Watson, 2023-03-01 With the dawn of research into leader behaviors scholars differentiated between being task oriented which is important and also being people oriented People matter And we tend to guard against leader attitudes that treat persons as objects as passive or inert as instruments as so much clay to be shaped and molded Hannah Arendt 1958 rejected the idea that leadership is like work in which a craftsman picks up the raw materials and the requisite tools in order to create a product according to an image in his head No she said leadership is social action in which we all participate each with his or her unique and creative spontaneity collaborating in an erratic cascade toward the future Leadership is something people do together And to achieve that vision we must acknowledge each other as persons and not as figures in a ledger or pieces on a chessboard This volume is intended as a call to be curious about what we take for granted as individuals educators and leaders In essence to ask ourselves the more difficult questions about who we are as we recognize our need for others within a community What does it mean to be a person and to recognize another's personhood Nathan Harter 2021 draws us into a space to dialogue with ourselves about the notion of personhood as leaders So what does it mean to be a person And what does it mean to treat someone as a person What does anyone owe another person p 4 In what way then do leaders contend with such questions as they are becoming becoming better leaders becoming better individuals becoming their sacred selves A person centered ethic would be universal in scope yet adapted to local conditions that many leaders must deal with on a daily basis Nearly every religion already addresses both what it means to become a person and what one owes a person ethically regardless of race ethnicity nationality or other affiliation Regardless if organizations deal directly with the notion of personhood leaders deal with the workplace challenges of which the human bring him or her entire self to the unit Hence a comprehensive and integrate context forces us to revisit our assumptions about who exactly is a person and what they might deserve This volume would bring those voices into conversation In addition we intend to complicate the question by extending similar questions into emerging areas of increasing relevance in a technological age that crosses geographic boundaries such as online presences corporate entities and the prospects of Artificial Intelligence If anything an expanded interdisciplinary and global context makes this volume relevant and timely for leaders and leadership studies across multiple fields of study and professions *A Cop Doc's Guide to Public Safety Complex Trauma Syndrome* Daniel Rudofossi, Dale A

Lund,2017-07-05 Cop Doc s Guide to Public Safety Complex Trauma Syndrome is written in response to the need for an advanced specialized guide for clinicians to operationally define understand and responsibly treat complex post traumatic stress and grief syndromes in the context of the unique varieties of police personality styles The book continues where Rudofossi s first book Working with Traumatized Police Officer Patients left off Theory is wed to practice and practice to effective interventions with police officer patients The how and why of a clinician s approach is made highly effective by understanding the distinct personality styles of officer patients Rudofossi s theoretical approach segues into difficult examples that highlight each officer patient s eco ethological field experience of loss in trauma with a focus on enhancing resilience and motivation to otherwise left disenfranchised Thus this original work expands the ecological ethological existential analysis of complex PTSD into the context of personality styles with an emphasis on resilience without ignoring the pathological aspects of loss that often envelop officer patient trauma syndromes **How To Get a Life, Vol. 1:**

Morato (Jr.),2012-07-18 Self Mastery is the most elusive of all human quests A lifetime is never sufficient for most people Learning to be the best that you can ever become demands the full faculties of the brain the heart and the spirit This search for the ultimate self begins with learning to think using both rational analytical and critical mind and the associative creative systemic and integrative mind It then conjures that other way of knowing without knowing why you know This is learning to intuit Separate but equally powerful is the emotional mind the one that feels and empathizes Learning to feel brings the self to its sensitive sensual and stimulating dimension Next learning to do puts into action everything that one thinks intuitively and feels This is followed by the need to transmit and receive messages both trivial and important in learning to communicate Raising the level of the self to assume greater responsibility and accept personal accountability for other is learning to lead Finally there is full self actualization and total human development in learning to be At this height of personal excellence the five pillars of being and becoming conspire to transform the self towards transcendence These elevating pillars are wonderment a wider world view wisdom walking the way of the spirit and the will to live *Ann's Multiple World of*
