Third World Health Theodore MacDonald, 2018-12-14 Great and increasing inequities exist between the peoples of the Third World and those of the First As well we find ourselves threatened by imminent environmental catastrophes largely as a result of trying to maintain such inequities This clear and straightforward text explains the complex origins of such bodies as the International Monetary Fund the World Bank and others and demonstrates the extent to which they exacerbate the problem The situation is now so grave that we can no longer afford the luxury of leaving it to the professionals We are all involved We find ourselves hearing daily news reports of wars starvation the HIV AIDS pandemic and natural disasters rendered worse by inadequate international responses The

United Nations once seen as an effective arbiter and mediator in such matters now finds itself unable to exercise authority adequately Third World Health hostage to First World Wealth adopts a positive approach and puts forward various ways in which people at all levels can become more involved It addresses the pivotal issue of health in the Third World and argues that it is very much hostage to the globalization of trade by and for the benefit of First World agencies *Women Miners in Developing Countries* Martha Macintyre, 2017-05-15 Contrary to their masculine portrayal mines have always employed women in valuable and productive roles Yet pit life continues to be represented as a masculine world of work legitimizing men as the only mineworkers and large mechanized and capitalized operations as the only form of mining Bringing together a range of case studies of women miners from past and present in Asia the Pacific region Latin America and Africa this book makes visible the roles and contributions of women as miners It also highlights the importance of engendering small and informal mining in the developing world as compared to the early European and American mines The book shows that women are engaged in various kinds of mining and illustrates how gender and inequality are constructed and sustained in the mines and also how ethnic identities intersect with those gendered identities *Globalisation Volume 2* Allan Boesak, Len Hansen, 2010-09-01 In the course of three years the Globalisation Project has gathered experts from a variety of disciplines to reflect together on globalisation its origins its manifestations and consequences particularly for the Christian religion and for Christian churches today This second volume on this theme in the Beyers Naud Series also represents a selection of papers that were presented at consultations of the Joint Project in this case during those held at Stellenbosch and Emden Germany in 2009 *Non-governmental organizations and the sustainability of small and medium-sized enterprises in Peru* Walter V. Castro Aponte, 2023-09-04 This book provides a better understanding of the changing roles of non governmental organizations NGOs in promoting sustainability of small and medium sized enterprises SMEs in Peru The book focuses on the domains of organic production business social responsibility and sustainable production The innovative study uses a combination of network and discourse analyses to identify the main patterns and shifts in the roles of NGOs in order to deal with sustainability and the market Two major contemporary sociological theories ecological modernization theory and network society theory are applied to frame the analysis The in depth analysis of international networks of NGOs operating in Peru provide valuable inputs in terms of changes in network and discourse patterns and consequently changing roles for NGOs Remarkably social movement liberal market and sustainability viewpoints are generating new networks and new discourses with a prominent position of national and international NGOs vis vis SMEs and in absence of the national state Next to the usual watchdog roles NGOs are developing roles of helper in order to answer to the market needs of SMEs The analyses challenges Castells scheme of space of flows versus space of place and suggests considering in ecological modernization theory both ecological rationality and social rationality in order to advance environmental governance of SMEs in developing countries particularly in Latin America *Deepening Local Democracy in Latin America* Benjamin

Goldfrank, 2015-09-10 The resurgence of the Left in Latin America over the past decade has been so notable that it has been called the Pink Tide. In recent years regimes with leftist leaders have risen to power in Argentina, Bolivia, Brazil, Chile, Ecuador, El Salvador, Nicaragua, Uruguay, and Venezuela. What does this trend portend for the deepening of democracy in the region? Benjamin Goldfrank has been studying the development of participatory democracy in Latin America for many years, and this book represents the culmination of his empirical investigations in Brazil, Uruguay, and Venezuela. In order to understand why participatory democracy has succeeded better in some countries than in others, he examines the efforts in urban areas that have been undertaken in the cities of Porto Alegre, Montevideo, and Caracas. His findings suggest that success is related most crucially to how nationally centralized political authority is and how strongly institutionalized the opposition parties are in the local arenas.
