Dutton,2014-05-29 How is society being shaped by the diffusion and increasing centrality of the Internet in everyday life and work By bringing together leading research that addresses some of the most significant cultural economic and political roles of the Internet this volume introduces students to a core set of readings that address this question in specific social and institutional contexts Internet Studies is a burgeoning new field which has been central to the Oxford Internet Institute OII an innovative multi disciplinary department at the University of Oxford Society and the Internet builds on the OII s evolving series of lectures on society and the Internet The series has been edited to create a reader to supplement upper division undergraduate and graduate courses that seek to introduce students to scholarship focused on the implications of the Internet for networked societies around the world The chapters of the reader are rooted in a variety of disciplines but all directly tackle the powerful ways in which the Internet is linked to political social cultural and economic transformations in society This book will be a starting point for anyone with a serious interest in the factors shaping the Internet and its impact on society The book begins with an introduction by the editors which provides a brief history of the Internet and Web and its study from multi disciplinary perspectives The chapters are grouped into six focused sections The Internet and Everyday Life Information and Culture on the Line Networked Politics and Government Networked Businesses Industries and Economies and Technological and Regulatory Histories and Futures **An Internet for the People** Jessa Lingel,2022-06-14 How craigslist champions openness democracy and other vanishing principles of the early web Begun by Craig Newmark as an e mail to some friends about cool events happening around San Francisco craigslist is now the leading classifieds service on the planet It is also a throwback to the early internet The website has barely seen an upgrade since it launched in 1996 There are no banner ads The company doesn t profit off your data An Internet for the People explores how people use craigslist to buy and sell find work and find love and reveals why craigslist is becoming a lonely outpost in an increasingly corporatized web Drawing on interviews with

craigslist insiders and ordinary users Jessa Lingel looks at the site's history and values showing how it has mostly stayed the same while the web around it has become more commercial and far less open She examines craigslist's legal history describing the company's courtroom battles over issues of freedom of expression and data privacy and explains the importance of locality in the social relationships fostered by the site More than an online garage sale job board or dating site craigslist holds vital lessons for the rest of the web It is a website that values user privacy over profits ease of use over slick design and an ethos of the early web that might just hold the key to a more open transparent and democratic internet
