The Principles of European Contract Law and Dutch Law: A Commentary Ewoud H. Hondius, H. J. Van Kooten, 2002-08-27 The topic of harmonisation of European private law and European contract law in particular is rapidly gaining in importance The topic is not only widely studied by academics and students all over Europe and even beyond it is also on the political agenda of the European Parliament the European Commission and the European Council The most important achievement in this field is no doubt the Principles of European Contract Law PECL drafted by the Commission on European Contract Law The European Commission considers the PECL to be a serious option for further harmonisation of European contract law within the European Union This publication is the first to provide a systematic overview of the PECL in comparison with Dutch contract law as a whole The book is concise and because of its structure it is easily accessible Amongst the contributors there are many highly distinguished contract law specialists It may be used at universities in courses on Comparative Law European Private Law and European Contract Law It may also be used by international practitioners foreign students and academics interested in Dutch contract law who do not have access to Dutch contract law because they have no knowledge of the Dutch language Last but not least the book will be of interest to all jurists interested in the harmonisation of the European Private Law

Service Contracts Maurits Barendrecht, Chris Jansen, Marco Loos, Andrea Pinna, Rui Cascao, Stephanie van Gulijk, 2009-04-27 The rules presented in this volume of Principles of European Law deal with service contracts The economic importance of service contracts within the European Union is enormous The European Commission recently estimated that services account for some 50% of EU GDP and for some 60% of employment in the Union though an exact figure is hard to determine given that many services are provided by manufacturers of goods According to the European Commission many services appear in official statistics as manufacturing activity meaning that the role of services in the economy is often significantly underestimated

Contracts, Performance Measurements, and Accountability in the Public Sector Gavin Drewry, Carsten Greve, Thierry Tanquerel, 2005 This book addresses issues to do with public accountability audit and performance measurement that are both highly topical and of crucial importance to the theory and practice of public administration in an era of contractualized public management The literature on public sector contracting covering both hard agreements ones that are legally enforceable and soft agreements enforced by negotiation and mutual trust has been growing for some time and the present book adds a primarily European perspective on contracting performance based management and accountability One important aspect of this study is its

recognition that those responsible for monitoring public services and holding them to account have had to an increasing extent to reconcile tensions between on the one hand the need for strong oversight and on the other the encouragement of innovation and risk in an increasingly competitive and entrepreneurial public service culture Following an introductory overview by the three editors the book is in three parts The first part deals with the theory and practice of performance measurement and evaluation the second part provides a series of specific case studies of audit and accountability in a variety of countries and contexts the third part offers some wider cross cutting perspectives Based on the work of the EGPA permanent study group on the history of contractualization *Contracts Performance Measurement and Accountability in the Public Sector* draws upon the wide expertise and research interests of academics and practitioners from the United Kingdom Denmark Switzerland Belgium Sweden and the USA *Contract Formation* Michael Furmston, G.J. European Contract Laws Nils Jansen, Reinhard Zimmermann, 2018-07-13 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis commun* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law
