## **Personal Maturity The Existential Dimension:**

**Personal Maturity** Bernard J. Boelen,1978-12      Personal Maturity Bernard Jacques Boelen,1978      **Aging and the Religious Dimension** Susan A. Eisenhandler,1994-02-17 Aging and religion has been badly neglected in the field of Gerontology This book containing 13 chapters of original theory and research is devoted to understanding the place that religion and spirituality hold in the lives of elderly persons The authors each experts in their own field approach this issue from their backgrounds in the social sciences and the humanities Overall this is a ground breaking collection It is one of the first attempts to seek to understand the role that religion plays in the lives of elderly persons Based on their various multi disciplinary perspectives the authors make use of a variety of qualitative and quantitative methodologies as well as personal narrative and literature to grapple with this issue Finally the book is unique in that it addresses scholars and students including the educated layman rather than the professional alone      **Personal Transformation and a New Creation**

Delio, Ilia ,2016-08-18 Top scholars examine the theories of Pierre Teilhard de Chardin through the lens of Beatrice Bruteau s pioneering work on evolution and consciousness Contributors include Cynthia Bourgeault Ursula King Barbara Fiand Kerrie Hide Gabrielle Stoner Kathleen Duffy John Shea Carla De Sola and Joshua Tysinger      *The Philosophy of Human Nature* Howard P. Kainz,2015-11-05 What exactly is human nature What makes humans different from animals if there is any difference In this book Howard Kainz presents a philosophical analysis of the various concepts of human nature and the many controversies that have surrounded them for centuries He explores issues such as whether human beings are truly free whether human instincts differ from animal instincts and the realities of human maturity      *Intimacy* Martin Fisher,2012-12-06 Intimacy is a complex and heterogeneous concept that has generated a variety of definitions theories and philosophies over the years Al though there is much disagreement about the essential meaning of the term there seems to be a consensus that intimacy whatever it may be is of central importance in human relationships and specifically in the theory and practice of psychotherapy One approach to intimacy focuses on an intrapsychic conception Intimacy occurs when an individual achieves full self knowledge and is fully in touch with his or her feelings and wishes From this viewpoint an intimate act occurs when a person is willing to share these feelings and wishes with another so that self disclosure becomes an important index of intimacy This definition also implies that intimacy need not be reciprocal so that a therapeutic relationship can achieve a good deal of intimacy without the therapist engaging in self disclosure An alternate approach to intimacy stresses the interpersonal nature of the concept Intimacy is seen as the product of an interaction and can only occur between people Each one is able to touch something meaningful in the other whether at a conscious behavioral level or an unconscious and inferential level Therapists seeking intimacy in these terms would probably be a good deal more active and consider it more important to reveal something of the substance of their own persons if not the facts of their lives

*Markers of Psychosocial Maturation* Mufid James Hannush,2021-07-15 This book advances an integrative approach to

understanding the phenomenon of psychosocial maturation Through a rigorous dialectically informed interpretation of psychoanalytic and humanistic existential phenomenological sources Mufid James Hannush distils thirty essential markers of maturity The dialectical approach is described as a process whereby lived affect and value laden polar meanings are transformed through deep insight into complementary and integrative meta meanings The author demonstrates how responding to the call of maturation can be viewed as a life project that serves the ultimate purpose of living a balanced life The book will appeal to students and scholars of human development psychotherapy social work philosophy and existential humanistic and phenomenological psychology

**Vatican II and Phenomenology** J.F. Kobler, 2012-12-06 The thesis of this essay may be stated quite briefly Vatican II is a demonstration model of the phenomenological method employed on an international scale It exemplifies the final developmental stage postulated by Husserl of an inter subjective phenomenology which would take its point of departure not from individual subjectivity but from transcendental intersubjectivity Vatican II accordingly offers a unique application of a universal transcendental philosophy in the field of religious reflection for the practical purposes of moral and socio cultural renewal Phenomenology as a distinctively European development is relatively unknown in America at least in its pure form Our contact with this style of intuitive reflection is usually filtered through psychology or sociology However Edmund Husserl The Father of Phenomenology was originally trained in mathematics and he entered the field of philosophy because he recognized that the theoretical foundations of modern science were disintegrating He foresaw that unless this situation were rectified modern men would eventually slip into an attitude of absolute scepticism relativism and pragmatism After the First World War he saw this theoretical problem mirrored more and more in the social turbulence of Europe and his thoughts turned to the need for a renewal at all levels of life In 1937 when Nazism was triumphant in Germany and Europe on the brink of World War II he wrote his last major work The Crisis of European Sciences and Transcendental Philosophy

**Proto-Phenomenology, Language Acquisition, Orality and Literacy** Lawrence J. Hatab, 2019-10-25 Through his innovative study of language noted Heidegger scholar Lawrence Hatab offers a proto phenomenological account of the lived world the first world of factual life where pre reflective immediate disclosiveness precedes and makes possible representational models of language Common distinctions between mind and world fact and value cognition and affect miss the meaning laden dimension of embodied practical existence where language and life are a matter of dwelling in speech In this second volume Hatab supplements and fortifies his initial analysis by offering a detailed treatment of child development and language acquisition which exhibit a proto phenomenological world in the making He then takes up an in depth study of the differences between oral and written language particularly in the ancient Greek world and how the history of alphabetic literacy shows why Western philosophy came to emphasize objective representational models of cognition and language which conceal and pass over the presentational domain of dwelling in speech Such a study offers significant new angles on the nature of philosophy and language

**Patterns in Meaning**

Wilhelm Dupré, 1994 Peeters 1994 Catholic Reception of Continental Philosophy in North America Gregory P. Floyd, Stephanie Rumpza, 2020-02-07 Why has continental philosophy so often made its North American home in Catholic institutions

**A Marriage of Philosophy and Music** Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art

Philosophy's Role in Counseling and Psychotherapy Peter Raabe, 2013-11-26 In Philosophy's Role in Counseling and Psychotherapy Peter Raabe argues that philosophy is an effective method in treating mental illness Calling for a paradigm shift away from the standard belief that the brain and mind are identical Raabe argues that so called mental illnesses such as depression and schizophrenia are not the actual causes of psychological misery Instead they are just labels for symptoms For example the word depression is merely a label attached to a collection of symptoms such as sadness hopelessness and low self esteem Raabe posits that distressing or painful life events can cause symptoms that are often clinically labeled as the mental illness of depression The suffering brought on by painful life events can often be alleviated with helpful discussions and without resorting to medications Because philosophy is the foremost form of discussion it means that the suffering that is labeled mental illness can be treated and even cured with philosophy Raabe ultimately concludes that philosophy is beneficial in three ways it can prevent the onset of a so called mental illness in the person who studies it it can be used to help individuals suffering from the distress that is labeled mental illness and it will enhance the competence of the counselor or therapist who practices it
