new challenges This leads to a discussion of which practices are successful in their original environment and how these practices might adapt to other systems in other countries

Self-Reported Population Health: An International Perspective based on EQ-5D Agota Szende,Bas Janssen,Juan Cabases,2013-12-05 The EQ 5D instrument as a standardized cross culturally validated measure of self assessed health has a hugely important role in understanding population health within and across countries Over the past two decades a wealth of international population health survey data have been accumulated by the EuroQol Group from research conducted in many countries across four continents One of the success factors of the EQ 5D instruments has been the easy availability of national or international sets of EQ 5D data as well as clear explanations and guidance for users There is an unmet need to produce a comprehensive book that captures up to date and expanded information of EQ 5D self reported health and index values EQ 5D population norms and cross country analyses are provided from representative national surveys of 20 countries and additional regional surveys This book will be a must for those who believe that how people report and value health is very important
