Personal Space The Behavioral Basis Of Design:

Personal Space Robert Sommer, 1969 A psychologist relates man's emotional needs and behavior to architectural and interior design

Personal Space Robert Sommer, 2007 Widely regarded as the classic text on user centered design of public buildings and spaces this book studies how people relate to the designed space around them and how the design of that space can affect their behavior Its contents are based on comprehensive academic research the conclusions it draws are highly applicable in real world projects and the style of presentation is lucid and interesting The author Robert Sommer deals with topics such as privacy spatial invasion small group ecology and looks at the role of design in settings that include airports stations hospitals and schools When it was first published this book went through 25 printings in English alone Although it was written when the study of behavior and design was just beginning to be appreciated the lessons are still deeply relevant for today's spatial designers and also important to the digital world in the design and analysis of shared digital spaces for co-operative work and multi-player games Robert Sommer writes with authority and clarity He has updated this new edition of his work with an introduction and detailed notes accompanying each chapter describing what has changed in the intervening years and what has remained the same Your book will now become a standard at our office as it gives us added insight in design work Charles W Pelly President of the Industrial Designers Society of America 1991-92

Environmental Design Research Wolfgang Preisner, 2018-12-07 First published in 1973 this two volume set summarises and structures the contributions by researchers at the Fourth International EDRA Conference held in April 1973 The second volume focuses on the symposia and invited papers which were theory orientated The symposia comprehensively assessed the status of contemporary knowledge as well as potential future directions in the respective fields contributing to environmental design research This volume also provides summaries of the workshops which explored problem solving processes and offered methodological applications to environmental analysis and other topics of concern This book will be of interest to students of architecture and design

The Shaping of Us Lily Bernheimer, 2019-06-29 The spaces we inhabit from homes and workspaces to city streets mediate community creativity and our very identity Using insights from environmental psychology design and architecture The Shaping of Us shows how the built and natural worlds subtly influence our behavior health and personality Exploring ideas such as ruin porn and ninja proof seating mysteries of how we interact with the physical spaces around us are revealed From caves and cathedrals to our current housing crisis and the dreaded open plan office Lily Bernheimer demonstrates that for our well being we must reconnect with the power to shape our spaces Have you ever wondered why we adorn our doorframes with moldings What does Wikipedia's open source technology have to teach us about the history and future of urban housing What does your desk say about your personality From savannahs and skyscrapers to co-working spaces The Shaping of Us shows that the built environment supports our well being best when it echoes our natural habitats in some way In attempting to restore this natural quality to human

environments we often look to other species for inspiration The real secret to building for well being Bernheimer argues is to reconnect humans with the power to shape our surroundings When people are involved in forming and nurturing their environments they feel a greater sense of agency community and pride or collective efficacy And when communities have high rates of collective efficacy they tend to have less litter vandalism and violent crime Playful and accessible The Shaping of Us is a delightful read for designers professionals and anyone wanting to understand how spaces make us tick and how to fix the broken bits of our world

Building Evaluation Wolfgang F.E. Preiser, 2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i e the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i e IAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and

several additional authors were invited to participate in order to round out the contents of this book **Post-Occupancy Evaluation (Routledge Revivals)** Wolfgang F. E. Preiser, Edward White, Harvey Rabinowitz, 2015-07-24 Post occupancy evaluation focusing on building's occupants and their needs provides insight into the consequences of past design decisions and forms a sound basis for creating better buildings in the future This book first published in 1988 includes a review of the evolution of the field a conceptual frame work for POE and pragmatic information on planning conducting and reporting POEs Post Occupancy Evaluation categorizes the approaches to building evaluation by describing the three levels of POE effort indicative investigative and diagnostic each differing in terms of time resources and personnel needed In its scope Post Occupancy Evaluation is both comprehensive and specific professionals in the design and planning disciplines will find it an invaluable resource for understanding the theory behind POE's and the procedures needed to put the theory into practice
