Perspectives On Latin America Latin America Series:

Migrating Identities and Perspectives: Latin America and the Caribbean in Local and Global Contexts

Mohammad H. Tamdgidi, Terry-Ann Jones, Eric Mielants, 2009-09-01 This Fall 2009 VII 4 issue of Human Architecture Journal of the Sociology of Self Knowledge entitled Migrating Identities and Perspectives Latin America and the Caribbean in Local and Global Contexts focuses on the complexity of identity formations experienced by migrants in the world system with a regional focus on Latin America and the Caribbean which have been at the heart of many recent scholarly debates in migration studies and the subsequent emergence of transnationalism The collection can be therefore understood as an attempt to establish an intellectual dialogue between different academic disciplines as well as theoretical perspectives Among the various themes of this issue is the importance of context as illustrated through the use of comparisons and the application to the domestic migration context of theoretical approaches commonly used to explain international migration Another theme that emerges among these papers is that of integration or in the case of deportees a very specific group of immigrants reintegration A crucial aspect of incorporation is identity formation often central to migration research and highlighted in a variety of ways in the papers Contributors include Terry Ann Jones also as journal issue guest editor Eric Mielants also as journal issue guest editor Per Unheim David Carment Carlo Dade Dwaine Plaza C dric Audebert Heike Drotbohm and Mohammad H Tamdgidi also as journal editor in chief Human Architecture Journal of the Sociology of Self Knowledge is a publication of OKCIR The Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics For more information about OKCIR and other issues in its journal s Edited Collection as well as Monograph and Translation series visit OKCIR s homepage [Third World in Soviet Perspective](#) Thomas Perry Thorton, 2015-12-08 The Third World in Soviet Perspective consists of translations of a representative selection of essays on numerous aspects of the developing areas by prominent and promising Soviet scholars They deal with Asia Africa and Latin America and range over such subjects as economic development class relationships political forces and agrarian reform with some discussion of more general problems of Soviet research Originally published in 1964 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 [Cooperation Or Rivalry?](#) Shoji Nishijima, 2021-11-28 This book examines two opposing interpretations of NAFTA s potential expansion into a Western Hemisphere Free Trade Association WHFTA one fearing the creation of a deliberately exclusionary Fortress America the other welcoming the prospect of substantial economic opportunities for Asia and the countries of the Pacific Rim Contributors evaluate the commercial financial cultural and political linkages between the Americas and the Pacific Rim

assessing the magnitude of interests that might be affected by NAFTA or FTAA Authorities and experts in Japan and other Asian countries have expressed considerable fear that the North American Free Trade Agreement NAFTA and the proposed Free Trade Area of the Americas FTAA will create a Fortress America that will deliberately exclude nations of the Pacific Rim Others argue that economic integration will provide substantial opportunity for Asia Pacific countries and thus contribute to the dynamism of the Pacific Century ahead This book explores the varying interpretations and looks at their implications for countries of the Pacific Rim Might NAFTA provoke the formation of an economic bloc in the Asia Pacific area Or will economic liberalization occur on a global and multilateral scale What are the political dimensions of these possible options and processes Examining the interconnections such policy alternatives may have for both the Pacific Rim and Latin America the contributors evaluate the commercial financial cultural and political linkages between the regions to assess the magnitude of interests that might be affected by NAFTA or FTAA Assessing the range of policy options available to countries involved they seek to make an original contribution to the debate about the formation and structure of the post Cold War world order

Imperialism and the Wider Atlantic Tania Gentic, Francisco LaRubia-Prado, 2017-10-28 The essays in this volume broaden previous approaches to Atlantic literature and culture by comparatively studying the politics and textualities of Southern Europe North America and Latin America across languages cultures and periods Historically grounded while offering new theoretical approaches the volume encourages debate on whether the critical lens of imperialism often invoked to explain transatlantic studies may be challenged by the diagonal translinguistic relationships that comprise what the editors term the wider Atlantic The essays explore how instances of inverse coloniality global networks of circulation and linguistic conceptualizations of nation and identity question dominant structures of power from the nineteenth century to today

Resources in Education ,1994

The Americas in the Modern Age Lester D. Langley, 2003-01-01 In this wide ranging book historian Lester D Langley offers a fresh interpretation of the history of the modern Western hemisphere since the mid nineteenth century He evaluates the dynamics of hemispheric history commencing with the articulation of the two Americas Theodore Roosevelt s America and the contrasting America described by Cuban revolutionary essayist and poet Jos Mart and culminating with recent controversial efforts to forge a united hemisphere Tracing the interactions and influences among the nations of South Central and North America including Canada Langley departs from other accounts of the past 150 years He argues that the seedtime for today s Americas was not the Cold War but the late nineteenth and early twentieth centuries He also contends that it is not what the countries and people of the Americas have in common that binds them instead their cultural political and economic conflicts tie them together Comprehensive and balanced this history of the nations of the Americas offers new insights into both the past and the future of inter American relations

East Asian Regionalism from a Legal Perspective Tamio Nakamura, 2009-06-08 Plenty has been written about the political and economical aspects of regionalism but the legal perspective has been neglected East Asian Regionalism From a Legal

Perspective is unique in synthesizing legal economic and political analyses In the first part the book investigates the current features of regionalism from a comparative perspective looking at economic and currency cooperation and comparing Asian regionalism with Europe and Latin America In the second part the contributors go on to look at the present legal features of regionalism covering institutional frameworks trade diversity and regional integration The third part of the book is truly unique in proposing an essential groundwork for the institutionalisation of an East Asian Community It conceives a draft East Asian Charter an essential document that distils what East Asian nations have achieved and also includes integral principles and fundamental rules for future cooperation among countries and peoples in the region This book will be of interest to graduates and academics interested in regionalism international relations international law and Asian studies

Personal Wealth from a Global Perspective James B. Davies, 2008-11-13 This book provides the first study of personal wealth from a global viewpoint Previous international studies of wealth have focused on the rich countries Here the transition countries emerging economies and the developing world are examined too The book looks at wealth inequality and asset composition around the world showing how these are affected by history institutions gender and incomes There is a dramatic contrast between rich countries where financial assets are so important and poor countries where farm assets and land still dominate The book shows that wealth inequality within countries is far higher than that of income and has been rising recently most notably in Russia China and other transition countries Concentration among the rich and super rich has also increased Worldwide the top 2% have about 50% of personal wealth and the top 10% have 85% In contrast the bottom half has just 1% Poor countries are even poorer in wealth than in income terms But these are just the countries where life is most insecure and personal assets are most needed The book concludes that steps must be taken to break down barriers and help the poor and middle class in low income countries build up their personal assets to overcome their wealth disadvantage

History & Histography Glen Cunningham, 2018-08-03 Cities, Slums and Gender in the Global South Sylvia Chant, Cathy McIlwaine, 2015-12-22

Developing regions are set to account for the vast majority of future urban growth and women and girls will become the

majority inhabitants of these locations in the Global South This is one of the first books to detail the challenges facing poorer segments of the female population who commonly reside in slums It explores the variegated disadvantages of urban poverty and slum dwelling from a gender perspective This book revolves around conceptualisation of the gender urban slum interface which explains key elements to understanding women s experiences in slum environments It has a specific focus on the ways in which gender inequalities are can be entrenched but also alleviated Included is a review of the demographic factors which are increasingly making cities everywhere feminised spaces such as increased rural urban migration among women demographic ageing and rising proportions of female headed households in urban areas Discussions focus in particular on education paid and unpaid work access to land property and urban services violence intra urban mobility and political participation and representation This book will be of use to researchers and professionals concerned with gender and development urbanisation and rural urban migration The Iraq Crisis and World Order Ramesh Thakur And Waheguru Pal Singh Sidhu,2007-09 Boundary Control Edward L. Gibson,2013-01-07 The democratization of a national government is only a first step in diffusing democracy throughout a country s territory Even after a national government is democratized subnational authoritarian enclaves often continue to deny rights to citizens of local jurisdictions Gibson offers new theoretical perspectives for the study of democratization in his exploration of this phenomenon His theory of boundary control captures the conflict pattern between incumbents and oppositions when a national democratic government exists alongside authoritarian provinces or states He also reveals how federalism and the territorial organization of countries shape how subnational authoritarian regimes are built and how they unravel Through a novel comparison of the late nineteenth century American Solid South with contemporary experiences in Argentina and Mexico Gibson reveals that the mechanisms of boundary control are reproduced across countries and historical periods As long as subnational authoritarian governments coexist with national democratic governments boundary control will be at play **Hong Kong's Tortuous Democratization** Ming Sing,2004-08-02 This book raises interesting questions about the process of democratization in Hong Kong It asks why democracy has been so long delayed when Hong Kong s level of socio economic development has become so high It relates democratization in Hong Kong to wider studies of the democratization process elsewhere and it supplements the received wisdom that democracy was delayed because of colonial rule and by the opposition of China with new thinking for example that its quasi bureaucratic authoritarian political structure vested power in bureaucrats who refused to have top down democratization a politically weak civil society and a non participant political culture that crippled bottom up democratization plus the division between pro democratic civil society and political society *Violence and Resilience in Latin American Cities* Kees Koonings,Dirk Kruijt,2015-11-15 Why are Latin American cities amongst the most violent in the world Over the past decades Latin America has not only become the most urbanised of the regions of the so called global South it has also been the scene of the urbanisation of poverty and exclusion Overall regional homicides rates

are the highest in the world a fact closely related to the spread and use of firearms by male youths who are frequently involved in local and translocal forms of organised crime In response governments and law enforcements agencies have been facing mounting pressure to address violence through repressive strategies which in turn has led to a number of consequences law enforcement is often based on excessive violence and the victimisation of entire marginal populations Thus the dynamics of violence have generated a widespread perception of insecurity and fear Featuring much original fieldwork across a broad array of case studies this cutting edge volume focuses on questions not only of crime insecurity and violence but also of Latin American cities ability to respond to these problems in creative and productive ways **The Novel,**

Volume 1 Franco Moretti,2006 Publisher Description *Political Liberalization In Brazil* Wayne A Selcher,2019-07-09 The civilian government inaugurated in Brazil in March 1985 following twenty one years of military rule is the culmination of a slow process of liberalization that has brought greater freedom of political expression organization and activity How the Sarney government responds to the challenges it faces and the institutional choices it must make will shape Brazil s political evolution for years to come Should Brazil develop a democratic system it would be the third most populous democracy in the world Political trends in Brazil are therefore of considerable significance to Latin America and the United States In this comprehensive analysis of the forces pushing democratization forward those opposing it and the contradictions created by the ad hoc nature of the dynamics between the two the contributors examine the legacy of two decades of authoritarian rule the choices facing the civilian government and possible future developments The Oxford Handbook of Law and Anthropology Marie-Claire Foblets,Mark Goodale,Maria Sapignoli,Olaf Zenker,2022-04-01 The Oxford Handbook of Law and Anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social organization and legal political and social identity The need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to acknowledge the points of tension open questions and areas for future development

Dams, Displacement and Development Nathan Einbinder,2017-02-08 Using the case of the Chixoy Hydroelectric Dam in Guatemala constructed between 1978 and 1983 this book examines the effects of displacement on the former residents of

R o Negro a community forcibly evicted and nearly eliminated by the military and paramilitary Using open ended interview discussions and testimonies it focuses on this specific incident of displacement and violence and discusses the outcomes 30 years later Guatemala s history is plagued by development projects that resulted in displacement violence and increased marginalization of its indigenous and non indigenous populations In order to make way for development initiatives such as the production of bananas African palm coffee and sugar cane the extraction of metals such as gold and nickel or in this specific case the construction of a hydroelectric dam the land based predominately Maya campesinos have been systematically uprooted from the lands of their birth and launched into uncertainty The research findings presented based on fieldwork conducted from January to April 2009 suggest that the majority of survivors from the massacres that took place are still adversely affected by the destruction of their families and livelihoods While the circumstances pertaining to this event are unique similar struggles over land and human rights continue into the present and if policies remain unchanged in both international development agencies as well as the Guatemalan government clashes of this nature only increase in time

The Global 1960s Tamara Chaplin,Jadwiga E. Pieper Mooney,2017-07-20 The Global 1960s presents compelling narratives from around the world in order to de center the roles played by the United States and Europe in both scholarship on and popular memories of the sixties Geographically and chronologically broad this volume scrutinizes the concept of the sixties as defined in both Western and non Western contexts It provides scope for a set of analyses that together span the late 1950s to the early 1970s Written by a diverse and international group of contributors chapters address topics ranging from the socialist scramble for Africa to the Naxalite movement in West Bengal the Troubles in Northern Ireland global media coverage of Israel Cold War politics in Hong Kong cinema sexual revolution in France and cultural imperialism in Latin America The Global 1960s explores the contest between convention and counter culture that shaped this iconic decade emphasizing that while the sixties are well known for liberation activism and protest against the establishment traditional hierarchies and social norms remained remarkably entrenched Multi faceted and transnational in approach this book is valuable reading for all students and scholars of twentieth century global history
