James Cameron,2013-10-17 An account of the early twentieth century Polar region explorer who was the first to complete an
aerial expedition to the North Pole aboard an airship Roald Amundsen was the most successful polar explorer of his era using
sledges dogs skis and ships He is mainly remembered for being the first man to reach the South Pole on December 14 1911
What is less often remembered is that he was also the first man to reach the North Pole on May 12 1926 as the leader of the
Amundsen Ellsworth Nobile expedition in the airship Norge His involvement in aviation from his experiments with man lifting
kites in 1909 to his death in 1928 while flying from Norway to Spitsbergen has not been the subject of a detailed study until
now From Pole to Pole explores Amundsen s enthusiasm for flight from the moment he read about Bleriot s flight across the
English Channel in an airplane In June 1928 Amundsen and five companions took off in a search and rescue flight for the
missing airship Italia and were never seen again The only traces of the men and their aircraft were a tip float and an empty
fuel tank which washed up on the coast of Northern Norway several months later Searches of the seabed near Bear Island for
the remains of the Latham forty seven flying boat he was flying in took place in 2004 and 2009 and interest in the mystery of
his disappearance remains high **Subject Index of Modern Books Acquired** British Library,1927 **Weekly

,1927 **Realm of Ice and Sky** Buddy Levy,2025-01-28 Two time National Outdoor Book Award winning author Buddy
Levy s thrilling narrative of polar exploration via airship and the men who sacrificed everything to make history Arctic
explorer and American visionary Walter Wellman pioneered both polar and trans Atlantic airship aviation making history s
first attempts at each Wellman has been cast as a self promoting egomaniac known mostly for his catastrophic failures
Instead he was a courageous innovator who pushed the boundaries of polar exploration and paved the way for the ultimate
conquest of the North Pole which would be achieved not by dogsled or airplane but by airship American explorer Dr
Frederick Cook was the first to claim he made it to the North Pole in 1908 A year later so did American Robert Peary but
both Cook s and Peary s claims had been seriously questioned There was enough doubt that Norwegian explorer
extraordinaire Roald Amundsen who d made history and a name for himself by being first to sail through the Northwest

Passage and first man to the South Pole picked up where Walter Wellman left off attempting to fly to the North Pole by airship He would go in the Norge designed by Italian aeronautical engineer Umberto Nobile The 350 foot Norge flew over the North Pole on May 12 1926 and Amundsen was able to accurately record and verify their exact location However the engineer Nobile felt slighted by Amundsen Two years later Nobile returned this time in the Italia backed by Prime Minister Benito Mussolini This was an Italian enterprise and Nobile intended to win back the global accolades and reputation he believed Amundsen had stripped from him The journey ended in disaster death and accusations of cannibalism launching one of the great rescue operations the world had ever seen Realm of Ice and Sky is the riveting tale of the men who first flew the most advanced technological airships of their time to the top of the world risking and even giving their lives for science country and polar immortality *International Index to Periodicals* ,1929 An author and subject index to publications in fields of anthropology archaeology and classical studies economics folklore geography history language and literature music philosophy political science religion and theology sociology and theatre arts Show Me a Hero Jeremy Scott,2011-10-31 The Roaring Twenties they called it a fun time to be alive The birth of a brave new world The jazz age of Fords flappers prohibition and bathtub gin The movies radio and consumerism have redefined the American dream this is the dawn of our modern era The machine is the future and supreme among machines is the aeroplane The aeroplane speed glamour communication is the emblem of the Now And a race is on to be the first to fly to the North Pole a perilous feat at the extreme edge of technological possibility in the primitive aircraft of the day The main contestant Roald Amundsen who trudged first to the South Pole fourteen years before but is now fifty two bankrupt and tarnished His principal competitor Richard Byrd Annapolis graduate and well connected Virginian swell To be the first to achieve the Pole would mean glory to one s country reward and worldwide fame To fail once in the air would mean almost certain death **Annual Report of the Board of Regents of the Smithsonian Institution** Smithsonian Institution,Smithsonian Institution.
