## **Personal Relationships:**

*Personal Relationships and Social Support* Steve Duck, Roxane Cohen Silver, 1990 It is widely acknowledged that the support given by friends intimates and other members of a social network is important to a person's well-being. Until recently, however, little attention has been paid to the relational processes and contexts through which social support is mediated. *Personal Relationships and Social Support* represents a major initiative in its focus upon social support as a phenomenon embedded in the everyday transactions and dynamics of people's interpersonal relationships. The authors consider such issues as the importance of the day-to-day talk of social support within interpersonal relationships, the strategies that people use to mobilize support within particular relational contexts and the impact of people's daily life and work patterns on the need for and ability to mobilize support. The effect in turn of competence in support giving on the development and maintenance of interpersonal relationships is examined, as are the possible negative consequences of particular kinds of support. *Personal Relationships and Social Support* brings together for the first time two strands of work on social support and the nature of interpersonal relationships which have tended to develop in isolation from each other. This path-breaking book will be essential reading for all those interested in new developments in theory and research in the field of human relationships.

The book considers a wide range of relationships that may affect work attitudes, specifically supervisory, co-worker, team, customer and non-work relationships. The study of relationships spans many sub-areas within I/O Psychology and Social Psychology including leadership, supervision, mentoring, work-related social support, work teams, bullying, interpersonal deviance and the work-nonwork interface.

**Personal Relationships Across Cultures** Robin Goodwin, 2013-05-13 Is falling in love the same the world over? What makes a happy marriage in different cultures? How does our society influence us in the way we raise our children? Is modern life incompatible with intimacy? In this innovative new text Robin Goodwin challenges many of the established views on relationships by considering how different cultures view different relationships: love, marriage, friendship, the family, sexual relations. By discussing fundamental differences in values between cultures alongside other key influences such as social class and education, he explores why these differences occur and how different political and historical events have challenged existing patterns of relationships. Finally, drawing on research from all parts of the world, he considers how we can use this knowledge to help different communities across the globe cope with their most pressing relational challenges. Dr Robin Goodwin is Reader in Psychology in the Department of

*Personal Relationships and Personal Networks* Malcolm R. Parks, 2017-09-25 The effort to understand personal relationships has traditionally focused on the individual characteristics of participants *Personal Relationships and Personal Networks* takes this analysis a step further focusing on research linking participants feelings and actions within a given personal relationship to the larger social context surrounding it Author Malcolm R Parks expands on the idea that the initiation development maintenance and dissolution of relationships are inextricably connected to each participant's social network a perspective that allows for a better appreciation of our connection to the world and a greater understanding of our significant power as social actors This book offers a new way to consider basic notions about how relationships form such as how particular people meet and how relationships are started Among many findings the volume demonstrates that individuals in relationships feel closer and generally more connected when they also have a greater amount of contact with the members of each other's personal networks and when they believe that network members support their relationship Additional topics discussed include how this social context model is applicable to different types of relationships how participants interact with network members how social networks are involved in the deterioration of personal relationships and what drives change in relationships Students researchers and professionals in a wide variety of disciplines such as communication psychology sociology anthropology family studies clinical psychology public health nursing education and social work will find this book useful as will anyone seeking to better understand their own personal relationships

Theoretical Frameworks for Personal Relationships Ralph Erber,Robin Gilmour,2013-06-17 The past two decades have seen a tremendous increase in research and scholarship devoted to personal relationships From rather scattered beginnings a recognizable and recognized field has emerged whose strength and health is reflected in a wide array of indicators The editors contend that while the vigor of the field is often shown in the diversity and innovation of its research it is in the theoretical domain that they find evidence of a real coming of age This volume provides grounds for arguing that the diversity of theorizing is particularly healthy at this point The reader will notice that there is some diversity in terms of how much theory and research is contained in each chapter some are purely theoretical others are complemented by original pieces of empirical research The editors and contributors are from different countries another way in which the diversity of this book manifests itself The variety of the frameworks presented are seen as a strength as building on established strengths elsewhere to feed into relationship research and enhance its vitality Each chapter makes its own contribution to thinking and research about personal relationships As a group they add to an exciting collection that not only reflects a richness of conceptual backing but also a wide range of usable theoretical structures

*The Emerging Field of Personal Relationships* Robin Gilmour, Steve Duck, 2021-10-07 Originally published in 1986 this book is a result of the first International Conference on Personal Relationships held in 1982 The conference itself was a significant event in publicly bringing together major figures whose work was starting to define the new area of personal relationships The chapters are arranged to follow the structure of the conference program with major opening and closing discussions covering the whole field and the rest of the chapters grouped under the headings of Depiction and Taxonomy of Relationships Development and Growth of Relationships and Disorder and Repair of Relationships The result is by no means a comprehensive treatment of the field but the editors hoped that the book highlighted significant issues in personal relationship research as well as some excellent examples of the ways in which issues and problems were being tackled at the time They also hoped that it would have an effect on the future development of the field of personal relationships by indicating its value and potential

ways of understanding personal relationships from a dialectical perspective It is written for scholars in higher education both faculty and students across many fields within the social sciences and the humanities who seek answers to questions about how people relate to one another The book is valuable for all scholars who pursue new ideas because it models a form of scholarly communication in which multiple voices can be acknowledged as valid the worth of one perspective is not measured by the denigration of another and difference is celebrated as conducive to learning rather than threatening to it The contributors emphasize the characteristics of their dialectical view that set them apart from other dialectical authors and describe their methods of studying relationships from a dialectical perspective Following the Bakhtinian perspective they honor the values of dialogism by respecting different and sometimes contradictory views assuming that these views can be valid and joining in a discussion with the editors and other contributors about their emerging work They also acknowledge that the chapters in this text are part of an ongoing process to frame and reframe emerging ideas and allow the dialogue that occurs within this frame the freedom to express creative unique ideas
