Perversion Of Knowledge The True Story Of Soviet Science:

The Perversion Of Knowledge Dr. Vadim J. Birstein, 2009-09-09 During the Soviet years Russian science was touted as one of the greatest successes of the regime Russian science was considered to be equal if not superior to that of the wealthy western nations *The Perversion of Knowledge* a history of Soviet science that focuses on its control by the KGB and the Communist Party reveals the dark side of this glittering achievement Based on the author's firsthand experience as a Soviet scientist and drawing on extensive Russian language sources not easily available to the Western reader the book includes shocking new information on biomedical experimentation on humans as well as an examination of the pernicious effects of Trofim Lysenko's pseudo biology Also included are many poignant case histories of those who collaborated and those who managed to resist focusing on the moral choices and consequences The text is accompanied by the author's own translations of key archival materials making this work an essential resource for all those with a serious interest in Russian history

The Perversion of Knowledge Vadim J. Birstein, 2001 *Stalinism* Alter L. Litvin, John L. H. Keep, 2005 This volume the fruit of co operation between a British and Russian historian seeks to review comparatively the progress made in recent years largely thanks to the opening of the Russian archives in enlarging our understanding of Stalin and *Assassins* Boris Volodarsky, 2020-02-19 A look at the events surrounding the 2006 poisoning of a former Russian security officer in Great Britain In November 1998 Alexander Litvinenko a former lieutenant colonel of the Russian security service or FSB along with several former colleagues publicly stated that their superiors had instigated an assassination attempt on a Russian tycoon and oligarch Following his subsequent arrest and failed trials Litvinenko fled to London where having been granted asylum he worked as a journalist and writer as well as acting as a consultant for the British intelligence services Eight years later Litvinenko's past caught up with him when he was assassinated in London On November 1 2006 Litvinenko was suddenly taken ill and hospitalized He passed away twenty two days later Significant amounts of a rare highly toxic element were subsequently found in his body Before his death Litvinenko had said You may succeed in silencing one man but the howl of protest from around the world Mr Putin will reverberate in your ears for the rest of your life Author Boris Volodarsky who was consulted by the Metropolitan Police during the investigation and remains in close contact with Litvinenko's widow details the events surrounding Litvinenko's murder Volodarsky updates the story referring to the findings of the official British inquiry on the release of which Prime Minister David Cameron condemned Putin for presiding over state sponsored murder The author proves that the Litvinenko's poisoning is just one of many Some of these assassinations or attempted assassinations are already known others are revealed by him for the first time *The Philosopher Fish* Richard Adams Carey, 2024-09-19 In *Philosopher Fish* Carey immerses himself in the world of sturgeon the fish that lays these golden eggs Ancient shrouded in mystery inexplicable in several of its behaviors the sturgeon has a fascinating biologic past and a very uncertain future This new edition brings the story up to date *Toxin and Bioregulator Weapons* Michael Crowley, Malcolm

R. Dando, 2022-11-22 This book explores how revolutionary developments and convergence of the chemical life and associated sciences are impacting contemporary toxin and bioregulator research and examines the risks of such research being misused for malign purposes Investigating illustrative cases of dual use research of potential concern in China India Iran Russia Syria and the USA the authors discuss how states can ensure such research and related activities are not utilised in weapons development Although toxins and bioregulators are in theory covered by both the Biological and Toxin Weapons Convention and Chemical Weapons Convention this apparent overlap in reality masks a dangerous regulatory gap with neither Convention implemented effectively to address threats of weaponisation This book highlights the potentially damaging consequences for international peace and security and proposes realistic routes for action by states and the scientific community

Surprise, Kill, Vanish Annie Jacobsen, 2019-05-14 From Pulitzer Prize finalist Annie Jacobsen the untold USA Today bestselling story of the CIA's secret paramilitary units Surprise your target Kill your enemy Vanish without a trace When diplomacy fails and war is unwise the president calls on the CIA's Special Activities Division a highly classified branch of the CIA and the most effective black operations force in the world Originally known as the president's guerrilla warfare corps SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies Almost every American president since World War II has asked the CIA to conduct sabotage subversion and yes assassination With unprecedented access to forty two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day along with declassified documents and deep historical research Pulitzer Prize finalist Annie Jacobsen unveils like never before a complex world of individuals working in treacherous environments populated with killers connivers and saboteurs Despite Hollywood notions of off book operations and external secret hires covert action is actually one piece in a colossal foreign policy machine Written with the pacing of a thriller Surprise Kill Vanish brings to vivid life the sheer pandemonium and chaos as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work Jacobsen's exclusive interviews with members of the CIA's Senior Intelligence Service equivalent to the Pentagon's generals its counterterrorism chiefs targeting officers and Special Activities Division's Ground Branch operators who conduct today's close quarters killing operations around the world reveal for the first time the enormity of this shocking controversial and morally complex terrain Is the CIA's paramilitary army America's weaponized strength or a liability to its principled standing in the world Every operation reported in this book however unsettling is legal

The Crisis from Within: Historians, Theory, and the Humanities Nigel Raab, 2015-05-19 In The Crisis from Within Nigel Raab explores weaknesses that emerge when using interdisciplinary theories in historical analysis With chapters that focus on knowledge language memory imagining and inventing and civil society the analysis reveals how theoretical applications can be the source of interpretive confusion By drawing from a global range of historical works Nigel Raab demonstrates how this problem concerns all historical sub fields

From science in the seventeenth century to communism in the twentieth century theories often overdetermine analysis in a way the historian never intended After the enthusiastic reception of theory for over a generation The Crisis from Within argues that the time has come to pause and think seriously about how we wish to proceed with theory

Non-Western Educational Traditions Timothy G. Reagan, 2004-09-22 This text provides a brief yet comprehensive overview of a number of non Western approaches to educational thought and practice Its premise is that understanding the ways that other people educate their children as well as what counts for them as education may help us think more clearly about some of our own assumptions and values and to become more open to alternative viewpoints about important educational matters The value of this informative mind opening text for preservice and in service teacher education courses is enhanced by Questions for Discussion and Reflection and Recommended Further Readings included in each chapter New in the Third Edition Chapter 2 Conceptualizing Culture I We and The Other is new to this edition It is a response to feedback about the problems inherent in our general discourse about culture and in addition provides an example of a culture that is near to us but nevertheless alien the culture of the Deaf World Chapter 9 which deals with Islam and traditional Muslim education has been substantially revised The subtitle of the Third Edition has been changed to Indigenous Approaches to Educational Thought and Practice reflecting not so much a change in the emphases found in the book but rather a recognition of the growing scholarly interest in indigenous peoples their languages cultures and histories Various points throughout the text have been expanded and clarified and chapters have been updated as needed

Japan's Wartime Medical Atrocities Jing Bao Nie, Nanyan Guo, Mark Selden, Arthur Kleinman, 2013-07-03 This book examines Japan's wartime medical atrocities and their postwar aftermath from a comparative perspective and inquires into perennial issues of historical memory science politics society and ethics elicited by these rebarbative events

Totalitarian Communication Kirill Postoutenko, 2014-04-09 Totalitarianism has been an object of extensive communicative research since its heyday already in the late 1930s such major cultural figures as George Orwell or Hannah Arendt were busy describing the visual and verbal languages of Stalinism and Nazism After the war many fashionable trends in social sciences and humanities ranging from Begriffsgeschichte and Ego Documentology to Critical Linguistics and Critical Discourse Analysis were called upon to continue this media centered trend in the face of increasing political determination of the burgeoning field Nevertheless the integration of historical sociological and linguistic knowledge about totalitarian society on a firm factual ground remains the thing of the future This book is the first step in this direction By using history and theory of communication as an integrative methodological device it reaches out to those properties of totalitarian society which appear to be beyond the grasp of specific disciplines Furthermore this functional approach allows to extend the analysis of communicative practices commonly associated with fascist Italy Nazi Germany and Soviet Union to other locations France United States of America and Great Britain in the 1930s or historical contexts post Soviet developments in Russia or Kyrgyzstan This in turn leads to the revaluation of the very term totalitarian no longer an

ideological label or a stock attribute of historical narration it gets a life of its own defining a specific constellation of hierarchies codes and networks within a given society

[The KGB's Poison Factory](#) Boris Volodarsky,2013-11-30 A cracking good read and a chilling true story of Russia's assassination program begun more than a century ago and which continues today Tennent H Bagley former CIA chief of Soviet Bloc counterintelligence In late November 2006 Alexander Litvinenko a former lieutenant colonel of the Federal Security Service of the Russian Federation was ruthlessly assassinated in London by radiation poisoning The shocking murder was the most notorious crime committed by the Russian intelligence on foreign soil in more than three decades Here former Russian military intelligence officer and an international expert in special operations Boris Volodarsky who was consulted by the Metropolitan Police during the Litvinenko investigation offers readers a startling narrative of the Russian security services history of covert assassination by poisoning Beginning in 1917 with Lenin and his dreaded Cheka secret police Russian security services have committed killing after killing both in Russia and across the globe In *The KGB's Poison Factory* Volodarsky proves that the Litvinenko's poisoning supposedly ordered by Russian strongman Vladimir Putin is just one episode in a chain of murders going back decades Some of these assassinations or attempted assassinations are already known others are revealed here for the first time With keen insight Volodarsky brings readers inside the assassinations of twenty individuals killed by order of the Kremlin in a revealing tell all that will fascinate students as well as general readers interested in international espionage

The Politics of Innovation Mark Zachary Taylor,2016 Why are some countries better than others at science and technology Written in accessible language *The Politics of Innovation* provides readers from all backgrounds with a useful survey of the innovation debate It presents extensive evidence to show that national institutions and policies do not determine innovation rates but politics do

The Gumilev Mystique Mark Bassin,2016-02-04 Since the collapse of the Soviet Union the legacy of the historian ethnographer and geographer Lev Nikolaevich Gumilev 1912 1992 has attracted extraordinary interest in Russia and beyond The son of two of modern Russia's greatest poets Nikolai Gumilev and Anna Akhmatova Gumilev spent thirteen years in Stalinist prison camps and after his release in 1956 remained officially outcast and professionally shunned Out of the tumult of perestroika however his writings began to attract attention and he himself became a well known and popular figure Despite his highly controversial and often contradictory views about the meaning of Russian history the nature of ethnicity and the dynamics of interethnic relations Gumilev now enjoys a degree of admiration and adulation matched by few if any other public intellectual figures in the former Soviet Union He is freely compared to Albert Einstein and Karl Marx and his works today sell millions of copies and have been adopted as official textbooks in Russian high schools Universities and mountain peaks alike are named in his honor and a statue of him adorns a prominent

thoroughfare in a major city Leading politicians President Vladimir Putin very much included are unstinting in their deep appreciation for his legacy and one of the most important foreign policy projects of the Russian government today is clearly inspired by his particular vision of how the Eurasian peoples formed a historical community In *The Gumilev Mystique* Mark Bassin presents an analysis of this remarkable phenomenon He investigates the complex structure of Gumilev's theories revealing how they reflected and helped shape a variety of academic as well as political and social discourses in the USSR and he traces how his authority has grown yet greater across the former Soviet Union The themes he highlights while untangling Gumilev's complicated web of influence are critical to understanding the political intellectual and ethno-national dynamics of Russian society from the age of Stalin to the present day

Black Mass John Gray, 2008-09-30 For the decade that followed the end of the cold war the world was lulled into a sense that a consumerist globalized peaceful future beckoned The beginning of the twenty first century has rudely disposed of such ideas most obviously through 9/11 and its aftermath But just as damaging has been the rise in the West of a belief that a single model of political behavior will become a worldwide norm and that if necessary it will be enforced at gunpoint In *Black Mass* celebrated philosopher and critic John Gray explains how utopian ideals have taken on a dangerous significance in the hands of right wing conservatives and religious zealots He charts the history of utopianism from the Reformation through the French Revolution and into the present And most urgently he describes how utopian politics have moved from the extremes of the political spectrum into mainstream politics dominating the administrations of both George W Bush and Tony Blair and indeed coming to define the political center Far from having shaken off discredited ideology Gray suggests we are more than ever in its clutches *Black Mass* is a truly frightening and challenging work by one of Britain's leading political thinkers

Cold War Resistance Marc Landas, 2020-10 In *Cold War Resistance* Marc Landas uncovers the dark history behind the discovery production and distribution of antibiotics and how the Cold War played a role in today's worsening resistance to antibiotics

The Nuclear Spies Vince Houghton, 2019-09-15 Why did the US intelligence services fail so spectacularly to know about the Soviet Union's nuclear capabilities following World War II As Vince Houghton historian and curator of the International Spy Museum in Washington DC shows us that disastrous failure came just a few years after the Manhattan Project's intelligence team had penetrated the Third Reich and knew every detail of the Nazi's plan for an atomic bomb What changed and what went wrong Houghton's delightful retelling of this fascinating case of American spy ineffectiveness in the then new field of scientific intelligence provides us with a new look at the early years of the Cold War During that time scientific intelligence quickly grew to become a significant portion of the CIA budget as it struggled to contend with the incredible advance in weapons and other scientific discoveries immediately after World War II As *The Nuclear Spies* shows the abilities of the Soviet Union's scientists its research facilities and laboratories and its educational system became a key consideration for the CIA in assessing the threat level of its most potent foe Sadly for the CIA scientific intelligence was extremely difficult to do well For

when the Soviet Union detonated its first atomic bomb in 1949 no one in the American intelligence services saw it coming

Secrecy and Tradecraft in Educational Administration Eugenie A. Samier, 2014-02-03 During the last couple of decades there has been an expansion in a number of related and overlapping fields producing evidence of covert activities toxic cultures destructive leadership styles micropolitics ethical problems in organisations and administration abusive power and authority and many other topics of dysfunctional management and leadership studies that frequently make reference to secretive and deceptive behaviour In this book Eugenie A Samier draws on a range of disciplines including education psychology administration and management studies and organizational theory to provide a comprehensive examination of the ways in which organisational leaders and administrators carry out their roles in a secretive or deceptive manner Samier presents a theory of covert administration that can be used to provide an analysis and interpretation of secretive and deceptive activity inform decision making both theoretically and practically offer a means of diagnosing errant management using secretive and deceptive practices provide a general set of guidelines for determining when clandestine activities may be legitimate and moral Alongside a detailed presentation of the theory of covert administration the book explores covert administration in practice factors leading to it and the results of attempts to combat its many forms It will be key reading for researchers and postgraduates with an interest in the field as well as administrators and policy makers

Preventing Chemical Weapons Michael Crowley, Malcolm Dando, Lijun Shang, 2018-08-20 The life and chemical sciences are in the midst of a period of rapid and revolutionary transformation that will undoubtedly bring societal benefits but also have potentially malign applications notably in the development of chemical weapons Such concerns are exacerbated by the unstable international security environment and the changing nature of armed conflict which could fuel a desire by certain States to retain and use existing chemical weapons as well as increase State interest in creating new weapons whilst a broader range of actors may seek to employ diverse toxic chemicals as improvised weapons Stark indications of the multi faceted dangers we face can be seen in the chemical weapons attacks against civilians and combatants in Iraq and Syria and also in more targeted chemical assassination operations in Malaysia and the UK Using a multi disciplinary approach and drawing upon an international group of experts this book analyses current and likely near future advances in relevant science and technology assessing the risks of their misuse The book examines the current capabilities limitations and failures of the existing international arms control and disarmament architecture notably the Chemical Weapons Convention in preventing the development and use of chemical weapons Through the employment of a novel Holistic Arms Control methodology the authors also look beyond the bounds of such treaties to explore the full range of international law international agreements and regulatory mechanisms potentially applicable to weapons employing toxic chemical agents in order to develop recommendations for more effective routes to combat their proliferation and misuse A particular emphasis is given to the roles that chemical and life scientists health professionals and wider informed activist civil society can play in protecting the

prohibition against poison and chemical weapons and in working with States to build effective and responsive measures to ensure that the rapid scientific and technological advances are safeguarded from hostile use and are instead employed for the benefit of us all
