## **Perspectives On School At Seven Years Old:**

*Perspectives on School at Seven Years Old* John Newson, Elizabeth Newson, 2012-05-31 This volume looks at the social and intellectual forces which the child encounters in class room and playground from the parent s point of view School and home are seen as the separate yet overlapping worlds of childhood for some children more uncompromisingly separated than for others In the social development of the child school functions as a link between the kinds of demands and immunities which are characteristic of family life and those which the child will discover in the wider society of adulthood The authors provide a meeting point for developmental psychology sociology and education to the illumination of all three There is a concern with the daily life of ordinary children in ordinary families School reluctance rather than the more clinical school phobia or truancy is delicately probed The back up that parents provide at home directly or indirectly is objectively evaluated yet with empathy for parents and teachers anxieties about their roles

education child research in Germany Japan USA Poland Bulgaria Romania Sweden and Spain Back cover *Literacy Goes to School* Jo Weinberger, 1996-02-28 Very accessible not too technical or jargon ridden The practical suggestions were useful too if professionals feel inspired to promote change in their practice and policy it is helpful to have suggestions on where to start and what to do Management in Education Few primary teachers have a chance to find out in detail what children have already learnt and continue to learn about literacy at home with their parents This book gives a clear demonstration of literacy learning that takes place at home and how it differs from as well as relates to literacy at school It will help teachers to increase their understanding of this process and to build on their relationship with parents Such understanding the book shows can directly enhance children's literacy performance in school *School to Work Transition in Japan* Kaori Okano, 1993 This participant observation study presents the practice of school to work transition at two Japanese high schools and explains variations about the modal career trajectory of low achieving students drawing on Bourdieu's work It helps to explain the relationship between social values family ethos industry school and economic performance and the relatively low class consciousness in Japan It should be of interest to educationalists sociologists and labour relations specialists studying Japan ***The First Year at School: An International Perspective*** Peter Tymms, Tiago Bartholo, Sarah Howie, Elena Kardanova, Mariane Campelo Koslinski, Christine Merrell, Helen Wildy, 2023-06-26 This book explores an under researched but vital part of education the first year at primary elementary school The work shows that children's progress varies enormously from school to school class to class and child to child This variation is important because the more progress that children make in that first year of school the higher their academic attainment at the end of compulsory schooling The iPIPS international Performance Indicators in Primary Schools project upon which this book is based has been able to provide deeper insights into some of the key issues within and across different contexts whilst highlighting new and some ongoing issues Despite all the work there remain unanswered or new puzzling issues which are also explored We need to know how to improve the education at that stage and more broadly we need greater clarity about when children should be taught to read and be introduced to formal arithmetic in other words when they should start school We also need to be clearer about whether when and how young children should be assessed The book will suggest some answers but it will raise important questions and dilemmas for which we do not as yet have answers ***Teaching and Learning in the Secondary School*** Ann Shelton Mayes, Bob Moon, 2013-06-17 Research and writing on secondary education is often a specialised treatment of isolated themes This reader draws together the most significant work of recent years across a whole range of themes to give students and new teachers an overview of some of the most important issues and challenges that faced secondary teachers in the 1990s It looks at the central players the children and the teachers at the classrooms in which they work together at the curriculum both implicit and overt and at the wider community and political context of secondary education Divided into sections to allow easy access to material of interest the book covers learners teachers classrooms
