Persons Behavior And The World The Descriptive Psychology Approach:

Persons, Behavior, and the World Mary McDermott Shideler, 1988 This is the first comprehensive survey of Descriptive Psychology It provides a systematic account of the basic formulations and characteristic methodologies of this discipline which was developed by Peter G Ossorio of the University of Colorado at Boulder Dr Ossorio defines Descriptive Psychology as a set of systematically related concepts which is designed to provide formal access to all the facts and possible facts concerning persons and behavior and therefore everything else as well

Descriptive Psychology and the Person Concept Wynn Schwartz, 2019-05-21 Descriptive Psychology and the Person Concept maps the common ground of behavioral science The absence of a shared foundation has given us fragmentation a siloed state of psychological theory and practice And the science The integrity of choice accountability reason and intention are necessary commitments at the cornerstone of civilization and any person centered psychotherapy but when taught along with a scientific requirement for reductionism and determinism reside in contradictory intellectual universes Peter Ossorio developed the Person Concept to remedy these problems This book is an introduction to his work and the community of scientists scholars and practitioners of Descriptive Psychology Ossorio offered these maxims that capture the discipline's spirit 1 The world makes sense and so do people They make sense to begin with 2 It's one world Everything fits together Everything is related to everything else 3 Things are what they are and not something else instead 4 Don't count on the world being simpler than it has to be The Person Concept is a single coherent concept of interdependent component concepts Individual Persons Behavior as Intentional Action Language and Verbal Behavior Community and Culture and World and Reality Descriptive Psychology uses preempirical theory neutral formulations and methods to make explicit the implicit structure of the behavioral sciences The goal is a framework with a place for what is already known with room for what is yet to be found Provides a way to compare theories coordinate empirical findings and negotiate competent disagreement Offers guidance for effective case formulation and integration of therapies Explores the dilemmas of personhood and the complexities of human and nonhuman action investigating what is a person and how can we be sure Follows the implications of Hedonics Prudence Ethics and Aesthetics as intrinsic perspectives and reasons for action Applies these concepts to personality and social dynamics consciousness relationship change emotional behavior deliberation and judgment Provides a guide to establishing and restoring empathy especially when it's difficult

Personality Research, Methods, and Theory Patrick E. Shrout, Susan T. Fiske, 2014-04-04 Donald W Fiske's professional life and collaborations are themselves a textbook in the development of the field of personality From the field's early origins in personnel selection rating accuracy and psychotherapy outcomes to its current status of theoretical and methodological maturity complete with mid life crises the field has been fundamentally changed by Fiske's work and the changes have influenced generations of scholars This festschrift is a celebration of Fiske's impact but not merely of his impact on the history of personality research Instead the volume focuses on ongoing debates and issues that have been

framed or influenced by Fiske's work. The festschrift's three sections are organized around three themes in Fiske's writings: themes that also correspond to three periods in his career. This volume examines current thinking about what can be known about personality; how constructs relevant to personality psychology are best measured; and how to approach specific research problems in personality and related fields. The contributors create an eminent cross section of the development and current status of personality methods. In addition to Fiske's eminent contemporaries, the contributors to this volume include Fiske's former students, collaborators, and his two children, both of whom are behavioral scientists. The accomplishments of his students, colleagues, and children testify to the range of psychologists who have benefited from his scholarly and practical wisdom. This collection is a valuable textbook for an advanced graduate course as well as appealing as a scholarly resource. Many of the contributors are renowned psychological leaders who have made available their latest original thoughts. The book concludes with an essay by Fiske offering his perspective on the central themes: behavioral and social science, metatheory, methods, and strategies.

Bullying, 2004-06-11 In recent years there have been an increasing number of incidents where children have either perpetrated or been the victims of violence in the schools. Often times the children who perpetrated the violence had been the victims of school bullying. If bullying once was a matter of extorting lunch money from one's peers, it has since escalated into slander, sexual harassment, and violence. And the victims, unable to find relief, become depressed and/or violent in return. Despite all the media attention on recent school tragedies, many of which can be traced to bullied children, there has been little in the way of research-based books toward understanding why and how bullying occurs, the effects on all the individuals involved, and the most effective intervention techniques. Summarizing research in education, social, developmental, and counseling psychology, *Bullying: Implications for the Classroom* examines the personality and background of both those who become bullies and those most likely to become their victims; how families, peers, and schools influence bullying behavior; and the most effective interventions in pre-school, primary, and middle schools. Intended for researchers, educators, and professionals in related fields, this book provides an international review of research on bullying.

KEY FEATURES

- Presents practical ideas regarding prevention/intervention of bullying
- Covers theoretical views of bullying
- Provides an international perspective on bullying
- Discusses bullying similarities and differences in elementary and middle school
- Presents practical ideas regarding prevention/intervention of bullying
- Provides an international perspective on bullying
- Outlines information regarding bullying during the elementary and middle school years
- Covers theoretical views of bullying
- Presents new approaches to explaining bullying

Contributing authors include internationally known researchers in the field.

Soulcraft Bill Plotkin, 2010-10-05 Since 1980, depth psychologist Bill Plotkin has been guiding women and men into the wilderness, the redrock canyons, and snow-capped mountains of the American West, but also into the wilds of the soul. He calls this work

soulcraft There s a great longing in all people to uncover the secrets and mysteries of our individual lives to find the unique gift we were born to bring to our communities and to experience our full membership in the more than human world This journey to soul is a descent into layers of the self much deeper than personality a journey meant for each one of us not just for the heroes and heroines of mythology A modern handbook for the journey Soulcraft is not an imitation of indigenous ways but a contemporary nature based approach born from wilderness experience the traditions of Western culture and the cross cultural heritage of all humanity Filled with stories poems and guidelines Soulcraft introduces over 40 practices that facilitate the descent to soul including dreamwork wilderness vision fasts talking across the species boundaries council self designed ceremony nature based shadow work and the arts of romance being lost and storytelling **The Social**

Construction of the Person K.J. Gergen,K.E. Davis,2012-12-06 This volume grew out of a discussion between the editors at the Society for Experimental Social Psychology meeting in Nashville in 1981 For many years the Society has played a leading role in encouraging rigorous and sophisticated research Yet our discussion that day was occupied with what seemed a major problem with this finely honed tradition namely it was preoccupied with accurate renderings of reality while generally insensitive to the process by which such renderings are achieved This tradition presumed that there were brute facts to be discovered about human interaction with little consideration of the social processes through which factuality is established To what degree are accounts of persons constrained by the social process of rendering as opposed to the features of those under scrutiny This concern with the social process by which persons are constructed was hardly ours alone In fact within recent years such concerns have been voiced with steadily increasing clarity across a variety of disciplines Ethno methodologists were among the first in the social sciences to puncture the taken for granted realities of life Many sociologists of science have also turned their attention to the way social organizations of scientists create the facts necessary to sustain these organizations Historians of science have entered a similar enterprise in elucidating the social economic and ideological conditions enabling certain formulations to flourish in the sciences while others are suppressed Many social anthropologists have also been intrigued by cross cultural variations in the concept of the human being *Advances in Descriptive Psychology* Descriptive Psychology Press,2006 *Encyclopedia of Trauma* Charles R. Figley,2012-06-19 Trauma is defined as a sudden potentially deadly experience often leaving lasting troubling memories Traumatology the study of trauma its effects and methods to modify effects is exploding in terms of published works and expanding in terms of scope Originally a narrow specialty within emergency medicine the field now extends to trauma psychology military psychiatry and behavioral health post traumatic stress and stress disorders trauma social work disaster mental health and most recently the subfield of history and trauma with sociohistorical examination of long term effects and meanings of major traumas experienced by whole communities and nations both natural Pompeii Hurricane Katrina and man made the Holocaust 9 11 One reason for this expansion involves important scientific breakthroughs in detecting the neurobiology of trauma that is

connecting biology with human behavior which in turn is applicable to all fields involving human thought and response including but not limited to psychiatry medicine and the health sciences the social and behavioral sciences the humanities and law Researchers within these fields and more can contribute to a universal understanding of immediate and long term consequences both good and bad of trauma both for individuals and for broader communities and institutions Trauma encyclopedias published to date all center around psychological trauma and its emotional effects on the individual as a disabling or mental disorder requiring mental health services This element is vital and has benefited from scientific and professional breakthroughs in theory research and applications Our encyclopedia certainly will cover this central element but our expanded conceptualization will include the other disciplines and will move beyond the individual **A New Synthesis**

for Solving the Problem of Psychology Gregg Henriques, 2022-12-10 In this incisive analysis of academic psychology Gregg Henriques examines the fragmented nature of the discipline and explains why the field has had enormous difficulty specifying its subject matter and how this has limited its ability to advance our knowledge of the human condition He traces the origins of the problem of psychology to a deep and profound gap in our knowledge systems that emerged in the context of the scientific Enlightenment To address this problem this book introduces a new vision for scientific psychology called mental behaviorism The approach is anchored to a comprehensive metapsychological framework that integrates insights from physics and cosmic evolution neuroscience the cognitive and behavioral sciences developmental and complex adaptive systems theory attachment theory phenomenology and social constructionist perspectives and is well grounded in the philosophy of science Building on more than twenty years of work in theoretical psychology and drawing on a wide range of literature Professor Henriques shows how this new approach to scientific knowledge fills in the gaps of our current understanding of psychology and can allow us to develop a more holistic and sophisticated way to understand animal and human mental behavioral patterns This work will especially appeal to students and scholars of general psychology and theoretical psychology as well as to historians and philosophers of science **Handbook of Psychology, Developmental**

Psychology Richard M. Lerner, M. Ann Easterbrooks, Jayanthi Mistry, 2003-03-04 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications an future course of major unresolved issues in the area *Understanding Human Conduct* Sam S. Rakover, 2021-10-06 *Understanding Human Conduct* The Innate and Acquired Meaning of Life presents a new and provocative model of life meaning The Consciousness Meaning CM model is founded on two major assumptions a consciousness is a necessary condition for meaning and understanding and b there are two types of life meaning innate and acquired The latter is divided into ordinary and extreme meanings The CM model successfully deals with human behavior e g crisis of life and suicide as well as alternative approaches based on philosophy e g existentialism and science e g evolution **Methods in Psychological Research** Bryan J. Rooney, Annabel Ness Evans, 2018-08-01 *Methods in Psychological Research* introduces students to the

rich world of research in psychology through student friendly writing compelling real world examples and frequent opportunities for practice Using a relaxed yet supportive tone that eases student anxiety the authors present a mixture of conceptual and practical discussions and spark reader interest in research by covering meaningful topics that resonate with today's students In text features like Conceptual Exercises FYI sections and FAQ sections with accompanying visual cues support learning throughout the research experience The Fourth Edition equips students with the tools they need to understand research concepts conduct their own experiments and present their findings

Psychology James S. Nairne, Dawn M. McBride, 2022 With their extensive knowledge and expertise in human memory and cognition James S. Nairne and new co author Dawn M. McBride have fully revised the best selling Psychology Seventh Edition presenting a broad survey of the field through a unique problem solving framework By first considering the purpose of concepts and processes students are prepared to understand the context of when why and how psychological phenomena occur in real life This structure helps students appreciate why psychological concepts are important by stressing the function and purpose of those concepts in everyday life Empirically based pedagogy is presented throughout the text including concept reviews self tests critical thinking activities and active chapter summaries each promotes active learning and deeper thinking Key topics are also reinforced through retrieval practice a process supported by memory research The Seventh Edition includes updated research on key topics in cognition neuroscience social psychology and research methodology as well as a brand new feature that teaches students how to become critical consumers of research

Encyclopedia of Educational Leadership and Administration Fenwick W. English, 2006-02-16 The SAGE Encyclopedia of Educational Leadership and Administration presents the most recent theories research terms concepts ideas and histories on educational leadership and school administration as taught in preparation programs and practiced in schools and colleges today With more than 600 entries written by more than 200 professors graduate students practitioners and association officials the two volumes of this encyclopedia represent the most comprehensive knowledge base of educational leadership and school administration that has as yet been compiled

Being Scioto Hopewell: Ritual Drama and Personhood in Cross-Cultural Perspective Christopher Carr, 2022-01-05 This book in two volumes breathes fresh air empirically methodologically and theoretically into understanding the rich ceremonial lives the philosophical religious knowledge and the impressive material feats and labor organization that distinguish Hopewell Indians of central Ohio and neighboring regions during the first centuries CE The first volume defines cross culturally for the first time the ritual drama as a genre of social performance It reconstructs and compares parts of 14 such dramas that Hopewellian and other Woodland period peoples performed in their ceremonial centers to help the soul like essences of their deceased make the journey to an afterlife The second volume builds and critiques ten formal cross cultural models of personhood and the self and infers the nature of Scioto Hopewell people's ontology Two facets of their ontology are found to have been instrumental in their creating the intercommunity alliances and

cooperation and gathering the labor required to construct their huge multicomunity ceremonial centers a relational collective concept of the self defined by the ethical quality of the relationships one has with other beings and a concept of multiple soul like essences that compose a human being and can be harnessed strategically to create familial like ethical bonds of cooperation among individuals and communities The archaeological reconstructions of Hopewellian ritual dramas and concepts of personhood and the self and of Hopewell people s strategic uses of these are informed by three large surveys of historic Woodland and Plains Indians narratives ideas and rites about journeys to afterlives the creatures who inhabit the cosmos and the nature and functions of soul like essences coupled with rich contextual archaeological and bioarchaeological taphonomic analyses The bioarchaeological taphonomic method of l anthropologie de terrain new to North American archaeology is introduced and applied In all the research in this book vitalizes a vision of an anthropology committed to native logic and motivation and skeptical of the imposition of Western world views and categories onto native peoples
