Rethinking MSM, Trans* and other Categories in HIV Prevention Amaya G. Perez-Brumer,Richard Parker,Peter Aggleton,2018-12-07 As the HIV epidemic moves into its fourth decade it is clear that the global response has failed to adequately address the needs of a wide range of vulnerable populations and groups Chief among these are gay bisexual and other men who have sex with men and transgender persons who globally face the disproportional burden of HIV infection This volume rethinks HIV prevention and health promotion for sexual and gender minorities in both the industrialised societies of the West as well as in the developing nations of the Global South The chapters it contains offer a critical analysis of past and present HIV research employing categories to designate gay and other men who have sex with men transgender persons and or other persons and communities with diverse gender and sexual identities Contributors question the politics of many of the existing classifications and categories in HIV research and argue for a more sophisticated analysis of gender and sexual diversity in order to tackle the social and political barriers that impede the design of successful HIV prevention and health promotion approaches This book was originally published as a special issue of *Global Public Health* **Family and HIV Today**

Robert Bor,1998-08-01 AIDS is not solely a medical issue but also has profound implications for social and family relationships Traditionally when a person is ill the family is seen to provide emotional practical and social support Experience has shown however that AIDS disrupts this conventional pattern of support On the one hand AIDS like any other serious illness affects family members both from day to day and in the long term What distinguishes AIDS from so many other illnesses is the associated social stigma and the fact that HIV may be transmissible or may have been transmitted within a relationship Most psychological and social research has concentrated on the impact of AIDS on individuals Only recently has attention turned to the effect of AIDS on the family This is the first book to address AIDS in the family and draws on the work

of experienced researchers and practitioners from around the world It is most fitting that the book should first be published in 1994 the United Nations International Year of the Family Recognizing the role of the family may mark a change in emphasis in future social research and policy in relation to HIV and AIDS **Inflammation - Volume 1 - 2020** Dr. Jyotirmay Biswas, Dr. Chandrashekara.
