Perspectives on Federalism Berkeley Seminar on Federalism Staff, **Perspectives on Federalism** Richard M. Abrams, 1987 *Perspectives on Federalism* Richard M. Abrams, 1987 Understanding Federalism and Federation Alain-G. Gagnon, Soeren Keil, 2016-03-09 Based on a variety of contemporary debates on federal theory Understanding Federalism and Federation honours Michael Burgess contribution to the study of these topics through a selection of approaches theories debates and interpretations Gathering contributors from diverse subfields to synthesize current debates it offers a snapshot of the immense range of current research on federalism and federation Leading authors debate key issues such as American federalism Canada and the role of Quebec the latest insights into comparative federalism and federation the European Union as a federal project and the analysis of constitutional courts in federal systems Different theoretical and empirical fields and perspectives are brought together synthesizing major findings and addressing emerging issues and these topics are analysed through multiple lenses to provide new insights original approaches and much needed theoretical and empirical data on federalism and federation *Charter Versus Federalism* Alan Cairns, 1992 In *Charter Versus Federalism* Alan Cairns provides an insightful analysis of the consequences for citizen and government alike of the changes undergone by the Canadian constitution especially since 1982 He also illuminates the difficulties of resolving the constitutional tensions between Quebec and The Rest of Canada **Executive Federalism** Ronald L. Watts, Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, 1989 *Handbook of Public Finance* Fred Thompson, Mark T. Green, 1998-02-04 Presenting emphases on and approaches to issues such as government spending reporting pricing and fiscal federalism the *Handbook of Public Finance* demonstrates the utility of integrating public finance theory with actual public policy practices It discusses applications in major subfields of public finance including public education environmental regulation energy policy social welfare programs and local and state politics Other topics of discussion include the theory and practice of tax incidence analysis the marginal costs of taxation and regulation the economics of expenditure incidence discounting and the social discount rate passive use benefits and public sector pricing Protecting Canadian Democracy Canadian Centre for Management Development, 2003 In recent years Canada's Senate Parliament's chamber of sober second thought has often been the subject of controversy and calls for reform *Protecting Canadian Democracy* examines the history role and evolution of the Senate places it in the context of other federal systems and contrasts its role with that of provincial governments Contributors analyse the Senate's use of its legislative powers comparing it with the House of Commons and assess the Senate's contribution to public policy development and review showing how the upper chamber functions as a forum within Parliament for the representation of Canada's diverse regional linguistic cultural and socio economic interests contending that the Senate should be improved by means that do not require formal amendments to the Constitution The authors identify possibilities for reform the institution within the current

constitutional framework addressing the Senate's veto power its appointment process and its legislative independence A valuable appendix of charts and statistics on the composition and operation of the Senate is also provided Comparative Federalism and Federation Michael Burgess, Alain Gagnon, 1993 This collection of essays addresses the meaning and relevance of the federal principle in the context of late 20th century political change The federal traditions of Christian democracy Protestantism Germany Switzerland Australia Canada and the United States are examined **Federalism and Political Community** Donald V. Smiley, 1989 **Listening To The Sea** Robert Jay Wilder, 2010-06-15 Environmental politics and policy while gaining a significant place in the nation's consciousness constantly comes up against the United States desire for more development more profit and a collective lack of foresight Nowhere is this more evident than in the crucial biodiversity of the world's oceans which are victim to pollution overharvesting habitat destruction and simplistic and fragmented environmental policies that do not speak to underlying problems Robert Wilder describes how management of the world's oceans and their ecosystems has long faced two principal obstacles The first is the seemingly infinite capacity of human apathy something that permits us to take the sea's comfort sustenance ecological services and integrity for granted The second is the myriad lines for rigid offshore jurisdiction That people believe the diversity of life on land should be protected is reflected in well publicized efforts to save the celebrated biodiversity of rainforests Far less is known however about protecting a larger two thirds of this planet the oceans Drawing on academic literature and practical experience Wilder illustrates the nature of the questions facing decision makers and provides intelligent well crafted solutions By describing how the emerging idea of precautionary action can help build second generation policy Wilder offers means to halt problematic overfishing He integrates political science with the goals of environmental protection revealing why agencies often fail in their mission to preserve the environment and offers fresh sensible new paths ahead Wilder shows how damage to marine ecosystems often stems from distant land based activities and details emerging ideas such as how industrial ecology can be a cost effective way to prevent pollution Through a rigorous integration of policy and science Wilder suggests a much improved second generation governance of the ocean and coasts and proposes new ideas for resolving the environmental policy stalemate found within the U S government **Market Rules** Douglas Brown, 2003 Federalism is about dividing and sharing government often in complex ways that involve some tasks being done jointly Are federal systems capable of effective joint policy making Is this possible in the fast moving context of globalization In *Market Rules* Douglas Brown examines these questions through a comparative study of Australia and Canada looking at recent major reforms to the economic union in the two federations and comparing them with the evolving European Union EU Brown argues that internal barriers to trade and competition in these countries were significant obstacles to competition in the global economy and shows that the old market rules were rooted in longstanding political and regional compromises He describes the process of detailed and difficult intergovernmental collaboration required for the EU and now Canada and Australia to produce new

market rules The resulting reforms created new regimes that provide deeper and broader national economic integration in Canada and Australia than in the EU The new rules entrench neo liberal values retaining some room for diversity and flexibility for equity goals Built on a careful analysis of the differences and similarities in political economy constitutional design federal culture and history of intergovernmental relations in Canada and Australia Market Rules provides fresh evidence that federal states can be strong and autonomous in the global society while underscoring the conditions for effective collaboration that make this sustainable Rich in detail broad in scope Market Rules makes a significant contribution to knowledge about federalism and economic policy making in the era of globalization
