psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences *Professional Heroku Programming* Chris Kemp,Brad Gyger,2013-01-22 A complete guide to building and deploying web apps with Heroku A cloud application platform Heroku is currently the only approved platform for creating apps within Facebook and its number of users is growing at rapid pace However there are very few books on the market that offer professional level coverage of this platform until now The author duo begins with an introduction to the Heroku platform and its associated core concepts and then goes on to explain how writing for this platform differs from that of traditional development systems Example applications additional resources and advice for your next steps round out this resource making it a thorough indispensable guide Features information not found anywhere else as both authors work for Heroku Explains the inner workings of Heroku with special emphasis placed on building web and mobile applications Introduces GIT based development workflow and the process model within the Heroku platform Details coding building deploying and scaling effectively using the Heroku tool base Providing you with fully functional code and downloadable code examples Professional Heroku Programming is your complete guide to mastering this platform

Ward's Automobile Topics ,1909 *Discorrelated Images* Shane Denson,2020-09-18 In *Discorrelated Images* Shane Denson examines how computer generated digital images displace and transform the traditional spatial and temporal relationships that viewers had with conventional analog forms of cinema Denson analyzes works ranging from the Transformers series and Blade Runner 2049 to videogames and multimedia installations to show how what he calls discorrelated images images that do not correlate with the abilities and limits of human perception produce new subjectivities affects and potentials for perception and action Denson s theorization suggests that new media theory and its focus on technological development must now be inseparable from film and cinema theory There s more at stake in understanding discorrelated images Denson contends than just a reshaping of cinema the development of new technical imaging processes and the evolution of film and media studies discorrelated images herald a transformation of subjectivity itself and are essential to our ability to comprehend nonhuman agency **Scentwork for Horses** Rachaël
