depression and fear *My Journey With Breast Cancer and God's Miracles That Sustained Me* Cathy Sutor
Riley, 2007-12-05 Cathy Sutor Riley decided to write this book during her treatments for bi lateral breast cancer It seemed to help to put her experiences on paper and she was hoping that her story would inspire and strengthen anyone that was going through any type of trial not just breast cancer It is obvious throughout this book that God was ever present during her journey and carried her when she couldn't carry herself The faith that Cathy was taught during her childhood from the two Christian parents she was blessed with is what made all the difference in her life She knows that without those teachings and lessons in faith she may have given up from the very first day of her diagnosis Cathy had always said she didn't see how any woman could go through breast cancer because she would have to give up her hair and breasts the two main things that make a woman feel feminine It is obvious now that the way a woman gets through this is from the strength given to her by God Only God can carry any of us through the trials we will face in this life and there will always be trials as long as we live on this earth It is this authors hope that this book will give you strength hope faith and the knowledge that your God is always with you and He is waiting for you to seek Him and depend on Him for everything He is as close as our next breath and He is our very best friend Always draw near to God and He will carry you through all things of this world May God bless you as you read and meditate on this book **The Politics of Cancer** Wendy N. Whitman Cobb, 2017-03-27 This book examines the politics of cancer explains how our government is intrinsically tied to cancer research efforts and documents how major political actors make cancer policy and are influenced in their decision making by political social scientific and economic variables Is whether we contract cancer and whether we survive the disease if we get it largely just a result of good versus bad luck or are these outcomes regarding cancer tied to the policies and actions of our federal government Cancer treating drug development and approval is overseen by the U S Food and Drug Administration billions of dollars of federal money are devoted towards cancer research and exposure of citizens to potentially cancer causing environments or chemicals is regulated by the Environmental Protection Agency Additionally all of these factors can be affected by the political motivations of our most powerful politicians The Politics of Cancer Malignant Indifference analyzes the policy environment of cancer in America the actors the political institutions the money and the disease itself identifying how haphazard U S government policy toward cancer research has been and how the president Congress government bureaucracies and even the cancer industry have failed to meet timelines and make the expected discoveries Whitman Cobb examines funding for the National Cancer Institute and the roles of the executive Congress policy entrepreneurs and the bureaucracy as well as that of the state of cancer science She argues that despite the so called war on cancer no strategic comprehensive government policy has been imposed leading to an indecisive cancer policy that has significantly impeded cancer research Written from a political science perspective the book offers insight into the realities of science policy and the ways in which the federal government is both the source of funding for much of cancer research and often deficient in setting

comprehensive and consistent anti cancer policy Readers will come to understand how Congress the president the bureaucracy and the cancer industry all share responsibility for the current state of cancer policy confusion and consider whether pharmaceutical companies for profit cancer treatment hospitals and interest groups like the American Cancer Society have a personal incentive to keep the fight alive **Unbeatable- The Whole Story** Laurie Frey,2008-05
