Bandara,Karine Ravienna,2024-04-19 Major neurocognitive disorders are one of the leading causes of disability and dependency among the elderly worldwide Notably their far reaching impact extends beyond the estimated 50 million people currently living with a major neurocognitive disorder As the conversion to Alzheimer s disease AD progresses patients symptoms e g memory loss severe impairments in thinking and behavior place a heavy toll on their caregivers family and friends who face emotional frustration coupled with great financial stress Furthermore in terms of global cost estimation the World Health Organization predicted that by 2030 the treatment of patients with AD and other forms of acquired cognitive impairment will cost the healthcare system US 1 7 trillion or US 2 8 trillion if corrected for the increase in care costs

Reflecting on Autoethnographic and Phenomenological Experiences Donald Collins,2021-07-08 Reflecting on Autoethnographic and

Phenomenological Experiences A Caregiver's Journey is a unique critical qualitative inquiry study that uses the author's experience as a caregiver to his wife suffering from dementia as the basis of a critical autoethnography. It explores components of positive caregiving that may be not only melancholic and empirical but also emotionally painful. The book employs multiple approaches that include critical narrative phenomenology, autoethnography, and experiential writing. Through a phenomenological lens of an insider that includes self and other, hood, marriage, career, fatherhood, suicide, despair, triple grief, loss, caregiving, cooking, housekeeping, advocating, mind reading, and encouraging, a narrative illustrating self-reflection on particular experiences is constructed. These culminating experiences result in first-hand and didactical understandings by the caregiver. Individual personal and subjective interpretation of relational happenings are explored. Reflective journaling and observations of the seasons of marital life seek to understand if and how shared experiences transcend multiple contexts and help the reader understand experiences of dementia. Reflecting on Autoethnographic and Phenomenological Experiences A Caregiver's Journey is a volume that will be invaluable to qualitative inquiry researchers, autoethnographers, and those readers interested in the research of caregiving. Perfect for courses such as Autoethnography, Advanced Qualitative Inquiry, Disability Studies, Educational Research, Research Philosophy, Qualitative Research, Inquiry.

Mental Health in Nursing - E-Book Epub Kim Foster, Peta Marks, Anthony O'Brien, John Hurley, 2024-08-26. Holistic overview of mental health for nurses in a practice setting. All nurses play an important role in supporting mental health as part of holistic care provision. This book is designed to help students and novice clinicians to develop the knowledge, skills, and attitudes they need to care for people across a wide range of specialist and non-specialist practice settings. Written by a highly experienced team of mental health nursing experts, the book covers all the common mental health conditions nurses are likely to encounter in practice. It provides essential information on assessing for and identifying people experiencing mental illness, as well as how to provide appropriate responses, support, and referral across the numerous contexts in which nurses work. Fully updated and expanded, the sixth edition includes a wealth of lived experience perspectives designed to provide a critical perspective and a way of thinking about the issues, more deeply building empathy and understanding. High-quality evidence-based content developed specifically to meet the learning needs of students and novice clinicians in Australia and New Zealand. Describes the foundational principles and core mental health skills required by all nurses. Covers generalist health settings; content is relevant for nursing students across their curriculum. Focuses on mental health, not mental illness; an emphasis on recovery-oriented practice, trauma-informed care, and the value of building therapeutic relationships. Articulates and demonstrates the expert knowledge and skills of mental health nurses and includes information on professional self-care for all nurses. Covers how to assess, manage, and treat the major mental health problems people commonly experience. Provides scenarios for mental health screening, assessment, referral, and support across a range of clinical settings. Key points, anecdotes, critical thinking exercises, tables, and references in every chapter support learning.

Online resources for nurses in the workplace including videos and clinical scenarios Commentaries by experts by Lived Experience in all chapters understand what s helpful and what s not New to this edition New First Peoples chapters from both New Zealand and Australia how to provide cultural safety New chapter on preparing for mental health clinical placements More content on suicide More content on the impact of trauma adverse childhood events on mental health and addictions
