Peter Joseph Lenne Akademie der Künste (Berlin, Germany), **Der Gartenarchitekt Peter Joseph Lenné. Die Lennéschen Parkanlagen Charlottenburg, Berliner Tiergarten und Landwehrkanal**, 2018-01-25 Studienarbeit aus dem Jahr 2017 im Fachbereich Kunst Kunstgeschichte Note 1,0 Universität Regensburg Institut für Kunstgeschichte

Veranstaltung Die Topographie Berlins Stadtplanung vom Großen Kurfürsten bis heute Sprache Deutsch Abstract Der berühmte preussische Gartenarchitekt Stadtplaner und spätere General Gartendirektor der königlich preussischen Gärten Peter Joseph Lenné drückte annähernd ein halbes Jahrhundert lang der preussischen Gartenbaukunst buchstäblich seinen großen Stempel auf. So entwarf er dem Zeitgeist entsprechend großflächige weitläufige Parkanlagen nach englischer Garten Manier und war dabei stets auf eine sozialverträgliche Bebauung und Planung der Stadt und Parkanlagen bedacht, indem er abwechslungsreiche und wohl durchdachte Grünflächen für eine lokale Erholung der Stadtbevölkerung inszenierte. Schwerpunkt seiner Wirkungsphasen war der Berliner Potsdamer Raum, jedoch legen bis heute in vielen anderen Teilen der Bundesrepublik seine Arbeiten reiches Zeugnis für ihn ab. Ein Hauptcharakteristikum seiner Parkanlagen und Grünflächen ist der bewusst vielfältige Einsatz von Sichtachsen, mit denen er unter anderem in Potsdam und Berlin die jeweiligen Grünflächen der Parkanlagen eindrucksvoll ineinander leitete und damit wirkungsvoll in Bezug zueinander setzte. Diese bewusst geschlagenen und freigelassenen Schneisen in der landschaftlichen Architektur instrumentalisierte Lenné als direkte Verbindungspunkte für das Ansetzen von verzweigten Wegen und Lichtungen, indem er diese mit entsprechenden Baumreihen, Wasserläufen, Skulpturen und exotischen Gewächsen akzentuierte. Lennés Werke sind ein Großteil der Berliner und Potsdamer Kulturlandschaft, diese reichen von der Pfaueninsel bis nach Werder und gelten seit nunmehr 27 Jahren als wichtiges Weltkulturerbe der europäischen Gartenkunst.

Peter Joseph Lenne Peter Joseph Lenné, 2011 In Koblenz legte er mit einer städtebaulichen Planung 1815 den Grundstein für seine beispiellose Karriere. **Die Tektonik der Hellenen** Hartmut Mayer, 2004 *Peter Joseph Lenné* Peter Joseph Lenné, Harri Günther, 1993 Peter Joseph Lenné Hermann Mattern, Peter Pfankuch, 1966 **Peter Joseph Lenné, Volkspark und Arkadien** Florian von Buttlar, 1989 *Peter Joseph Lenné* Detlef Karg, Brandenburgisches Landesamt für Denkmalpflege, 1992 *Grüne Infrastruktur / Green Infrastructure* Bund Deutscher Landschaftsarchitekten, 2015-08-31 The more intensively we exploit the urban and rural landscape the greater the demands we place on our environment and what it can provide. Demographic change, shrinking cities, urban expansion, climate change and the transition to renewable energy sources are confronting us with challenges of ever greater magnitude. Solar fields and bio-energy crops are changing the face of the landscape and new traffic and energy infrastructure crisscrosses the countryside. Meanwhile vast efforts are being made to adapt existing infrastructure to meet changing demands. In the process it has once again become clear that we must consider our use of natural resources not just from a local perspective but within a broader context. Green infrastructure strategies can take quite different forms ranging from floodwater protection

measures to the integration of traffic and energy systems and the development of urban green The goal for society is to improve the diversity and resilience of our environment and to minimize the effects of climate change In essays interviews and profiles of the best realized projects from the past few years Green Infrastructure examines the challenges and tasks facing contemporary landscape architecture and what it can achieve to address them This book is published on the occasion of the awarding of the German Landscape Architecture Prize 2015 *Visualizing Landscape Architecture* Elke Mertens, 2009-10-16 We don't sell gardens we sell images of gardens This observation on the part of a landscape architect makes it clear just how important it is that a design be effectively communicated to the community clients and the public Drawings models simulations and films communicate the designers proposed ideas and solutions but they also convey their attitude toward the use of nature and the environment With myriad possibilities including computer programs as well as hand drawings and models which continue to be widely used and strong competition in the field there is now a huge variety of visual representations with agreed upon rules but also a great deal of freedom In three large sections this book sifts through the currently commonplace and available techniques and evaluates them in terms of their informative value and persuasive power always illustrating its points with analysis of examples from international firms An introductory look at the development thus far is followed by a systematic presentation of modes of representation in two three and four dimensions in the plane in space and in the temporal process The second section deals with the sequence within the workflow from the initial sketch through concept and implementation planning all the way to the finished product The third section deals with the strategic use of visualizations in the context of competitions future schemes and large scale landscape planning The focus in this section is not on the familiar use of the relevant techniques but rather on the methods and forms of visual representation in contemporary landscape architecture Environmental Policy and Landscape Architecture Joachim Wolschke-Bulmahn, Hubertus Fischer, Sarah Ozacky-Lazar, 2014-03-21 Volume 18 in the CGL Studies series entitled *Environmental Policy and Landscape Architecture* is the result of an international symposium held in Jerusalem in March 2011 which was organised by the Van Leer Jerusalem Institute in collaboration with the Centre of Garden Art and Landscape Architecture The symposium focused on how the many different facets of landscape architecture could help towards solving environmental problems Sustainable Development and Landscaping Environmental Policy and the Contribution of Landscape Architecture at a Local Level Designing Public Open Spaces and Social Sustainability Spatial Planning and Landscape Architecture in Israel Palestine and Water and Soil Crisis and Conservation are the key chapters in this volume The authors address a wide range of issues including the significance of religions in ideas about environmentalism in historical and current debates how Palestinian society can meet challenges posed by the dynamic development of urban structures through capacity building in landscape architecture and economically meaningful strategies for soil conservation in arable fields as part of agricultural sustainability in semi arid areas A key objective of the symposium was also to determine opportunities for

cooperation in the field of environment and landscaping for Israelis Palestinians Muslims Jews and Christians in a region marked by huge tension and conflicts The authors are scholars of various disciplines such as landscape architecture urban planning technology assessment philosophy of science environmental communication and ecology and come from Israel Palestine USA Norway and Germany *Capability Brown, Royal Gardener* Jonathan Finch, Jan Woudstra, 2020-10-26

Lancelot Capability Brown was one of the most influential landscape designers of the eighteenth century at a time when Britain was changing radically from an agrarian to an industrial and colonial nation whilst Europe was periodically convulsed by war and revolution The extent and nature of his influence are however fiercely debated Brown worked at hundreds of important sites across England and his name became synonymous with the English Garden style which was copied across Northern Europe and entranced Catherine the Great who remodelled her landscapes in St Petersburg to reflect the new style He was famed in his time and recognised by the Crown but Brown's style was readily copied over his later life and particularly after his death Arguably this ubiquity led to the denigration of his achievements and even his character particularly by the agents of the Picturesque The lack of any personal primary material from Brown forcing scholars to rely on his landscapes contracts and bank accounts has hindered attempts to provide a rounded and credible account of the man and his works However by exploring his team of associates and his role as Royal Gardener new light can be thrown on the man his landscapes and his landscape legacy Bringing together a number of perspectives from across Northern Europe *Capability Brown Royal Gardener* explores the lasting international impact of Brown With Brown's position as Royal Gardener at its heart this book explores for the first time his business methods working methods and European influence It assesses how crucially Brown's work practices placed him within the world of nurserymen and landscape designers and how his business practices and long term relationships with draughtsmen and designers allowed him to manage a huge number of projects and a substantial financial turnover This in turn allowed him to work in a way that promoted and advanced his style of landscape Edited by Professor Jonathan Finch University of York and Dr Jan Woudstra University of Sheffield and with a varied range of engaging contributors drawn internationally from archaeology art history history and landscape architecture *Capability Brown Royal Gardener* weaves together strands from across a broad range of disciplinary interests It makes an important contribution to the scholarly discussion of Brown's work the work of his collaborators and legacy in the UK and across Northern Europe Relevant to students and academics at all levels this volume throws new light on Capability Brown and his impact on the business of place making in Northern Europe *From Dangast to Colorado Springs* Gert Gröning, 2016-08-03

Irma Franzen Heinrichsdorff was a 20th century landscape architect who was not widely known in Germany Her creative horticultural work included not least her impressive landscape ideas for private gardens some of which are presented and paid tribute to here for the first time In this book Franzen Heinrichsdorff's remarkable biography is traced using information from previously untapped sources Franzen Heinrichsdorff studied at the horticultural institute Lehr und Forschungsanstalt f

r Gartenbau in Berlin Dahlem and became the first woman to gain the qualification of Staatlich diplomierte Gartenbauinspektorin i e horticultural inspector in the subject of landscape gardening She thereby attained the highest academic honour there was in this profession at the time Influenced by expressionism and with an interest in music and dance the accomplished illustrator and designer had a promising career as a landscape architect ahead of her Rather than marrying the distinguished solo flutist Alfred Tibursky the father of her two children she tied the knot with landscape architect Gustav Heinrichsdorff only to divorce him several years later Family related and professional difficulties forced Franzen Heinrichsdorff to give up her career and she went on to run a children s home in the North Sea resort of Dangast for twenty years instead Undeterred by intermittent harassment from National Socialists she also cared for three foster children there over the years It was not until later in life that she had the opportunity to work as a landscape architect once again in Colorado Springs in the United States of America two of her former foster children and her son were instrumental in paving the way for her

Nature and Ideology Joachim Wolschke-Bulmahn,1997 The essays in this volume explore the broad range of ideas about nature reflected in twentieth century concepts of natural gardens and their ideological implications They also investigate garden designers use of earlier ideas of natural gardens and their relationship to the rich model that nature offers

Europe's Capital Cities Thomas Hall,2003-12-16 During the nineteenth century many of Europe s capital cities were subject to major expansion and improvement schemes From Vienna s Ringstrasse to the boulevards of Paris the townscapes which emerged still shape today s cities and are an inalienable part of European cultural heritage In *Planning Europe s Capital Cities* Thomas Hall examines the planning process in fifteen of those cities and addresses the following questions when and why did planning begin and what problems was it meant to solve who developed the projects and how and who made the decisions what urban ideas are expressed in the projects what were the legal consequences of the plans and how did they actually affect subsequent urban development in the individual cities what similarities or differences can be identified between the various schemes how have such schemes affected the development of urban planning in general His detailed analysis shows us that the capital city projects of the nineteenth century were central to the evolution of modern planning and of far greater impact and importance than the urban theories and experiments of the Utopians **OUR**

Urbanizing Nature Tim Soens,Dieter Schott,Michael Toyka-Seid,Bert De Munck,2019-01-14 What do we mean when we say that cities have altered humanity s interaction with nature The more people are living in cities the more nature is said to be urbanizing turned into a resource mobilized over long distances controlled transformed and then striking back with a vengeance as natural disaster Confronting insights derived from Environmental History Science and Technology Studies or Political Ecology *Urbanizing Nature* aims to counter teleological perspectives on the birth of modern urban nature as a uniform and linear process showing how new technological schemes new actors and new definitions of nature emerged in cities from the sixteenth to the twentieth century **The Undercurrents** Kirsty Bell,2022-09-06 Humane thought provoking and moving this hybrid literary portrait of a place makes the case for radical close readings of ourselves our cities and our

histories *The Undercurrents* is a dazzling work of biography memoir and cultural criticism told from a precise vantage point a stately nineteenth century house on Berlin's Landwehr Canal a site at the center of great historical changes but also smaller domestic ones The view from this house offers a ringside seat onto the city's theater of action The building has stood on the banks of the canal since 1869 its feet in the West but looking East right into the heart of a metropolis in the making on a terrain inscribed indelibly with trauma When her marriage breaks down Kirsty Bell a British American art critic adrift in her midforties becomes fixated on the history of her building and of her adoptive city Taking the view from her apartment window as her starting point she turns to the lives of the house's various inhabitants to accounts penned by Walter Benjamin Rosa Luxemburg and Gabriele Tergit and to the female protagonists in the works of Theodor Fontane Irmgard Keun and Rainer Werner Fassbinder A new cultural topography of Berlin emerges one which taps into energetic undercurrents to recover untold or forgotten stories beneath the city's familiar narratives
