*Henry Ford's Plan for the American Suburb* Heather Barrow, 2018-10-29 Around Detroit suburbanization was led by Henry Ford who not only located a massive factory over the city's border in Dearborn but also was the first industrialist to make the automobile a mass consumer item So suburbanization in the 1920s was spurred simultaneously by the migration of the automobile industry and the mobility of automobile users A welfare capitalist Ford was a leader on many fronts he raised wages increased leisure time and transformed workers into consumers and he was the most effective at

making suburbs an intrinsic part of American life The decade was dominated by this new political economy also known as Fordism linking mass production and consumption The rise of Dearborn demonstrated that Fordism was connected to mass suburbanization as well Ultimately Dearborn proved to be a model that was repeated throughout the nation as people of all classes relocated to suburbs shifting away from central cities Mass suburbanization was a national phenomenon Yet the example of Detroit is an important baseline since the trend was more discernable there than elsewhere Suburbanization however was never a simple matter of outlying communities growing in parallel with cities Instead resources were diverted from central cities as they were transferred to the suburbs The example of the Detroit metropolis asks whether the mass suburbanization which originated there represented the American dream and if so by whom and at what cost This book will appeal to those interested in cities and suburbs American studies technology and society political economy working class culture welfare state systems transportation race relations and business management
