Econometrics: Econometrics and the cost of capital : essays in honor of Dale W. Jorgenson Dale Weldeau Jorgenson, 2000
This volume summarizes the economic theory the econometric methodology and the empirical findings resulting from the new approach to econometric modelling of producer behaviour

The National Energy Modeling System National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Commission on Behavioral and Social Sciences and Education, Committee on the National Energy Modeling System, Energy Engineering Board, Commission on Engineering and Technical Systems, Committee on National Statistics, 1992-02-01 This book addresses the process and actions for developing enhanced capabilities to analyze energy policy issues and perform strategic planning activities at the U S Department of Energy DOE on an ongoing basis Within the broader context of useful analytical and modeling capabilities within and outside the DOE this volume examines the requirements that a National Energy Modeling System NEMS should fulfill presents an overall architecture for a NEMS identifies data needs and outlines priority actions for timely implementation of the system

Handbook of Environmental Economics Karl-Goran Maler, 2005-12-09 Many of the frontiers of environmental economics research are at the interface of large scale and long term environmental change with national and global economic systems This is also where some of the most of challenging environmental policy issues occur Volume 3 of the Handbook of Environmental Economics provides a synthesis of the latest theory on economywide and international environmental issues and a critical review of models for analyzing those issues It begins with chapters on the fundamental relationships that connect environmental resources to economic growth and long run social welfare The following chapters consider how environmental policy differs in a general equilibrium setting from a partial equilibrium setting and in a distorted economy from a perfect economy The volume closes with chapters on environmental issues that cross or transcend national borders such as trade and the environment biodiversity conservation acid rain ozone depletion and global climate change The volume provides a useful reference for not only natural resource and environmental economists but also international economists development economists and macroeconomists

Fifty Years of Economic Measurement Ernst R. Berndt, Jack E. Triplett, 2008-04-15 This volume contains papers presented at a conference in May 1988 in Washington D C commemorating the fiftieth anniversary of the founding of the Conference on Research in Income and Wealth CRIW The call for papers emphasized assessments of broad topics in economic measurement both conceptual and pragmatic The organizers desired and succeeded in obtaining a mix of papers that first illustrate the range of measurement issues that economics as a science must confront and second mark major milestones of CRIW accomplishment The papers concern prices and output Griliches Pieper Triplett and also the major

productive inputs capital Hulten and labor Hamermesh Measures of saving the source of capital accumulation are covered in one paper Boskin measuring productivity the source of much of the growth in per capita income is reviewed in another Jorgenson The use of economic data in economic policy analysis and in regulation are illustrated in a review of measures of tax burden Atrostic and Nunns and in an analysis of the data needed for environmental regulation Russell and Smith the adequacy of data for policy analysis is evaluated in a roundtable discussion chapter 12 involving four distinguished policy analysts with extensive government experience in Washington and Ottawa *Energy Abstracts for Policy Analysis* ,1984

Productivity: International comparisons of economic growth Dale Weldeau Jorgenson,1995 These two volumes present empirical studies that have permanently altered professional debates over investment and productivity as sources of postwar economic growth in industrialized countries The distinctive feature of investment is that returns can be internalized by the investor The most straightforward application of this idea is to investments that create property rights but these volumes broaden the meaning of capital formation to include investments in education and training International Comparisons of Economic Growth focuses on comparisons among industrialized countries Although Germany and Japan are often portrayed as economic adversaries of the U S postwar experiences in all three countries support policies that give high priority to stimulating and rewarding capital formation In the Asian model of growth exemplified by Japan investments in tangible assets and human capital are especially critical during periods of rapid growth Growth: Energy, the environment, and economic growth Dale Weldeau Jorgenson,1998

particular attention to the physical economic legislative and communication instruments **Journal of Petroleum Technology**, 1984-07

EUROPE Model Application to Material and Energy Flows to Improve the Resource Economy Jan Stenis, 2022-04-27 The EUROPE model is applicable to production activities that show an inflow of inputs that are transformed followed by the discharge of a flow of products plus a residual flow The EUROPE model can optimize flows through a black box which is a certain unit with inflows and outflows The EUROPE model promotes an increased equity for distributing natural resources to everyday citizens as well as to the production lines of major corporations This work shows how the EUROPE model's possible realm of applicability step by step has been expanded to encapsulate ever more areas of commercial interest to improve the people's quality of life

Modeling Mineral and Energy Markets Walter C. Labys, 2012-12-06 This book provides a framework for analyzing and forecasting a variety of mineral and energy markets and related industries Such modeling activity has been at the forefront of the economic and engineering professions for some time having received a major stimulus following the first oil price shock in 1973 Since that time other shocks have affected these markets and industries causing disequilibrium economic adjustments which are difficult to analyze and to predict Moreover geopolitics remains an important factor which can destabilize crude oil markets and associated refining industries Mineral and energy modeling consequently has become a major interest of energy related corporations mining and drilling companies metal manufacturers public utilities investment banks national government agencies and international organizations This book hopes to advance mineral and energy modeling as follows 1 The modeling process is presented sequentially by leading the model builder from model specification estimation simulation and validation to practical model applications including explaining history analyzing policy and market and price forecasting 2 New developments in modeling approaches are presented which encompass econometric market and industry models spatial equilibrium and programming models optimal resource depletion models input output models economic sector models and macro oriented energy interaction models including computable general equilibrium 3 The verification and application of the models is considered not only individually but also in relation to the performance of alternative modeling approaches and 4 The modeling framework includes a perspective on new directions so that the present model building advice will extend into the future

Ending Africa's Energy Deficit and the Law Yinka Omorogbe, Ada Ordor, 2018-02-09 With the inclusion of access to energy in the sustainable development goals the role of energy to human existence was finally recognized Yet in Africa this achievement is far from realized Omorogbe and Ordor bring together experts in their fields to ask what is stalling progress examining problems from institutions catering to vested interests at the continent's expense to a need to develop vigorous financial and fiscal frameworks The ramifications and complications of energy law are labyrinthine this volume discusses how energy deficits can burden disabled people women and children in excess of their more fortunate counterparts as well as considering environmental issues including the delicate balance between the necessity of water for drinking and cleaning

and the use of water in industrial processes A pivotal work of scholarship the book poses pressing questions for energy law and international human rights **Energy '83** ,1983 *Interfaces* ,1988 Seeks to improve communication between managers and professionals in OR MS
