OUTCOME STORY/IMPACT STATEMENT

The Climate Action Platform in Agriculture for Latin America and the Caribbean (PLACA) prioritized Local Technical Agroclimatic Committees (LTACs, MTAs in Spanish) in their 2024 action plan as a strategic mechanism to enhance climate resilience and sustainability in agriculture.

MTAs enhance climate resilience in Latin American agriculture by improving decision-making and adaptation strategies. PLACA, the Alliance of Biodiversity, Innovation and OAT, and WMO supported implementing MTA action plans through capacity-building workshops, enabling new countries to advance in actions to implement MTAs, while others strengthened their expertise.

COAR INNOVATION(S) OR FINDINGS THAT HAVE RESULTED IN THIS OUTCOME OR IMPACT

The Local Technical Agroclimatic Committees (LTACs/MTAs) are participatory platforms that connect farmers, agro-meteorologists, and policymakers to co-produce localized climate intelligence for local agriculture. Unlike conventional climate services, MTAs integrate scientific forecasts with farmer knowledge, translating data into actionable insights tailored to regional conditions.

Discussions within MTAs result in local agroclimatic bulletins, providing practical guidance for climate-smart decision-making. By fostering trust in climate services and improving risk management strategies, MTAs enhance farmer resilience and policy alignment. With potential for national expansion and digital integration, they represent a scalable model for bridging the gap between climate science and agricultural decision-making and climate-change preparedness.
