Abstract Painting in Canada Roald Nasgaard, Art Gallery of Nova Scotia, 2008 In the tradition of the distinguished Douglas McIntyre art program this lavishly illustrated and superbly printed book is a rich readable history of abstract painting in Canada The story begins in the 1920s with the sometimes eccentric but remarkable work rooted in symbolism and theosophy of pioneers such as Kathleen Munn Bertram Brooker and Lawren Harris Two decades later the Automatistes Canada's first truly independent avant garde art movement burst onto the scene in Montreal After the Second World War the urge to abstraction spread across Canada manifesting itself in significant regional movements Vancouver painters retained a British flavour while in Toronto the Painters Eleven looked south to New York Montreal's Plasticiens launched their own razor edged interpretation of the European tradition of geometric abstraction In the sixties and seventies the Prairies were influenced by Clement Greenberg's post painterly abstraction while Halifax became a hub of conceptual art and concrete painting The book continues through the eighties and nineties during which critics largely denounced painting and concludes in the twenty first century with abstract painting alive and well again in the studios of Canada's young artists A monumental tome containing 200 color reproductions it mines a rich vein of art history ripe for international discovery **Music and Ballet, 1973-1983** Bernard H. A History of Orchestral Conducting Elliott W. Galkin, 1988 Although the bibliography of literature about personalities in the conducting world is extensive a comprehensive scholarly study of the history of conducting has been sorely lacking Georg Sch nemann's respected study published in 1913 was brief and restricted to the procedures of time beating No work has attempted to examine the role of the orchestral conductor and to document the evolution of his art from historical technical and aesthetic perspectives Dr Elliott W Galkin musicologist conductor and critic twice winner of the Deems Taylor award for distinguished writing about music has produced such a work in A History of Orchestral Conducting The central historical section of the book which examines chronologically the theories and functions of time beating and interpretative concepts of performance is preceded by discussions of rhythm development of the orchestral medium and the evolving characteristics of orchestration Conductors of unusual pivotal influence are examined in depth as is the increasingly complex psychology of the podium Critical writings since the time of Monteverdi and the birth of the orchestra are surveyed and compared Analyses of conducting as an art and craft by musicians from Berlioz to Bernstein and commentators from Mattheson Bernard Shaw and Thomas Mann to Jacques Barzun are described and discussed A fascinating collection of engravings wood cuts photographs and caricatures contributes to the richness of this work

Highbrow/Lowbrow Lawrence W. LEVINE, 2009-06-30 In this unusually wide ranging study spanning more than a century and covering such diverse forms of expressive culture as Shakespeare Central Park symphonies jazz art museums the Marx Brothers opera and vaudeville a leading cultural historian demonstrates how variable and dynamic cultural boundaries have been and how fragile and recent the cultural categories we have learned to accept as natural and eternal are For most of the nineteenth century a wide variety of expressive forms Shakespearean drama opera orchestral music painting and sculpture as well as the writings of such authors as Dickens and Longfellow enjoyed both high cultural status and mass popularity In the nineteenth century Americans in addition to whatever specific ethnic class and regional cultures they were part of shared a public culture less hierarchically organized less fragmented into relatively rigid adjectival

groupings than their descendants were to experience By the twentieth century this cultural eclecticism and openness became increasingly rare Cultural space was more sharply defined and less flexible than it had been The theater once a microcosm of America housing both the entire spectrum of the population and the complete range of entertainment from tragedy to farce juggling to ballet opera to minstrelsy now fragmented into discrete spaces catering to distinct audiences and separate genres of expressive culture The same transition occurred in concert halls opera houses and museums A growing chasm between serious and popular between high and low culture came to dominate America's expressive arts If there is a tragedy in this development Lawrence Levine comments it is not only that millions of Americans were now separated from exposure to such creators as Shakespeare Beethoven and Verdi whom they had enjoyed in various formats for much of the nineteenth century but also that the rigid cultural categories once they were in place made it so difficult for so long for so many to understand the value and importance of the popular art forms that were all around them Too many of those who considered themselves educated and cultured lost for a significant period and many have still not regained their ability to discriminate independently to sort things out for themselves and understand that simply because a form of expressive culture was widely accessible and highly popular it was not therefore necessarily devoid of any redeeming value or artistic merit In this innovative historical exploration Levine not only traces the emergence of such familiar categories as highbrow and lowbrow at the turn of the century but helps us to understand more clearly both the process of cultural change and the nature of culture in American society

The Arab Imago Stephen Sheehi, 2021-08-10 The first history of indigenous photography in the Middle East The birth of photography coincided with the expansion of European imperialism in the Middle East and some of the medium's earliest images are Orientalist pictures taken by Europeans in such places as Cairo and Jerusalem photographs that have long shaped and distorted the Western visual imagination of the region But the Middle East had many of its own photographers collectors and patrons In this book Stephen Sheehi presents a groundbreaking new account of early photography in the Arab world *The Arab Imago* concentrates primarily on studio portraits by Arab and Armenian photographers in the late Ottoman Empire Examining previously known studios such as Abdullah Freres Pascal S bah Garabed Krikorian and Khalil Raad the book also provides the first account of other pioneers such as Georges and Louis Saboungi the Kova Brothers Muhammad Sadiq Bey and Ibrahim Rifat Pasha as well as the first detailed look at early

photographs of the annual pilgrimage to Mecca In addition the book explores indigenous photography manuals and albums newspapers scientific journals and fiction Featuring extensive previously unpublished images The Arab Imago shows how native photography played an essential role in the creation of modern Arab societies in Egypt Palestine Syria and Lebanon before the First World War At the same time the book overturns Eurocentric and Orientalist understandings of indigenous photography and challenges previous histories of the medium **Dictionary Catalog of the University Library,**
