Syllabus of a Course of Eighty-seven Lectures on Modern European History (1600-1890) Henry Morse Stephens, 1899 **Universal Pronouncing Dictionary of Biography and Mythology** Joseph Thomas, 1905 Peter the Great Василий Осипович Ключевский, 1958 **Russia and Courtly Europe** Jan Hennings, 2016-10-27

In this book on early modern diplomacy Jan Hennings explores the relationship between European powers and Russia beyond the conventional East West divide from the Peace of Westphalia to the reign of Peter the Great He examines how at a moment of new departure in both Europe and Russia the norms shaping diplomatic practice emerged from the complex relations and direct encounters within the world of princely courts rather than from incompatible political cultures He makes clear the connections between dynastic representation politics and foreign relations and shows that Russia despite its perceived isolation and cultural distinctiveness participated in the developments and transformations that were taking place more broadly in diplomacy The central themes of this study are the interlocking manifestations of social hierarchy monarchical honour and sovereign status in both text and ritual Related issues of diplomatic customs institutional structures personnel negotiation practice international law and the question of cultural transfer also figure prominently
