**Personal Value** Toni Rønnow-Rasmussen,2011-06-23 Certain things like justice have impersonal value Other things like your parents carry personal values they have value for you Besides whatever value they have they are valuable to you The philosophical literature as well as non philosophical literature is inundated with suggestions about the kinds of thing that are good for us or if it is a negative personal value what is bad for us This is a stimulating and vivid area of philosophical research but it has tended to monopolize the notion of good for linking it necessarily to welfare or well being Since these more or less well grounded pieces of advice are seldom accompanied by an analysis of the notion of good for there is a need for such an analysis R nnow Rasmussen remedies this need by offering a novel way of analyzing the notion of personal value He defends the idea that we have reason to expand our classical value taxonomy with these personal values By fine tuning a pattern of value analysis which has roots in the writings of the Austrian philosopher Franz Brentano this sort of analysis will come to cover personal values too In addition R nnow Rasmussen makes substantial contributions to a number of issues including hedonism vs preferentialism subjectivism vs objectivism value bearer monism vs value bearer pluralism and the wrong kind of reason problem all of which are much debated among today's value theorists **PERSONAL VALUES,**

decades much empirical research has been devoted to the study of values in relation to work Many studies have treated work related values as expressions of more general life values and interpreted the differences between groups and cultures in terms of broader cultural patterns historical trends and adaptation to changing economic and technical environments Work values have also been investigated at the level of occupations and the individual In this case they have been related to interests and other motivational notions and used to explain differences in people's occupational behavior in particular vocational choice A general assumption underlying most of the research and theorizing on values has been that shared values as expressed at the collective level on the one side and individual values as operating in daily occupational behavior on the other side are

somehow interrelated although their causal relationships are still to be uncovered This special issue deals with the theory and research on the relationship between peoples values and work behavior It presents a review of the sociological and psychological research literature on values and work shows some typical findings from large scale research projects and identifies some major theoretical and practical issues More importantly an explicit effort is made to interlink the different approaches by offering an integrative multilevel framework model The contributions to this special issue written by leading researchers in the field underline the continuing importance of values for understanding what happens in the world of work
