Pesticide Decontamination And Detoxification By Gan:

Pesticide Decontamination and Detoxification Jay J. Gan, 2004 This book explores chemical and biological means to decontaminate and detoxify pesticides and biocides It contains new studies and concise reviews and encompasses molecular engineering at one end and field applications at the other *Pesticides* Margarita Stoytcheva, 2011-01-21 This book provides an overview on a large variety of pesticide related topics organized in three sections The first part is dedicated to the safer pesticides derived from natural materials the design and the optimization of pesticides formulations and the techniques for pesticides application The second part is intended to demonstrate the agricultural products environmental and biota pesticides contamination and the impacts of the pesticides presence on the ecosystems The third part presents current investigations of the naturally occurring pesticides degradation phenomena the environmental effects of the break down products and different approaches to pesticides residues treatment Written by leading experts in their respective areas the book is highly recommended to the professionals interested in pesticides issues **Fungi as Bioremediators** Ebrahim Mohammadi Goltapeh, Younes Rezaee Danesh, Ajit Varma, 2013-02-06 Biological remediation methods have been successfully used to treat polluted soils While bacteria have produced good results in bioremediation for quite some time now the use of fungi to decontaminate soils has only recently been established This volume of Soil Biology discusses the potentials of filamentous fungi in bioremediation Fungi suitable for degradation as well as genetically modified organisms their biochemistry enzymology and practical applications are described Chapters include topics such as pesticide removal fungal wood decay processes remediation of soils contaminated with heavy and radioactive metals of paper and cardboard industrial wastes and of petroleum pollutants **Phytoremediation and Rhizoremediation** Martina Mackova, David Dowling, Tomas Macek, 2006-09-19 The first part of Volume 9 will supply the readers with up to date information concerning the necessary theoretical background both concerning removal of heavy metals from the contaminated environment and removal detoxication and even degradation of toxic organic contaminants Until recently phytoremediation has been discussed mostly in monographs dealing with microbiological remediation methods as a separate chapter just to illustrate an additional possibility of use of biological systems This book intends to show especially the importance of cooperation between plant and microorganisms there is practically no phytoremediation without rhizoremediation Newest approaches based on methods of molecular biology and genetic engineering are described as well as plant science achievements The great advantage of this volume is that the reader will find here in addition to a survey of published data also a lot of original findings thus supplying an up to date review of this quickly developing field of science **Information Resources in Toxicology** P.J. Bert Hakkinen, Asish Mohapatra, Steven G. G. Gilbert, 2009-08-19 This latest version of Information Resources in Toxicology IRT continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization review and commentary on the information infrastructure of the field This book is a unique wide ranging international

annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health chemical safety and risk assessment Thoroughly updated the current edition analyzes technological changes and is rife with online tools and links to Web sites IRT IV is highly structured providing easy access to its information Among the hot topics covered are Disaster Preparedness and Management Nanotechnology Omics the Precautionary Principle Risk Assessment and Biological Chemical and Radioactive Terrorism and Warfare are among the designated International in scope with contributions from over 30 countries Numerous key references and relevant Web links Concise narratives about toxicologic sub disciplines Valuable appendices such as the IUPAC Glossary of Terms in Toxicology Authored by experts in their respective sub disciplines within toxicology
