CLARK DVM, 2014-06-13 This book provides you with a through description and positive attributes of this breed including origin purpose history normal heights and weights acceptable colors and behavioral traits Our books differ from most books on dog breeds because this book also provides you with a comprehensive and authoritative source of all the known predisposed hereditary health syndromes for the breed You will find extensive references for each problem described We also provide the breed club address for this breed and a list of laboratories and organizations that can provide professional help and information As a small animal veterinarian I have always been intrigued by the way dogs have been bred to fill a purpose in life and further impressed that they also tend to love performing that service Greyhounds and other sight hounds are built for speed with aerodynamic bodies consisting of small head deep chest narrow waist and large leg muscles On the other hand Dachshunds take their name from German words meaning badger dog and they use their long nose long body and short legs to both track enter and dig into badger dens After developing a practice that catered to clients with show dogs my interest in each breed continued to grow as I studied and observed more and more about the unique predisposition and incidence of health problems in each breed Breeders of purebred dogs for show were a challenge and inspirational for me to research and help them with their unique health problems Historically references to hereditary problems are scattered throughout various Veterinary medical texts and journals such as ophthalmology neurology gastroenterology cardiovascular and dermatology This book as well as the other books and articles I have written is researched and compiled with the intention to provide both veterinarians and dog owners with comprehensive and authoritative predisposition information under the breed name At the date of this publication The American Kennel Club Canine Health Foundation and the The Kennel Club of England reports over 400 known hereditary health syndromes throughout the dog kingdom At the writing of my first book in 1983 less than 50 hereditary issues are able to be predicted and or diagnosed Sequencing of the canine genome DNA tests metabolic testing including blood tests and urine testing plus phenotypic examinations such as radiographs ultrasound and CERF or OFA eye registry exams by a Board Certified Veterinary Ophthalmologist have advanced the science of breed related health and behavioral problems This book will provide veterinarians researchers pet owners and breeders with a comprehensive guide to all the known problems veterinarians and dog owners should consider during pet selection and throughout each life stage of our canine friends      *Doberman Pinschers* Raymond Gudas, 1987 Describes the characteristics and behavior of Doberman pinschers traces the history of the breed and answers common questions about their care and training      Doberman Pinschers Pauline T., 2012-03-14 ABOUT THE BOOK Doberman Pinschers have a reputation They are alert watchdogs

fearless war dogs and loyal protectors of their owners Karl Lewis Dobermann envisioned a faithful and steadfast companion when he developed the breed in the 19th century There is no historical record of the various breeds that helped comprise the Doberman s genetic mix but many speculate that the Doberman is a product of breeds such as the Manchester Terrier the greyhound the Weimaraner and the Rottweiler The dogs were bred to optimize quick reaction time speed power and ferocity This has helped to influence the reputation that has followed the Doberman Pinscher over the years The breed has been repeatedly and often unfairly saddled with a reputation for being vicious and untrustworthy The reputation is largely a product of exaggeration in the media and fear mongering Any claims regarding the Doberman Pinscher viciousness have been mitigated by the fact that breeders have worked to eliminate extraordinary aggression from the breeding pool in recent years The modern American Doberman Pinscher is considerably less ferocious than its ancestors

EXCERPT FROM THE BOOK

The Doberman Pinscher is often described as a medium sized breed but this description depends on an one s frame of reference The standard height of the breed is roughly 28 inches They typically weigh between 70 and a 100 pounds The Dobermans long lanky legs also tend to give an illusion of even greater size Many consider Dobermans to be a rather large dog The most unique aspects of the breeds appearance are their cropped ear and docked tail The pointed erect ears of the Doberman symbolise the its power and predatory skills Pointed ears aid the canine in hunting and stalking its prey Breeders have maintained the Dobermans natural predatory traits while domesticating the breed and familiarizing the breed with humans Cropping the ears involves cutting away the outer parts of the ear and then using a technique called posting which causes them to stand erect While not presently illegal in the united States the process of cropping ears and docking tails is against the law in many countries around the world The dog s reputation as an attack dog combined with its look provide a unique distinctive appearance that seems to signal the breed s willingness and ability to protect its home and family
