Hoffenberg, 2019-10-22 When the Reverend Henry Carmichael opened the Sydney Mechanics School of Arts in 1833 he introduced a bold directive for Australia to advance on the scale of nations it needed to develop a science of its own Prominent scientists in the colonies of New South Wales and Victoria answered this call by participating in popular exhibitions far and near from London's Crystal Palace in 1851 to Sydney Melbourne Adelaide and Brisbane during the final decades of the nineteenth century A Science of Our Own explores the influential work of local botanists chemists and geologists William B Clarke Joseph Bosisto Robert Brough Smyth and Ferdinand Mueller who contributed to shaping a distinctive public science in Australia during the nineteenth century It extends beyond the political underpinnings of the development of public science to consider the rich social and cultural context at its core For the Australian colonies as Peter H Hoffenberg argues these exhibitions not only offered a path to progress by promoting both the knowledge and authority of local scientists and public policies they also ultimately redefined the relationship between science and society by representing and appealing to the growing popularity of science at home and abroad      Industrial & Engineering Chemistry , 1924      **Annual report of the National Science Foundation** National Science Foundation (U.S.), 1951      *Annual Report for Fiscal Year ...* National Science Foundation (U.S.), 1958      **Intelligent Interactive Multimedia Systems and Services** G.A. Tsihrintzis, M. Virvou, T. Watanabe, 2013-06-07 At a time when computers are more widespread than ever intelligent interactive systems have become a necessity The term multimedia systems refers to the coordinated storage processing transmission and retrieval of multiple forms of information such as audio image video animation graphics and text The growth of multimedia services has been exponential as technological progress keeps up with the consumer's need for content The solution of one fits all is no longer appropriate for the wide ranges of users with various backgrounds and needs so one important goal of many intelligent interactive systems is dynamic personalization and adaptivity to users This book presents

37 papers summarizing the work and new research results presented at the 6th International Conference on Intelligent Interactive Multimedia Systems and Services KES IIMSS2013 held in Sesimbra Portugal in June 2013 The conference series focuses on research in the fields of intelligent interactive multimedia systems and services and provides an internationally respected forum for scientific research in related technologies and applications
