Perspectives on Drought and Famine in Nigeria G. Jan van Apeldoorn, 1981-01-01 1972 1974 crisis in northern Nigeria

Perspectives on Drought and Famine in Nigeria G. Jan Van Apeldoorn, 2024-07-05 Originally published in 1981 this book provided the first concise and integrated account of the Nigerian crisis and uncovered the basic cause of the increasing vulnerability of the Nigerian rural poor during the 1970s to the effects of drought in order to show the lessons of the crisis and how they could be translated into medium term action The author argued that an analysis of the causes and impact of the drought and famine disaster of the seventies could offer useful clues to the policy orientations necessary to avert a protracted food crisis in the region **Perspectives on Drought and Famine in Nigeria** F. J. van APELDOORN, 1981 African

Food Systems in Crisis: Microperspectives Rebecca Huss-Ashmore, Solomon H. Katz, 1989 First Published in 1989 Routledge is an imprint of Taylor Francis an informa company *African Food Systems in Crisis* Rebecca Huss-Ashmore, Solomon H Katz, 2019-07-19 Originally published in 1990 Produced by the Task Force on African Famine of the American Anthropological Association this is the first of a multi part project dealing with the long term and ongoing food crisis in Africa primarily at the level of local production the microperspective It offers a series of anthropological and ecological views on the cause of the current problem and on coping strategies used by both indigenous people and developmental planners The three sections of this volume review current explanations for food problems in Africa focusing mainly on production and consumption at the household level they offer a number of perspectives on the environmental historical political and economic contexts for food stress and include a series of case studies showing the ways in which Africans have responded to the threat of drought and hunger The extent of research and the degree of scholarship involved in the production of this volume recommend it to all persons concerned with this ultimately global dilemma particularly those involved in planning and relief efforts Famine that Kills Alex de Waal, 2005-01-13 In 2004 Darfur Sudan was described as the world s greatest

humanitarian crisis Twenty years previously Darfur was also the site of a disastrous famine *Famine that Kills* is a seminal account of that famine and a social history of the region In a new preface prepared for this revised edition Alex de Waal analyzes the roots of the current conflict in land disputes social disruption and impoverishment Despite vast changes in the nature of famines and in the capacity of response de Waal s original challenge to humanitarian theory and practice including a focus on the survival strategies of rural people has never been more relevant Documenting the resilience of the people who suffered it explains why many fewer died than had been predicted by outsiders It is also a pathbreaking study of the causes of famine deaths showing how outbreaks of infectious disease killed more people than starvation Now a classic in the field *Famine that Kills* provides critical background and lessons of past intervention for a region that finds itself in another moment of humanitarian tragedy *Perspectives on Environmental Conflict and International Relations* Jyrki Käkönen, 1992

The Political Economy of Hunger: Volume 2: Famine Prevention Jean Drèze, Amartya Sen, 1990 Part of a major report on

world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world The Political Economy of African Famine R. E. Downs, Donna O. Kerner, Stephen P. Reyna, 2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition **Displacement and the Politics of Violence in Nigeria** Paul Lovejoy, Tokunbo Williams, 2021-11-01 This volume examines the political stalemate that has engulfed Nigeria in the 1990s The annulment of the 1993 elections stopped the transition to civilian rule which had begun in 1987 In re establishing its rule the military relied increasingly on repressive measures As rival elites have struggled to control the economy the level of violence and general insecurity has increased Often contending forces are perceived in religious terms with the result that secular strife has become pronounced The military government has thereby been able to manipulate the complexities of religious class and ethnic factors for its own purposes with the result that increasing numbers of Nigerians have left the country **Preventing Famine** Donald Curtis, Michael Hubbard, Andrew Shepherd, 2008-03-07 Some urgent new thinking is needed if any lessons are to be learnt from the recent disasters This book brings together the experience of a number of writers who have worked on or studied poverty alleviation programmes in Asia and Africa **How the World Hunger Problem Was not Solved** Christian Gerlach, 2024-02-14 The world food crisis 1972 1975 gave rise to new development concepts To eradicate world hunger small peasants were supposed to use modern inputs like high yielding seeds fertilizer pesticides and irrigation This would turn subsistence producers into business owners transform rural areas invigorate national economies and the crisis stricken world economy and thus stabilize capitalism Together with an in depth account of the world food crisis this book analyses how this global scheme largely failed It shows its diverse initiators their reasoning and motives its political breakthrough the degrees to which it was implemented globally and nationally in the following decades and its socioeconomic effects in rural areas Despite internationally coordinated policies and coercive means the scheme failed on all levels situation analysis design policies incapable institutions including big business implementation and peasants responses Selective realization in certain regions and for certain crops and the appropriation of funds by local elites often aggravated inequality and hunger Case studies are about Bangladesh Indonesia Tanzania and Mali The book shows limits to global social engineering imperialism and state control It is aimed at students scholars activists and

non specialists interested in development and the world food problem The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Conservation in Africa David Anderson, Richard H. Grove, 1987 This book provides a new interdisciplinary look at the practice and policies of conservation in Africa Bringing together social scientists anthropologists and historians with biologists for the first time the book sheds some light on the previously neglected but critically important social aspects of conservation thinking To date conservation has been very much the domain of the biologist but the current ecological crisis in Africa and the failure of orthodox conservation policies demand a radical new appraisal of conventional practices This new approach to conservation the book argues cannot deal simply with the survival of species and habitats for the future of African wildlife is intimately tied to the future of African rural communities Conservation must form an integral part of future policies for human development The book emphasises this urgent need for a complementary rather than a competitive approach It covers a wide range of topics important to this new approach from wildlife management to soil conservation and from the Cape in the nineteenth century to Ethiopia in the 1980s It is essential reading for all those concerned about people and conservation in Africa

African Seminars Various Authors, 2021-02-25 Originally published between 1986 and 1989 the 8 volumes in this set reflect the research and debate surrounding many issues for the African economy society and culture and as such make a vital contribution to effective development both rural and urban They re issue key titles from the International African Library and the International African Seminars and address themes of direct relevance to contemporary Africa on topics as diverse as medicine migration housing pastoralism and marriage

Feeding African Cities Jane Guyer, 2018-08-06 Originally published in 1987 this book traces the broad outlines of urban food policy drawing attention to the limited knowledge of regional social history Urban food supply systems in Africa have developed very fast in the midst of societies in which food production was not in general oriented to feeding distant populations of specialist consumers Institutional and political links had to be forged between town and country if food supply was to be cheap and predictable This volume explores the political and material dynamics of urban food supply through 4 case studies Kano Yaound Dar es Salaam and Harare

Environmental Management in Practice: Vol 3 Paul Compton, Dimitri Devuyt, Luc Hens, Bhaskar Nath, 2013-01-11 Volume 3 Managing the Ecosystem focuses on those ecosystems in which human intervention has been or continues to be predominant specifically within cities and rural areas

Environmental Politics and Liberation in Contemporary Africa M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to

resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined **Sustainable**

Development in Nigeria's Dry Belt Nigerian Environmental Study/Action Team. Workshop, 1991 The Hadejia-Nguru Wetlands G. E. Hollis, William Mark Adams, 1993 **Morality and Economic Growth in Rural West Africa** Paul

Clough, 2014-06-01 The land labor credit and trading institutions of Marmara village in Hausaland northern Nigeria are detailed in this study through fieldwork conducted in two national economic cycles the petroleum boom prosperity in 1977 1979 and the macro economic decline in 1985 1996 and 1998 The book unveils a new paradigm of economic change in the West African savannah demonstrating how rural accumulation in a polygynous society actually limits the extent of inequality while at the same time promoting technical change A uniquely African non capitalist trajectory of accumulation subordinates the acquisition of capital to the expansion of polygynous families clientage networks and circles of trading friends The whole trajectory is driven by an indigenous ethics of personal responsibility This model disputes the validity of both Marxian theories of capitalist transformation in Africa and the New Institutional Economics
