Sullivan, 2002-03-30

Paradigms are shifting The capitalist market model or extended order whose globalization forces support the business methods of multinational corporations is giving way to the Global Village model one of justice virtue stability and national sovereignty Sullivan contends that by creating conditions for opposition globalization may be dooming itself Here he explains the shifting paradigm and considers its likely impact on corporate conduct Companies ignoring the growing chorus of discontent with globalization do so at their peril But those who adapt to new realities will not merely survive they will prosper This book details the adaptations that corporations need to implement to safeguard their roles in the future Corporate governance bodies will increasingly include NGO representatives and employees Justice stability virtue and national cultural identity will become corporate goals alongside the profit motive Customer relationships will become enriched by mutual obligations and trust Risky global corporate strategies will have less appeal than more stable avenues of action Employee relations will increasingly take into account workers growing desire for meaningful labor whose rewards entail more than financial remuneration Managers will become more like public servants and less like independent agents
