Some people are going to wonder about this topic What is this idea about no digging As far as they know any gardening without any digging is like having breakfast eggs without salt and pepper and toast with or without butter Traditionally speaking everybody knows that the land has to be dug and the ground aerated well so that the seeds can get an opportunity to grow But here is a gardener talking about no digging gardening Well that seems interesting In fact no digging gardening has been in Vogue for centuries especially when people kept looking for shortcuts when they did not have to pick up their spades and their hose and do the digging in the garden especially when the weather was cold and blustery This book is going to give you plenty of information on how people have managed to grow their gardens without any sort of digging If you are thinking of becoming a gardener but just hate the thought of picking up a spade and digging into the ground because it is such a tiresome and tiring exercise here is some information about traditional non gardening methods which you might find interesting In fact this information is for all those people who have not heard that there is a controversy going on between people who advocate lots of digging and those people like I who really could not be bothered to dig but still manage to have tolerable harvests
