

Perspectives in Sociology

- ***Structural functionalism paradigm:*** society as a complex system whose parts work together to promote solidarity and stability (education, jobs, marriage, family vs. crime)
- ***Symbolic interaction paradigm:*** society is the product of everyday interaction of individuals—how you perceive events & the symbolic meaning, reality is what you think it is (changes in situational behavior)
- ***Social Conflict paradigm:*** (Karl Marx) idea that society has been shaped by conflict among groups & the distribution of resources—highlights inequality

B. Day, 1975-07-17 **The Cognitive Turn** Steve Fuller, Marc de Mey, T. Shinn, Steve Woolgar, 2010-12-07 If nothing else the twelve papers assembled in this volume should lay to rest the idea that the interesting debates about the nature of science are still being conducted by internalists vs externalists rationalists vs arationalists n or even normative epistemologists vs empirical sociologists of knowledge Although these distinctions continue to haunt much of the theoretical discussion in philosophy and sociology of science our authors have managed to elude their strictures by finally getting beyond the post positivist preoccupation of defending a certain division of labor among the science studies disciplines But this is hardly to claim that our historians philosophers sociologists and psychologists have brought about an end of ideology or even an era of good feelings to their debates Rather they have drawn new lines of battle which center more squarely than ever on practical matters of evaluating and selecting methods for studying science To get a vivid sense of the new terrain that was staked out at the Yearbook conference let us start by meditating on a picture The front cover of a recent collection of sociological studies edited by one of us Woolgar 1988 bears a stylized picture of a series of lined up open books presented in a typical perspective fashion The global shape comes close to a trapezium and is composed of smaller trapeziums gradually decreasing in size and piled upon each other so as to suggest a line receding in depth The perspective is stylized too **Sociology, Science, and the End of Philosophy** Sal Restivo, 2017-07-06 This book offers a unique analysis of how ideas about science and technology in the public and scientific imaginations in particular about maths logic the gene the brain god and robots perpetuate the false reality that values and politics are separate from scientific knowledge and its applications These ideas are reinforced by cultural myths about free will and individualism Restivo makes a compelling case for a synchronistic approach in the study of these notoriously hard cases arguing that their significance reaches far beyond the realms of science and technology and that their sociological and political ramifications are of paramount importance in our global society This innovative work deals with perennial problems in the social sciences philosophy and the history of science and religion and

will be of special interest to professionals in these fields as well as scholars of science and technology studies

Sociological Perspectives, 1983 **Ways of Being Bound: Perspectives from post-Kantian Philosophy and Relational Sociology** Patricio A. Fernández, Alejandro Néstor García Martínez, José M. Torralba, 2022-11-01 This book addresses the topic of being bound from a philosophical and a sociological perspective It examines several ways in which we are bound We are bound to acknowledge the truth and to follow laws we are bound to others and to the world Who we are is partly defined by those bonds regardless of whether we live up to them or even of whether we acknowledge them Puzzling questions arise from the fact that we are bound such as How are those bonds binding Wherein lies their normative character A venerable philosophical tradition particularly since Kant has provided an account of normativity that crucially appeals to such notions as self legislation But can our normative bonds be properly understood in these essentially first personal terms Many argue that our social condition resists any account of those bonds that fails to acknowledge the perspectives of the second and the third person The first part of the book explores these themes from a historical perspective in the tradition of transcendental philosophy Kant Fichte Hegel Husserl and Heidegger it examines the phenomenon of being bound i e why and how we are bound The second part of the book offers a sociological analysis of social bonds that is both historical and systematic Based on sociological approaches to solidarity and reflexivity it explores the way in which the phenomenon of being bound manifests through the concept of a social relation *Sociological Perspectives on Modern Accountancy* Robin Roslender, 2002-11-01 First Published in 2004 The subject of this text is modern accountancy which is to be considered from a sociological perspective The logical starting point is to map out the chosen subject modern accountancy before saying something about the particular disciplinary perspective sociology from which it is to be viewed The volume is split into two parts the sociology of accountancy and Sociology for accounting 21st Century Sociology: A Reference Handbook Clifton D. Bryant, Dennis L. Peck, 2006-11-17 21st Century Sociology A Reference Handbook provides a concise forum through which the vast array of knowledge accumulated particularly during the past three decades can be organized into a single definitive resource The two volumes of this Reference Handbook focus on the corpus of knowledge garnered in traditional areas of sociological inquiry as well as document the general orientation of the newer and currently emerging areas of sociological inquiry **Knowledge Communities in Europe** Bertold Schweitzer, Thomas Sukopp, 2018-01-10 The publication presents research results on a multitude of knowledge exchange processes in post enlightenment Europe These focus on the question in how far deeply rooted processes of knowledge exchange by transnational intellectual discourses and international expert communities have contributed to a variety of networks of European intellectual identities and research practices These practices again constitute a fertile framework for de territorialised and de nationalised exchange of knowledge that might contribute to contagious processes of emancipation cooperation as well as problem solving
