Scheduled Areas and Scheduled Tribes Commission, 1964 **DDT, Silent Spring, and the Rise of Environmentalism** Thomas Dunlap, 2015-09-14 No single event played a greater role in the birth of modern environmentalism than the publication of Rachel Carson's *Silent Spring* and its assault on insecticides The documents collected by Thomas Dunlap trace shifting attitudes toward DDT and pesticides in general through a variety of sources excerpts from scientific studies and government reports advertisements from industry journals articles from popular magazines and the famous Fable for Tomorrow from *Silent Spring* Beginning with attitudes toward nature at the turn of the twentieth century the book moves through the use and early regulation of pesticides the introduction and early success of DDT the discovery of its environmental effects and the uproar over *Silent Spring* It ends with recent debates about DDT as a potential solution to malaria in Africa **The Fire Ant Wars** Joshua Blu Buhs, 2010-11-15 Sometime in the first half of the twentieth century a coterie of fire ants came ashore from South American ships docked in Mobile Alabama Fanning out across the region the fire ants invaded the South damaging crops harassing game animals and hindering harvesting methods Responding to a collective call from southerners to eliminate these invasive pests the U S Department of Agriculture developed a campaign that not only failed to eradicate the fire ants but left a wake of dead wildlife sickened cattle and public protest With political intrigue environmental tragedy and such figures as Rachel Carson and E O Wilson *The Fire Ant Wars* is a grippingly perceptive tale of changing social attitudes and scientific practices Tracing the political and scientific eradication campaigns Joshua Buhs's bracing study uses the saga as a means to consider twentieth century American concepts of nature and environmental stewardship In telling the story Buhs explores how human concepts of nature evolve and how these ideas affect the natural and social worlds Spotlighting a particular issue to discuss larger questions of science public perceptions and public policy from pre environmental awareness to the activist years of the early environmental movement *The Fire Ant Wars* will appeal to historians of science environmentalists and biologists alike *The Pesticide Encyclopedia* Kalyani Paranjape, Vasant Gowariker, V N Krishnamurthy, Sugha Gowariker, 2014-12-22 In today's world food security is an important issue Food shortages push prices up impacting upon the health and well being of hundreds of millions of rural poor across the globe One way to increase food security is to decrease the amount of yield lost to pests *The Pesticide Encyclopedia* provides a comprehensive overview of the fight against pests covering chemical pesticides biocontrol agents and biopesticides It also covers interrelated topics such as pesticide toxicity legislation and regulation handling storage and safety aspects IPM techniques resistance management interaction of pesticides with soil and the environment An important reference for policy makers advisers and students and researchers of crop science this book also includes useful notes on commonly known plant diseases and pests **The Pesticide Conspiracy** Robert Van Den Bosch, 2023-09-01 Professor van den Bosch of the

Cattle Beet Capital Michael Weeks, 2022-07 In 1870 several hundred settlers arrived at a patch of land at the confluence of the South Platte and Cache la Poudre Rivers in Colorado Territory Their planned agricultural community which they named Greeley was centered around small landholdings shared irrigation and a variety of market crops One hundred years later Greeley was the home of the world's largest concentrated cattle feeding operation with the resources of an entire region directed toward manufacturing beef How did that transformation happen *Cattle Beet Capital* is animated by that question Expanding outward from Greeley to all of northern Colorado *Cattle Beet Capital* shows how the beet sugar industry came to dominate the region in the early twentieth century through a reciprocal relationship with its growers that supported a healthy and sustainable agriculture while simultaneously exploiting tens of thousands of migrant laborers Michael Weeks shows how the state provided much of the scaffolding for the industry in the form of tariffs and research that synchronized with the agendas of industry and large farmers The transformations that led to commercial feedlots began during the 1930s as farmers replaced crop rotations and seasonal livestock operations with densely packed cattle pens mono cropped corn and the products pouring out of agro industrial labs and factories Using the lens of the northern Colorado region *Cattle Beet Capital* illuminates the historical processes that made our modern food systems

Europe's Living Landscapes Bas Pedrolí, Anne van Doorn, Geert de Blust, 2014-12-22 This book is the result of three symposia of the Dutch Society for Landscape Ecology The first symposium in 2005 was about the National Ecological Network in the Netherlands The reason was that the implementation of the NEN decided upon in 1990 was halfway The second symposium in 2006 was about urban ecology and the third one to be held in 2007 will be about civil infrastructure This book does not cover the conferences completely and new contributions are added The three themes are important contexts in which landscape ecologists do their research and apply their knowledge and skills Of course there are many more

subjects to hold conferences about for example climate change urbanisation agriculture landscape ecology itself etc The focus of the conferences is on the Netherlands with its urbanisation intensive land use and water management as characteristic features Although many WLO members do their work abroad or in an international context these conferences offer a window on what happens in the Dutch context The experiences may be of value for other contexts and that is why we present the results in English The selected themes and the focus on the Dutch context are serious demarcations of what landscape ecology in the Netherlands is all about The book does not represent all research and applications of landscape ecology
