With Ears to Hear Robin R. Meyers, 2007-10-01 What makes good sermons And how do they come to be Appropriating insights from the history of rhetoric and modern communications theory Robin Meyers proposes that truly effective sermons involve more than moralistic proselytizing or three points and a joke Rather the preacher must enter into dialogue not only with Scripture and the congregation but creatively with him or herself as well This willingness to listen to one's own sermon this willingness to be freshly persuaded will help enable the preacher to communicate with greater passion insight poetry and clarity

Persuasion Michael E. Roloff, Gerald R. Miller, 1980 An expert in the study of mass communications and an expert on interpersonal communication bring together contributions that explore the ways in which we are persuaded Essays cover three major aspects of the subject theory and definition of persuasion factors in the persuasion process and the application of persuasion to negotiation marketing family relationships and politics This collection seemed to me a good review of a fascinating field As a therapist I found I was able to pull together a range of ideas that I considered worthy of development and application Though not written with therapists in mind this book represented for me an introduction to a new range of possibilities for influencing people towards

Arguing Constructively Dominic A. Infante, 1987-12-01 A refreshing fusion of interpersonal human relations and argumentation This clear and engaging volume is unique because of its dual focus On the one hand the purpose is to instruct on the methods of argumentation theory This represents a set of principles methods and strategies of argument that have evolved from the time of Ancient Greece On the other hand the intent is to teach human relations in argumentative situations specifically how to manage interpersonal relations during arguments Books on argumentation and debate have tended to say little about how arguing can affect the relationship one has with an adversary How do you prevent harm to a valued friendship for instance Moreover books on interpersonal communication have had little to say about arguing Instead the emphasis is on achieving satisfying relations with others The author shows that recent research makes it clear that argumentation and interpersonal communication are complementary areas of communication Arguing constructively in informal interpersonal and small group contexts is a skill that can bring about good outcomes Instruction on building and maintaining satisfying relations with other people is lacking if it does not deal with how to do this while arguing especially since argumentative communication probably will occur throughout a relationship This book has been written to correct what has been perhaps too narrow a focus in the areas of argumentation and interpersonal communication
