Gifts and Interests Antoon Vandavelde,2000 According to a common understanding of economics economists attempt to understand and explain societal reality in the light of individual self interest For them a gift is no exception to this except for the slight and misleading veil of altruism which covers a purely egoistic motivation On the other hand theologians philosophers and ethicists use a more normative concept of man Man realises his best potential through deeds of selfless

sacrifice that remain unknown to everyone In reality however people are either entirely egoistic nor altruistic Marcel Mauss model of the gift is interesting because it seems to escape the classical or rather modern egoism altruism dichotomy Gifts are not primarily motivated by the well being of myself or the other but rather by the desire to bring about or maintain a certain kind of social relation between giver and receiver Altruistic as well as egoistic motivations are an integral part of that relation The role of gifts in the constitution of social relations and social cohesion explains why most kinds of gifts are reciprocal and even obligatory In this book anthropologists sociologists and economists as well as philosophers focus on the question of the relevance of Mauss work on the gift for the understanding of actual social phenomena *International Business* Janet Morrison,2017-09-16 Clear comprehensive and engaging this core textbook is authored by an established and respected expert in the field and approaches its subject from a truly global perspective offering in depth insights into current challenges facing international businesses The text has been carefully designed to encourage critical reflection and is packed with case studies and innovative learning features to emphasise the links between theory and the real world The book takes a multidisciplinary multi perspective approach placing International Business in its political social and ethical context as well as its economic one This textbook is essential reading for undergraduate postgraduate and MBA students studying international business for the first time *Philosophical Dimensions of Privacy* Ferdinand David Schoeman,1984-11-30 This collection of essays makes readily accessible many of the most significant and influential discussions of privacy Learning to be Human: The Educational Legacy of John MacMurray Michael Fielding,2016-04-14 The educational writings of John Macmurray one of the finest 20th century philosophers of his generation have a special relevance for us today In similar circumstances of international crisis he argued for the central importance of education addressing fundamental issues of human purpose how we lead good lives together the emphasis on wisdom rather than knowledge alone the advancement of a truly democratic culture and the overriding importance of community in human flourishing This remarkable collection of articles from leading international scholars includes the hitherto unpublished John Macmurray lecture Learning to be Human and brings together invited contributions from a range of fields and disciplines e g philosophy of education moral philosophy care ethics history of education theology religious education future studies and learning technologies and a number of countries across the world e g Australia the UK and the USA Countering overemphasis on technique and its typical separation from wider human purposes emblematic of much of our current malaise this book asks what it might mean to take the education of persons seriously and how such a perspective helps us to form judgments about the nature and worth of contemporary education policy and practice This book was originally published as a special issue of the Oxford Review of Education **Contemporary Russia as a Feudal Society** V. Shlapentokh,Joshau Woods,2007-11-26 The book offers a theoretical discussion of the feudal model and a preliminary application of the model to post Soviet Russia In addition to a review of the feudal model as an ideal type the author explains the analytical benefits of drawing comparisons between

countries and across historical contexts Specifically contemporary Russia is compared to Western European countries during the Middle Ages and to the Soviet period in Russian history The book is devoted to illuminating the most important political social and economic characteristics of contemporary Russian society **Advances in Human Factors, Business**
