Claire M. Renzetti,1992-04-06 Based on a study of violence in lesbian relationships this challenging book derives from a common theme expressed by the subjects the sense of having been betrayed first by their lovers and subsequently by a lesbian community which tends to deny the problem when victims seek help Renzetti skillfully addresses several central issues consequences for victims batterers and the community as a whole and what we can learn about domestic violence in

general by studying violence in lesbian relationships The research offers a fresh look at domestic violence by examining the phenomenon of women as perpetrators of intimate violence against women at the same time making a clear distinction between battering and self defence      *Motivating Persistence in the Face of Failure* Catherine Chi Chase, 2011 Failure often presents a valuable learning opportunity however students may need motivational scaffolds to protect them from the negative psychological ramifications of failure This work explored the effectiveness of a motivation based intervention called an ego protective buffer EPB that was designed to enhance persistence after failure An ego protective buffer EPB maintains a stable sense of competence by lessening the impact of failure on one's psyche The specific instantiation of an EPB tested here was designed to elicit a combination of internal and external attributions for failure External attributions protect one's sense of competence by averting the blame for failure away from the self while internal attributions encourage students to take some responsibility for remedying the failure situation Based on this theory we embedded an EPB into the rule structure of a computer based genetics game and unleashed it on 143 seventh graders In the EPB condition students were told that winning in the game was a probabilistic outcome dependent on a combination of chance and skill on the part of the students In the Control condition students were told that winning in the game was a deterministic outcome dependent on students skill only Students played the game during two class periods Measures include pre and posttests motivational survey measures and in game behaviors The EPB did have an effect on learning but only amongst high failing students High failing EPB students learned just as much as their low failing counterparts This was not so in the Control condition where high failing students learned far less than their low failing counterparts So the high failing EPB group was behaving as if they were buffered from the effects of failure We also found evidence of a possible mechanism behind this learning effect In the high failing EPB condition students were equally likely to persist after success and failure while in the Control condition students were far more likely to persist after success exhibiting risk averse behaviors This difference was more exaggerated in a within subjects comparison contrasting the same individuals in situations of high and low failure Finally persistence after failure was associated with learning across the full sample of subjects Regardless of condition or failure rate students who persisted more after failure also learned more This study together with the author's related body of work provides compelling evidence that an EPB is a viable intervention for encouraging persistence in the face of failure      Enhancing Motivation for Change in Substance Abuse Treatment William R. Miller, 1999 This report is based on a rethinking of the concept of motivation which is redefined here as purposeful intentional positive directed toward the person's best interests This report shows how substance abuse treatment staff can influence change by developing a therapeutic relationship that respects builds on the client's autonomy makes the treatment clinician a partner in the change process Describes motivational interventions that can be used at all stages of the change process from pre contemplation preparation to action maintenance informs readers of the research results tools assessment instruments related to enhancing motivation      The Mindful Musician Vanessa

Cornett,2019-05-28 In *The Mindful Musician Mental Skills for Peak Performance* author Vanessa Cornett offers guidelines to help musicians cultivate artistic vision objectivity freedom quiet awareness and self compassion both on and offstage in order to become more resilient performers Contrary to modern culture s embrace of busyness and divided attention Cornett s contemplative techniques provide greater space for artistic self expression and satisfaction With the aid of a companion website that includes audio files and downloadable templates *The Mindful Musician* provides a method to promote attentional focus self assessment emotional awareness and creativity The first of its kind to combine mindfulness practices with research in cognitive and sport psychology this book helps musicians explore the roots of anxiety and other challenges related to performance all through the deliberate focus of awareness
