**The [Broken] Plural Problem in Arabic and Comparative Semitic** Robert R. Ratcliffe, 1998-12-15 The formal aspects of non concatenative morphology have received considerable attention in recent years but the diachronic dimensions of such systems have been little explored The current work applies a modern methodological and theoretical framework to a classic problem in Arabic and Semitic historical linguistics the highly allomorphic system of stem internal or broken plurals It shows that widely accepted views regarding the historical development of this system are untenable and offers a new hypothesis The first chapter lays out a methodology for comparative historical research in morphology The next two chapters present an analysis of Arabic morphology based on contemporary formal linguistic approaches and applies this analysis to

the noun plural system Chapter Four shows that neither semantic shift nor ablaut type sound change account adequately for the data The fifth chapter offers a systematic comparison of the plural systems of Semitic languages incorporating much new research on the languages of South Arabia and Ethiopia Chapter Six proposes a new reconstruction *Perspectives on Arabic Linguistics XIII-XIV* Dilworth B. Alzayid,2022-03-15 Since the early years of generative grammar Chomsky 1977 inter alia the phenomenology of dislocation has proved to be a fertile area of research This however has not been the case for Modern Standard Arabic MSA and hence this thorough monograph intends to fill this lacuna Three aspects of this linguistic phenomenon stand out the taxonomy of possible dislocated configurations syntax and interpretation Though the structure in itself has been extensively studied in various languages including varieties of spoken Arabic this monograph shows that MSA presents properties that set it apart from known varieties and cannot be captured by an extension or modification of existing analyses Moreover existing analyses are not fully satisfactory as there are open analytical questions regarding the interpretation and syntactic analysis of dislocation structures crosslinguistically Particularly the optimal path to follow concerning dislocation structures in MSA is to argue for the claim that contrast as an information structural notion underlies the interpretation of dislocated elements and these elements are best syntactically analyzed as being involved in a bisentential configuration contra monoclausal approaches to dislocation This monograph should be relevant to anyone with an interest in the Arabic language and also to syntacticians and typologists with an interest in sentence structure **Index Islamicus** ,1996 **Research in Afroasiatic Grammar** Jacqueline Lecarme,Jean Lowenstamm,Ur Shlonsky,2000-01-01 This volume presents a selection of papers from the 3rd Conference on Afroasiatic Languages held in Sophia Antipolis France in 1996 The languages discussed include

varieties of Arabic Hebrew Berber Chaha Wolof and Old Egyptian History and Perspectives of Language Study Olga Miłojaska Tomić, Milorad Radovanović, 2000 Each of the contributions in this volume expresses in some way the hope that it is possible to achieve an integrity of linguistics understood as a science of man in its psychological sociological pragmatic and cultural context The first section focuses on the history of language study the second section on the integrative description of facets of language and the last section on the need for the study of language in context Perspectives on Arabic Linguistics, 2006 The papers in this volume are a selection from papers presented at the Annual Symposium on Arabic Linguistics held in Cambridge UK in 2002 They deal with a wide range of theoretical issues in varieties of Arabic **Bibliographie**

**Linguistique de L'annee 1999** Mark Janse, Hella Olbertz, Sijmen Tol, 2003-11-30 Setting out the historical national and religious characteristics of the Italians as they impact on the integration within the European Union this study makes note of the two characteristics that have an adverse effect on Italian national identity cleavages between north and south and the dominant role of family It discusses how for Italians family loyalty is stronger than any other allegiance including feelings towards their country their nation or the EU Due to such subnational allegiances and values this book notes that Italian civic society is weaker and engagement at the grass roots is less robust than one finds in other democracies leaving politics in Italy largely in the hands of political parties The work concludes by noting that EU membership however provides no magic bullet for Italy it cannot change internal cleavages the Italian worldview and family values or the country's mafia dominated power matrix and as a result the underlying absence of fidelity to a shared polity Italian or European leave the country as ungovernable as ever **Perspectives on Arabic Linguistics XV** Dilworth B. Parkinson, Samira Farwanah, 2003-01-01 Printbegr nsninger Der kan printes 10 sider ad gangen og max 40 sider pr session **Text and Context in Functional Linguistics** Mohsen Ghadessy, 1999 This text aims to examine the nature of text and context using theoretical models based in the framework of Systemic Functional Linguistics SFL **Morphological Analysis in Comparison** Wolfgang U. Dressler, 2000-01-01 This volume consists of selected and revised papers from the Seventh International Morphology Meeting held in 1996 in Vienna It presents advances in morphological theorizing such as the foundations of sign based morphology the morphology syntax interface the boundaries between compounding and derivation derivation and inflection and the emergence of morphology from premorphological precursors in early first language acquisition The contributions deal with morphological analyses in various fields of the ever widening domain of morphology and its relevance to the lexicon The comparative aspect is reflected in the above mentioned areas and through the variety of languages investigated Indo European and non Indo European languages of Europe and Asian African and American languages This breadth allows valuable insights into current problems of morphological research in America Western and Eastern Europe
