The Internet Is Infected! Jill Alecci, Jacob Emerte, 2015-03-20 Before being struck down at the height of my career twice by cancer I spent 28 years working in Information Technology IT and serving the U S military as well as various U S government agencies and large corporations During my long years of battling cancer I listened too many so called security experts cite inferior cyber security approaches to using something as dangerous as the internet Hearing their inferior solutions regurgitated over and over again I knew I had been given a new mission in life to do something to help Small Business Owners and Home Computer Users Therefore five years ago and at great personal expense I embarked on a crusade to give something back to the world by writing my book The Internet is Infected Make no mistake about it the internet is stalking you It is not your friend and is your worst enemy As you may have recently learned

governments and corporations around the world expend vast resources and expense to spy upon your internet use phone conversations email GPS location and more Every facet of your daily life is being scrutinized This insidious invasion into your privacy is given very limited coverage and no one is telling you how to prevent it In oppressive countries using the internet incorrectly results in severe repercussions torture and even death If that is not enough to make you wary of your internet use thousands of identity thieves hackers whom I call crackers and criminal organizations are also watching your internet activity and installing malware on your internet devices Once this malware is on your device they can watch everything you do and use your internet devices for illicit activity such as attacking others connected to the internet China and increasingly Russia train their youth in the art of hacking which many western IT professionals know nothing about Your anti software will not keep you safe as many of us have learned the hard way Read my book to learn how to use the internet safely and reduce your digital footprint it will help you take back your privacy
