**Frankenstein's Daughters** Jane L. Donawerth, 1997-04-01 Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre an overwhelmingly male dominated field Science fiction has been defined by male centered scientific discourse that describes women as alien others rather than rational beings This perspective has defined the boundaries of science fiction resulting in women writers being excluded as equal participants in the genre *Frankenstein's Daughters* explores the different strategies women have used to negotiate the minefields of their chosen career they have created a unique utopian science formulated by and for women with women characters taking center stage and actively confronting oppressors This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley Marion Zimmer Bradley Ursula K Le Guin and Anne McCaffrey      *"The Miller/Romero Connection"*) Peter D Fleming, 2011-06-22 George Miller and George A Romero are both superb filmmakers They have given fans exactly what they expect creative entertaining and at times horrifying films Their visions have often been copied but never duplicated But imitation they say is a form of flattery George Miller created an almost mythical world based in a post apocalyptic holocaust future Where knights drive supped up hotrods instead of horses and wear leather

instead of armor The line between good and bad can be as thin as the radiation in the air George A Romero has too created a world gone mad But this is a world where the dead return to feast on the living In this world your best friend may literally become your worst nightmare Death has become a way of life for the living and the undead These two masters created two separate worlds gone mad But after careful review it comes shockingly clear regarding the truth of these two worlds Was it a zombie outbreak that destroyed Maxs world Is that the real reason he went mad You decide See the clues Compare the films in order of release See how they interconnect and then you be the judge They say the weak share inherit the Earth and that only the strong shall survive these films prove just how equally true those statements are *The Jurist* ,1856 Jurist ,1856 *From the Lower East Side to Hollywood* Paul Buhle,2004-06-17 A lively extensively illustrated history of the widespread influence of Jews on American popular culture through the twentieth century Dog Susan McHugh,2004-08-04 Dogs are perhaps our most popular pets and certainly one of the best loved of all animals They are not only humanity s best friend they are also its oldest burial sites dating back 12 000 years indicate that dogs moved alongside prehistoric peoples before during and after both species settled the world The story of the canine has been fundamentally entwined with that of humanity since the earliest times and this ancient and fascinating story is told in Susan McHugh s *Dog* This book unravels the debate about whether dogs are descended from wolves and moves on to deal with canines in mythology religion and health dog cults in ancient and medieval civilizations as disparate as Alaska Greece Peru and Persia and traces correspondences between the histories of dogs in the Far East Europe Africa and the Americas *Dog* also examines the relatively recent phenomenon of dog breeding and the invention of species as well as the canine s role in science fact and fiction from Laika the first astronaut and Pavlov s famous conditioned dogs through to science fiction novels and cult films such as *A Boy and his Dog* Susan McHugh shows how dogs today contribute to human lives in a huge number of ways not only as pets and guide dogs but also as sources of food in Asia entertainment workers and scientific and religious objects *Dog* reveals how we have shaped these animals over the millennia and in turn how dogs have shaped us **Horror Writer's Block: Characters & Subgenres (2021)** Steve Hutchison,2023-02-26 This book tells you what kinds of movies have rarely or never been made and warns you about saturated niches Authors and screenwriters might want to avoid those The lower the frequency meter the more unique the concept These statistics are based on about 3000 horror and horror adjacent movies I ve reviewed and rated 21 subgenres and 27 character types were combined resulting in 621 permutations The best movies for each subgenre character combination are listed for inspiration s sake *Dissecting Stephen King* Heidi Strengell,2005 In a thoughtful well informed study exploring fiction from throughout Stephen King s immense oeuvre Heidi Strengell shows how this popular writer enriches his unique brand of horror by building on the traditions of his literary heritage Tapping into the wellsprings of the gothic to reveal contemporary phobias King invokes the abnormal and repressed sexuality of the vampire the hubris of Frankenstein the split identity of the werewolf the domestic melodrama of the ghost

tale Drawing on myths and fairy tales he creates characters who like the heroic Roland the Gunslinger and the villainous Randall Flagg may either reinforce or subvert the reader's childlike faith in society And in the manner of the naturalist tradition he reinforces a tension between the free will of the individual and the daunting hand of fate Ultimately Strengell shows how King shatters our illusions of safety and control King places his decent and basically good characters at the mercy of indifferent forces survival depending on their moral strength and the responsibility they may take for their fellow men
