Our Human Herds: The Theory of Dual Morality (Second Edition, Unabridged) Stephen Martin Fritz, 2019-05-14 Let us imagine that somewhere in present day South America a nation exists as the United States was constituted in 1789 George Washington is its president and Thomas Jefferson its secretary of state It is a nation that allows only white males to vote and its president cabinet officials and many of its citizens own slaves If the America of 1789 existed right now what would we think of it Would it be right to invade it in order to liberate its people Would we consider a complete embargo of it until it changed its ways Would it be a pariah among nations Or would we recognize and cooperate with it declaring its president and secretary of state political geniuses Maybe we would just do nothing and trust that in 100 or so years it will straighten itself out What would be the correct way to think of such a nation and its leaders Three hundred years ago if a woman was raped and became pregnant we d kill the rapist and spare the baby Today we spare the rapist and kill the baby One hundred years ago only heterosexual marriages were legal Today political

leaders around the world are celebrating gay relationships How and why does our moral outlook change in such matters By the time you are done reading this book you will have concrete answers to these questions and many more This is a learned thoroughly researched study and dazzlingly bright The effervescent approach to writing makes its pages fly by Studies as brilliant as this one deserve a far wider audience An engrossing and mind expanding examination of morality Kirkus Reviews

Preference and Information Dan Egonsson, 2016-12-05 Is it important to our

quality of life that the preferences we satisfy are rational and well informed Standard preferentialist theories allege that a person's preferences and their satisfaction are the correct measure of well being In preference sensitive theories preferences are important but do not count for everything This raises the question of whether we ought to make demands on these preferences In this book Egonsson presents a critical analysis of the Full Information Account of the Good which claims that only the satisfaction of rational and fully informed preferences has value for a person The problems he deals with include how is an information requirement to be formulated and shaped Is it possible to design a requirement that is both neutral to the agent's epistemic situation and reasonable Is the requirement reasonable Does it make sense to claim that some are better off if we satisfy the preferences they would have had in some merely hypothetical circumstances This is an important new book on preference rationality which will be of great interest to academics and students of ethics quality of life and rationality
