Personalist Economics Moral Convictions Economic Realities And Social Action:

Personalist Economics Edward J. O'Boyle,1998-03-31 **Personalist Economics Moral Convictions Economic Realities and Social Action** examines the nature of the worker and consumer from a personalist perspective comparing that body of knowledge to what is received from conventional economics A running theme throughout this book is that personalist economics is attentive to both aspects of human material need physical need and the need for work as such in a way that does not disregard human wants Accordingly this book is more concerned about the philosophical base and description of the economy s significant characteristics than social economic policy **Personalist Economics** explores four dimensions of particularly acute human physical need unemployment poverty homelessness and death In addressing these four aspects of need the book delves into the second and third domains of social economics description of the significant characteristics of the economy and social economic policy In the same way **Personalist Economics** explores two types of economic cooperation supra firm alliances and inter firm partnerships as means for addressing certain aspects of human material need This book concludes with a lengthy discussion of the challenges facing personalist economics in the years ahead **Personalist Economics**

Edward J. O'Boyle,2013-03-14 **Personalist Economics Moral Convictions Economic Realities and Social Action** examines the nature of the worker and consumer from a personalist perspective comparing that body of knowledge to what is received from conventional economics A running theme throughout this book is that personalist economics is attentive to both aspects of human material need physical need and the need for work as such in a way that does not disregard human wants Accordingly this book is more concerned about the philosophical base and description of the economy s significant characteristics than social economic policy **Personalist Economics** explores four dimensions of particularly acute human physical need unemployment poverty homelessness and death In addressing these four aspects of need the book delves into the second and third domains of social economics description of the significant characteristics of the economy and social economic policy In the same way **Personalist Economics** explores two types of economic cooperation supra firm alliances and inter firm partnerships as means for addressing certain aspects of human material need This book concludes with a lengthy discussion of the challenges facing personalist economics in the years ahead **Moral Discourse in the History of Economic Thought**

Laurent Dobuzinskis,2022-06-23 Providing an account of the development of economic thought this book explores the extent to which economic ideas are rooted in moral values Adopting an approach rooted in pragmatism the work explores key questions which have been considered by economists since the classical political economists These include what degree of priority ought to be granted to property rights among all individual liberties whether uncertainties in economic life justify investing political authorities with the power to stabilize business cycles whether it is better to trust entrepreneurial initiatives to resolve societal dilemmas or to centralize policy making in the hands of a benevolent government The chapters argue that economic thought has evolved from an emphasis on sympathy as defined by Adam Smith

and that there has more recently been a rediscovery of the significance of sympathy reinvented as fair reciprocity in the wake of the emergence of behavioural economics and its connection to evolutionary psychology This key book is of great interest to readers in the history of ideas political and moral philosophy and political economy **Work Out Your Salvation** D. Glenn Butner Jr.,2024-04-09 In *Work Out Your Salvation* D Glenn Butner Jr demonstrates that participation in markets forms our moral character perceptions actions and ideas Drawing on experimental economics and moral theology he argues that the nature of such formation varies based on the design of the market and our interactions within it How he asks does formation of the market relate to the formation of grace providence justification and sanctification Are these forces at war for our souls Through a detailed analysis of these three doctrines and the theology of common grace and concurrent divine human action *Work Out Your Salvation* argues that God can work through the social context of markets through human identity and through economic incentive structures to foster providentially the created basis for the supernatural gifts of justification and sanctification Careful and theologically guided participation in a market can by common grace provide the occasion for positive spiritual formation through concurrent divine action However such formation is not guaranteed Maladaptive practices ideas and identities can also be fostered by markets not oriented toward a supernatural end Butner provides detailed evidence backed by extensive experimental and empirical research as to which market practices allow Christians to work out their salvation Phil 2 12 and which practices resist such moral transformation *Work Out Your Salvation* undermines simplistic endorsements or rejections of capitalism in favor of more nuanced analysis and lays bare which features of markets make us better and which make us worse **Handbook of Alternative Theories of Political Economy** Stilwell, Frank,Primrose, David,Thornton, Tim B.,2022-05-13 This Research Handbook advances entrepreneurship theory in new ways by integrating and contributing to contemporary theories of practice Leading theorists and entrepreneurship experts who are part of the growing Entrepreneurship as Practice EaP research community expertly propose methodologies theories and empirical insights into the constitution and consequences of entrepreneuring practices **The Theory of the Individual in Economics** John B Davis,2003-03-20 The concept of the individual and his her motivations is a bedrock of philosophy Economics though is guilty of taking this hugely important concept without questioning how we theorise it This superb book remedies this oversight **Ethics and the Market** Betsy Jane Clary,Wilfred Dolfsma,Deborah M. Figart,2006-09-27 Comprising cutting edge work on the state of social economics today this theoretically diverse book includes strong emphasis on the role of ethics morality identity and society in economic theorizing Much existing economic theory overlooks ethics Rather than situating the market and values at separate extremes of a continuum *Ethics and the Market* contends that the two are necessarily and intimately related This volume brings together some of the best work in the social economics tradition with strong contributions and pedagogy and a cross national blend of economics philosophy and policy The contributors embed the economic within the social rather than viewing the economy and society as separable spheres of life

activity and in so doing three key themes are illuminated corresponding to the volume's tripartite structure: Morality and Markets, Redefining the Boundaries of Economics, Social Economics in Transition, Ethics and the Market. It illuminates the diverse and dynamic theoretical approaches that are employed in social economics reflecting on their continuously evolving relationship with neoclassical economics. Taking an innovative approach, this integrative book challenges traditional ways of thinking and will prove vital reading for students and academics in the fields of Economics, Sociology, Gender Studies, and Public Policy.

Global Political Economy and the Wealth of Nations Phillip Anthony O'Hara, 2004. Documents the major processes, performance, institutions, problems, and policies associated with global political economy. This book presents an analysis of the changing distribution and production of wealth throughout the world, the global technological revolution, and a special study of Asia and Eastern Europe in the world system.

Law and Economics Margaret Oppenheimer, Nicholas Mercuro, 2015-06-01. The economic analysis of legal and regulatory issues need not be limited to the neoclassical economic approach. The expert contributors to this work employ a variety of heterodox legal economic theories to address a broad range of legal issues. They demonstrate how these various approaches can lead to very different conclusions concerning the role of the law and legal intervention in a wide array of contexts. The schools of thought and methodologies represented here include institutional economics, new institutional economics, socio economics, social economics, behavioral economics, game theory, feminist economics, Rawlsian economics, radical economics, Austrian economics, and personalist economics. The legal and regulatory issues examined include anti-trust and competition, corporate governance, the environment, and natural resources, land use and property rights, unions and collective bargaining, welfare, benefits, work time, regulation and standards, sexual harassment in the workplace, obligations of employers and employees to each other, crime, torts, and even the structure of government. Each contributor brings a different emphasis and provides thoughtful, sometimes provocative analysis and conclusions. Together, these heterodox insights will provide valuable supplementary reading for courses in law and economics as well as public policy and business courses at both the graduate and undergraduate levels.

Modern Catholic Social Documents and Political Economy Albino F. Barrera, 2001-08-09. As western economies have moved from feudalism to industrialism to the information age, Catholic social thought has kept pace, responding to the economic realities of the day. Linking Catholic social teaching with modern economic theory, Albino F. Barrera examines the changing political economy embedded within the moral theology and social justice documents issued by the Church during the last hundred years. Barrera discusses the evolution of Catholic social teachings from scholastic thinking on the concept of the just price to a modern emphasis on the importance of a living wage. As the conduct of economic life according to traditional custom and common law has given way to institutional and impersonal market forces, these teachings have moved from a preoccupation with personal moral behavior to an intense scrutiny of the structures of society. Amidst these changes, the Church's social documents have sought to address systemic shortcomings as a means of promoting the common good through economic

justice Barrera also looks ahead to the challenges posed by a postindustrial society characterized by a global knowledge based economy arguing that Catholic social thought will likely shift its focus from advocacy of the living wage to demands for greater equality of socioeconomic participation Written for scholars and students of economics theology and political science interested in religious social thought this book bridges the gap between moral theology and economic theory **Global Instability** S. McBride,L. Dobuzinskis,Marjorie Griffin Cohen,J. Busumtwi-Sam,2012-12-06 Global Instability Uncertainty and New Visions in Political Economy presents a series of papers that address the political consequences of globalization for states and their populations while exploring the issue of alternatives to the model of globalization we are presently experiencing The focus moves from the world of international agreements to the national and sub national dilemmas that are posed by attempting to manage a set of global developments within a given territory The initial chapter by Daniel Drache explores a still born post war international organization the International Trade Organization that offers a different vision of how a globally integrated economy might operate A number of papers then explore the challenges posed by today s globalization including currency instability in an environment of financial deregulation the rights conferred on investors by the North American Free Trade Agreement and the progressive liberalization of trade in services built into the General Agreement on Trade in Services **Christian Ethics and Corporate Culture** Bartholomew Okonkwo,2013-08-13 The essays collected in this book discuss the contemporary practice of corporate responsibility by applying the Christian principles of the unity of knowledge and pursuit of truth to the traditional principles of justice human dignity and the common good to rediscover a corporate culture that will help transform our economic system and the characteristics required to build an enduring trust in economic relationships In this volume a select group of management theorists theologians legal scholars economists and ethicists jointly strive to give back to the market economy its ethical and political dimensions They assess the quality of present day corporate social responsibility discuss the social and environmental costs of production and argue for an agenda that can be used in modern corporations in their effort to align profitability and growth with business ethics **The Fear of Beggars** Kelly S. Johnson,2007-05-29 Why asks Kelly Johnson does Christian ethics so rarely tackle the real life question of whether to give to beggars Examining both classical economics and Christian stewardship ethics as reactions to medieval debates about the role of mendicants in the church and in wider society Johnson reveals modern anxiety about dependence and humility as well as the importance of Christian attempts to rethink property relations in ways that integrate those qualities She studies the rhetoric and thought of Christian thinkers beggar saints and economists from throughout history placing greatest emphasis on the life and work of Peter Maurin a cofounder of the Catholic Worker movement Challenging and thought provoking The Fear of Beggars will move Christian economic ethics into a richer more involved discussion **Economic Growth and Inequality** Laurent Dobuzinskis,2023-02-15 In an era of increasing inequalities and also of deep anxieties about the consequences of two major economic crises economists are faced

with a major question can economic growth be achieved without inequalities Economic Growth and Inequality critically evaluates the economic literature on this question from a pragmatic perspective seeking to reconcile those who regard economic liberties as a paramount value and critics who object that prioritizing these liberties leads to inequitable outcomes The book presents an overview of the models used by economists to define and measure inequalities and the ongoing dialogues between political philosophers and economists in an effort to find solutions to the problems It explores Rawlsian justice Sen s capability theory and the theory of rent and compares and contrasts the most often discussed institutions and policies designed for remedying poverty and reducing inequalities This book marks a significant contribution to the literature on some of the most pressing problems of our time and will be of great interest to readers of political economy public policy moral philosophy and history of economic and political thought

Vote of Faith Maya Mayblin, 2024-12-03

A richly cinematic and compelling look at priest politicians in Brazil and their religious and secular entanglements What does desire have to reveal about the nature of power Through a detailed focus on the lives and loves of Catholic priests as they enter the profane world of party politics Maya Mayblin explores the complex intersection of democracy patriarchy and religiosity in Brazil For over a hundred years Catholic priests have been running for government office challenging Brazil s constitutional separation of church and state and its self image as a modern secular nation Priests find themselves walking a tightrope between religious and secular demands in one of Brazil s poorest regions Vote of Faith is a beautifully crafted ethnography based upon decades of fieldwork that tells the story of the ambiguous and frequently transgressive relationship between Catholicism and state governance a relationship ultimately mediated by kinship gender and sexuality For the protagonists of Vote of Faith democracy becomes a sphere in which divine will and human ambition compete with one another a tension embedded in the vernacular concept of faith In the Brazilian context faith signifies a complex set of assumptions about the nature of the world assumptions derived not just from Christianity but also from Afro Brazilian and secular ideas about power causation and human agency In combining ethnographic theological and feminist perspectives Vote of Faith places desiring bodies at the very heart of Catholicism s complex connection to multiple forms of power and offers provocative new angles on the question of the secular The first work by an anthropologist to explore the unique phenomenon of the mayor priest this book offers an essential new angle on emerging debates about secularity as the condition of separation of the religious from the political Brimming with originality Vote of Faith is required reading for those interested in the gendered and sexual dimensions of the secular the plasticity of religion and the fundamental nature of the world s largest religious institution

The Economic Person Peter L. Danner, 2002 This book emphasizes that analysis of broad economic changes treats people abstractly while a personalist view sees them as human agents who while needing and generating economic goods must still be responsive to others and be aware of values and goals beyond temporal well being Visit our website for sample chapters The Journal of Markets & Morality , 2003 Human Goods, Economic Evils Edward Hadas, 2007 Much of

modern economic theory is based on a rather unflattering view of human nature one that is essentially selfish and materialistic Not surprisingly this incomplete version of human anthropology makes for some rather incomplete economic theory argues Edward Hadas in Human Goods Economic Evils Instead of simply being utility maximizers Hadas argues human beings also seek to maximize morality in their everyday economic lives For Hadas economic man is moral man who always strives for the good according to his nature While the weakness of human nature ensures that the good is never fully achieved economic activity is nevertheless best understood as part of the great moral enterprise of humanity Human Goods Economic Evils does not claim that the basic economic activities of laboring and consuming are the most important things in life but they are literally vital and as such deserve to be studied and understood through a more morally sympathetic view of human nature With this in mind Human Goods Economic Evils provides both lay readers and policymakers the intellectual tools necessary to judge what is right and what is wrong about the modern economy and returns the study of economics to its proper more humanistic sphere
