Harvey, 1972-12-15 Perspectives on Modernization is published in memory of Ian Weinberg a sociologist of brilliant promise who died at the age of thirty It consists of essays by his colleagues students and teachers which reflect upon and carry further Ian Weinberg's major scholarly concerns the processes of industrialization and modernization of societies The book begins with an essay by Ian Weinberg which was presented at the annual meeting of the American Sociological Association 1968 It is followed by a paper of wide scope and interest Wilbert E Moore's Normative Conflict in Stages of Cultural Change Noting that the study of rapid social change can no longer be confined to the so called modernizing countries Moore argues that comparable normative conflicts occur at comparable stages of cultural change Rainer C Baum and Charles Tilly are concerned with the serious gaps in the theory of modernization and politics Baum is specifically concerned with developing a political analogue to the theory of economic development Tilly concentrates on a longitudinal study of the relationship between modernization and collective political conflicts S D Clark writes of patterns of urban growth looking at two exceptions to the well studied outward movement of immigrants in Canadian cities Edward Shorter studies the modernization of sexual attitudes by analysing illegitimacy The last three papers approach modernization through economic changes and development H Nishio analyses the relationships between political control and economic development in Japan over two centuries Stanely R Barrett studies the transition of the economy in a Nigerian utopian community from communalism to partial private enterprise and L R Marsden E B Harvey and J Bulcock explore the relationship of literacy and economic development in thirty nine African countries The volume includes an introduction by the editor and an outline of Ian Weinberg's short but brilliant career These essays are like the work of the man they seek to honour wide ranging and intellectually provocative in their approach to a complex question The volume is a fitting tribute to both the man and the spirit of intellectual vitality to which he was committed

Contemporary Perspectives in Leisure Sam Elkington,Sean Gammon,2013-12-04 We are entering a new era of leisure Quality rather than quantity is now the focus of researchers policymakers and managers Technological change an ageing population and a harsh economic climate are changing the values and practices of leisure as well as the relationship between leisure society and the individual Contemporary Perspectives in Leisure uses a variety of disciplinary approaches to introduce the most important trends in contemporary leisure in the Twenty First Century With contributions from some of the leading international figures in modern leisure studies the book examines key philosophical and theoretical debates around leisure with reference to concepts such as happiness enjoyment and quality of life as well as the most interesting contemporary themes in leisure studies from youth leisure and dark leisure to technology and adventure Understanding changes in leisure helps us to better understand changes in wider society Contemporary Perspectives in Leisure is a perfect companion to any course in leisure studies and useful reading for any student or scholar working in sociology cultural studies recreation tourism sport or social psychology **The Financial Crisis in Constitutional Perspective** Poul F Kjaer,Gunther Teubner,Alberto Febbrajo,2011-07-27 This volume presents the first thorough sociologically informed legal analysis of the financial crisis which unfolded in 2008 It combines a multitude of theoretically informed analyses of the causes dynamics and

reactions to the crisis and contextualises these within the general structural transformations characterising contemporary society. It furthermore explores the constitutional implications of the crisis and suggests concrete changes to the constitutional set up of contemporary society. Although the question of individual responsibility is of crucial importance, the central idea animating the volume is that the crisis cannot be reduced to a mere failure of risk perception and management for which individual and collective actors within and outside of financial organisations are responsible. The 2008 crisis should rather be understood as a symptom of far deeper structural transformations. For example, contemporary society is characterised by massive accelerations in the speed with which societal processes are reproduced as well as radical expansions in the level of globalisation. These transformations have however been asymmetrical in nature insofar as the economic system has outpaced its legal and political counterparts. The future capability of legal and political systems to influence economic reproduction processes is therefore conditioned by equally radical transformations of their respective operational forms and self understanding. Potentially the 2008 crisis therefore has far reaching constitutional implications.

Readers will also see how social psychology plays a role in our criminal justice system, including in the context of the prison system, population in the cultural issues associated with Latino and Native American populations, in our social collective concern about mass shootings, epidemics and terrorism, and in the dynamics, processes and tactics of a nationwide presidential election campaign seeking to influence the masses.
