Ickes, E.S. Knowles, 2012-12-06 Personality and Roles Sources of Regularities in Social Behavior For behavioral scientists whether they identify primarily with the science of psychology or with that of sociology there may be no challenge greater than that of discovering regularities and consistencies in social behavior After all it is such regularities and consistencies that lend predictability to the behavior of individuals in social contexts in particular to those events that constitute dyadic interactions and group processes In the search for behavioral consistencies two theoretical constructs have emerged as guiding principles personality and roles The theoretical construct of personality seeks to understand regularities and consistencies in social behavior in terms of relatively stable traits enduring dispositions and other propensities for example needs motives and attitudes that are thought to reside within individuals Because it focuses primarily on the features of individuals the

construct of personality is fundamentally psychological in nature By contrast the theoretical construct of roles seeks to understand regularities and consistencies in social behavior in terms of the directive influence of coherent sets of rules and prescriptions that are provided by the interpersonal occupational and societal categories of which individuals are continuing members Because it focuses primarily on features of social structures the construct of roles is fundamentally sociological in nature **Small group research** SAGE periodicals Press, **Social Psychology Quarterly** ,1979 Includes theoretical and empirical papers on topics in social psychology including sociometry Publishes works by both sociologists and psychologists
