**Popular Music And Television In Britain** Ian Inglis, 2016-04-22 Listening to popular music and watching television have become the two most common activities for postwar generations in Britain From the experiences of programmes like Oh Boy and Juke Box Jury to the introduction of 24 hour music video channels the number and variety of television outputs that consistently make use of popular music and the importance of the small screen as a principal point of contact between audiences and performers are familiar components of contemporary media operation Yet there have been few attempts to examine the two activities in tandem to chart their parallel evolution to explore the associations that unite them or to consider the increasingly frequent ways in which the production and consumption of TV and music are linked in theory and in practice This volume provides an invaluable critical analysis of these and other topics in newly written contributions from some of Britain s leading scholars in the disciplines of television and or popular music studies Through a concentration on four main areas in which TV organises and presents popular music history and heritage performers and performances comedy and drama audiences and territories the book investigates a diverse range of musical genres and styles factual and fictional programming historical and geographical demographics and the constraints of commerce and technology to provide the first systematic account of the place of popular music on British television
