Congress. Senate. Committee on Environment and Public Works, 2009 **From weather observations to atmospheric and climate sciences in Switzerland** Saskia Willems, Markus Furger, 2016-06-02

In 2016 the Swiss Society for Meteorology Schweizerische Gesellschaft für Meteorologie SGM celebrates its 100th anniversary Compared to other meteorological societies it is not among the oldest ones Nevertheless meteorology has gone through such a remarkable evolution in the past 100 years that it is worthwhile to take a look back and recapitulate the developments of both science and SGM and to reveal their interaction The idea of this book is to give an overview of what has happened in the field of atmospheric sciences in Switzerland since the first systematic long term meteorological observations until today

The Rise of Climate Science Gerald R. North, 2020-10-21 In a career spanning four decades Gerald R North contributed groundbreaking research that continues to shape the modern field of climate science However the route he has taken was full of surprising twists and turns that included hate mail eavesdropping by the KGB and sometimes acrimonious debate with climate change deniers North's significant contributions to the field include his innovative toy model analysis of climate change based on ingeniously simplified models and his lead proposal for and successful approval of the Tropical Rainfall Measuring Mission TRMM satellite Launched in 1997 the TRMM's purpose was to collect data on the global climate system The TRMM operated successfully for 17 years before it was deactivated in 2015 In *The Rise of Climate Science* North recounts in detail his life in the vanguard of modern climate science He offers an insider look at the academic research and government initiatives around global warming and what that means for the planet He includes stories of conversations with top Soviet climate scientists at the height of the Cold War in the late 1970s complete with clandestine electronic surveillance He also describes the experience of testifying before Congress and engaging in public exchanges with those who doubted the reality of the phenomenon his research field described Climatology today has advanced into a mature phase This book is an important contribution to understanding its development in the twentieth century and adds a distinctly human face and sensibility to the ongoing societal conversation around climate change and its implications for our future

Strategic Guidance for the National Science Foundation's Support of the Atmospheric Sciences National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Strategic Guidance for NSF's Support of the Atmospheric Sciences, 2007-05-31 The National Science Foundation's Division of Atmospheric Sciences ATM supports research to develop new understanding of Earth's atmosphere and how the Sun impacts it Strategic Guidance for the National Science Foundation's Support of the Atmospheric Sciences provides guidance to ATM on its strategy for achieving its goals in the atmospheric sciences including cutting edge research education and workforce development service to society computational and observational objectives and data management The report reviews how the atmospheric sciences have evolved over the past several decades and analyzes the strengths and limitations of the various modes of support employed by ATM It concludes that ATM is operating in an environment that is ever more cross disciplinary interagency and international making a more strategic approach necessary to manage activities in a way that actively engages the atmospheric sciences community At the same time ATM should preserve opportunities for basic research especially projects

that are high risk potentially transformative or unlikely to be supported by other government agencies Finally ATM needs to be more proactive in attracting highly talented students to the atmospheric sciences as an investment in the ability to make future breakthroughs **Weather Modification** United States.
