African American Readings of Paul Lisa M. Bowens, 2020-10-13 The letters of Paul especially the verse in Ephesians directing slaves to obey their masters played an enormous role in promoting slavery and justifying it as a Christian practice Yet despite this reality African Americans throughout history still utilized Paul extensively in their own work to protest and resist oppression responding to his theology and teachings in numerous often starkly divergent and liberative ways In the first book of its kind Lisa Bowens takes a historical theological and biblical approach to explore interpretations of Paul within African American communities over the past few centuries She surveys a wealth of primary sources from the early 1700s to the mid twentieth century including sermons conversion stories slave petitions and autobiographies of ex slaves many of which introduce readers to previously unknown names in the history of New Testament interpretation Along with their hermeneutical value these texts also provide fresh documentation of Black religious life through wide swaths of American history African American Readings of Paul promises to change the landscape of Pauline studies and fill an important gap in the rising field of reception history

Edward Said's Translocations Tobias Döring, Mark Stein, 2012 In this contribution to contemporary political philosophy Jensen aims to develop a model of civil society for deliberative democracy In the course of developing the model he also provides a thorough account of the meaning and use of civil society in contemporary scholarship as well as a critical review of rival models including those found in the work of scholars such as John Rawls Jurgen Habermas Michael Walzer Benjamin Barber and Nancy Rosenblum Jensen's own ideal treats civil society as both the context in which citizens live out their comprehensive views of the good life as well as the context in which citizens learn to be good deliberative democrats According to his idealization groups of citizens in civil society are actively engaged in a grand conversation about the nature of the good life Their commitment to this conversation grounds dispositions of epistemic humility tolerance curiosity and moderation Moreover their regard for the grand conversation explains their interest in deliberative democracy and their regard for democratic virtues principles and practices Jensen is not a naive utopian however he argues that this ideal must be realized in stages that it faces a variety of barriers and that it cannot be realized without luck
