Perspectives on Negation and Polarity Items Jack Hoeksema, Hotze Rullmann, Víctor Sánchez-Valencia, Ton van der Wouden, 2001-05-17 Perspectives on Negation and Polarity Items contains a selection of papers on the semantics acquisition and licensing behavior of negation Negation being one of the prevalent features of any human language has many facets of interest to linguists psychologists and philosophers alike In recent years much attention has been paid to the complicated distributional patterns of polarity items Many of the contributions in this volume are devoted to the study of one or more of these items in languages such as English Laurence Horn Anita Mittwoch Chris Kennedy Dutch Jack Hoeksema and Hotze Rullmann Henny Klein Gertjan Postma German Gabriel Falkenberg Hindi Utpal Lahiri and Greek Anastasia Giannakidou In addition some general issues surrounding negation are addressed such as the characterization of the notion strength of negation Jay Atlas the problem of NEG raising Lucia Tovenara the interaction of negation and modality Johan van der Auwera and the acquisition of negation Kenneth Drozd

Negation and Contact Debra Ziegeler, Zhiming Bao, 2017-05-31 The study of negation across languages has left no stone unturned with respect to a range of frequently researched areas such as negative raising negative concord and the behavior of quantifiers under negative scope Past research has chiefly focused on the category of negation from a cross linguistic perspective with probably less attention devoted to the study of negation across dialects of languages or across contact languages The observation of universal quantification in the scope of negation in the English spoken in Singapore for example is an area which has been largely under researched in the literature as has the rarely reported phenomenon of negative raising in Singapore English The present volume profiles some of the problems of negation in English and Singapore English framed against the background of studies of negation in other contact dialects of English and pidgins creoles and offering a diverse range of theoretical approaches to the problems

Negation in Uralic Languages Matti Miestamo, Anne Tamm, Beáta Wagner-Nagy, 2015-06-24 The grammaticalized expression of negation is a linguistic universal This volume deals with negation in the Uralic language family in a typological perspective As in no other major language family before a comprehensive typological questionnaire provides the basis for the chapters documenting negation in 17 languages Most of them are endangered The chapters highlight negative auxiliary verbs the special Uralic feature and their ways of combining with the rich inventory of other negators in different types of clauses as well as negative replies negative indefinites abessives caritives privatives scope polarity and emphatic negation Selected aspects of negation such as negative indefinites negation of non verbal predicates and information structure are discussed in more detail in five further chapters The book brings new typologically informed perspectives on negation in the Uralic family and it provides valuable data and insights for any linguist working on negation

Cyclical Change Elly van Gelderen, 2009-07-29 Linguistic Cycles are ever present in language change and involve a phrase or word that gradually disappears and is replaced by a new linguistic item The most well known cycles involve negatives where an initial single

negative such as not is reinforced by another negative such as no thing and subjects where full pronouns are reanalyzed as endings on the verb This book presents new data and insights on the well known cyclical changes as well as on less well known ones such as the preposition auxiliary copula modal and complementation cycles Part I covers the negative cycle with chapters looking in great detail at the steps that are typical in this cycle Part II focuses on pronouns auxiliaries and the left periphery Part III includes work on modals prepositions and complementation The book ends with a psycholinguistic chapter This book brings together linguists from a variety of theoretical frameworks and contributes to new directions in work on language change

Clitic and Affix Combinations Lorie Heggie, Fernando Ordóñez, 2005-01-01 In this volume the relationship between clitics and affixes and their combinatorial properties has led to a serious discussion of the interface between syntax morphology semantics and phonology that draws on a variety of theoretical perspectives e g HPSG Optimality Theory Minimalism Clitic affix phenomena provide a rich range of data not only for the identification of an affix vs clitic but also for the best way to explain ordering constraints some of which are contradictory A range of languages are considered including Romance and Slavic languages as well as Turkish Greek Icelandic Korean and Passamaquoddy Moreover several articles consider dialectal microparameterization notably in Spanish French and Occitan This volume thus reflects current debate on issues such as clitic ordering constraints the relationship of clitics to inalienable possession and the left periphery and templatic approaches to affixes vs clitics while examining a broad range of languages

The Oxford Handbook of Negation Viviane Déprez, M. Teresa Espinal, 2020-03-25 In this volume international experts in negation provide a comprehensive overview of cross linguistic and philosophical research in the field as well as accounts of more recent results from experimental linguistics psycholinguistics and neuroscience The volume adopts an interdisciplinary approach to a range of fundamental questions ranging from why negation displays so many distinct linguistic forms to how prosody and gesture participate in the interpretation of negative utterances Following an introduction from the editors the chapters are arranged in eight parts that explore respectively the fundamentals of negation issues in syntax the syntax semantics interface semantics and pragmatics negative dependencies synchronic and diachronic variation the emergence and acquisition of negation and experimental investigations of negation The volume will be an essential reference for students and researchers across a wide range of disciplines and will facilitate further interdisciplinary work in the field

The Fate of Mood and Modality in Language Death Petar Kehayov, 2017-07-24 Research into the grammar of language death is often biased toward formal processes e g paradigmatic levelling In this study the author changes the perspective and shows that the relative susceptibility of linguistic elements to loss change and innovation in language death circumstances can be dependent on meaning and thus organized along semantic notions rather than along structure

Linguistic Bibliography for the Year 2000 / Bibliographie Linguistique de l'Année 2000 Sijmen Tol, Hella Olbertz, Mark Janse, 2004-12-10 Bibliographie Linguistique Linguistic Bibliography is the annual bibliography of linguistics published by the

Permanent International Committee of Linguists under the auspices of the International Council of Philosophy and Humanistic Studies of UNESCO With a tradition of more than fifty years the first two volumes covering the years 1939 1947 were published in 1949 1950 *Bibliographie Linguistique* is by far the most comprehensive bibliography in the field It covers all branches of linguistics both theoretical and descriptive from all geographical areas including less known and extinct languages with particular attention to the many endangered languages of the world Up to date information is guaranteed by the collaboration of some forty contributing specialists from all over the world With over 20 000 titles arranged according to a detailed state of the art classification *Bibliographie Linguistique* remains the standard reference book for every scholar of language and linguistics *Particles* Ton van der Wouden, Ad Foolen, Pete Van de Craen, 2003 As of Volume 9 1994 95 John Benjamins Publishing Company is the official publisher of the Belgian Journal of Linguistics the annual publication of the Linguistic Society of Belgium Each volume is topical and includes selected papers from the international meetings organised by the LSB

Different Slants on Grammaticalization Sylvie Hancil, Vittorio Tantucci, 2023-07-15 This volume on grammaticalization focuses on new theoretical and methodological challenges underpinning language change It provides new approaches and insights deepening our understanding of the cognitive pragmatic and socio cultural mechanisms that trigger the formation and the change of grammars In this volume grammaticalization is dealt with diachronically synchronically and as a by product of dialogic interaction Another key feature of this book is language diversity as it includes studies on language families ranging from Niger Congo Koreanic Japonic Sino Tibetan to Germanic and Romance The novel aspects of grammaticalization addressed are new slants on the fundamental debate about grammaticalization as expansion vs reduction the grammatical formation of ideophones the semantic domain of fear as a source and a trigger of grammatical change and many other aspects of semantic and morphosyntactic development *Brinkman's cumulatieve catalogus van boeken*, 2002 Voorts een alphabetische lijst van Nederlandsche boeken in Belgi uitgegeven *Brinkman's Cumulatieve catalogus van boeken de in Nederland en vlaanderen zijn uitgegeven of herdrukke*, 2001 Negation and Polarity Laurence R. Horn, Yasuhiko Kato, 2000-08-03 Negation is a central feature of language and cognition interacting with all areas of grammar as well as with the philosophy of language Whereas there is a cross linguistic uniformity in logical and semantic aspects of negation there is a diversity of syntactic and morphological forms and rules This asymmetry in function and form poses problems for syntactic and universal grammar theory and for the study of the interface between syntax and discourse It is particularly evident in negative polarity words and phrases which can appear only in negative sentences The exploration of negation and negative polarity phenomena and their implications for linguistic theory are the main themes of this book

Polarity Sensitivity as (Non)Veridical Dependency Anastasia Giannakidou, 1998-10-15 Polarity phenomena have been known to linguists since Klima's seminal work on English negation In this monograph Giannakidou presents a novel theory of polarity which avoids the empirical and conceptual problems of previous approaches by introducing a notion wider than

negation and downward entailment non veridicality The leading idea is that the various polarity phenomena observed in language are manifestations of the dependency of certain expressions i e polarity items to the non veridicality of the context of appearance Dependencies to negation or downward entailment emerge as subcases of nonveridicality The non veridical dependency may be positive licensing or negative anti licensing and arises from the sensitivity semantics of polarity items The book is also concerned with the syntactic mapping of the sensitivity dependency It is argued that licensing does not necessarily correspond to a requirement that the licensee be in the scope of the licenser In some cases for instance for the interpretation of negative concord the reverse is required that the licensee takes the licenser in its scope The theory is applied to an extended set of old and new data concerning affective free choice dependencies and mood choice in relative clauses The primary focus is on Greek but data from Dutch English and to a lesser extend Romance and Slavic are also considered

Negation and Polarity: Experimental Perspectives Pierre Larrivé, Chungmin Lee, 2015-07-28 This volume offers insights on experimental and empirical research in theoretical linguistic issues of negation and polarity focusing on how negation is marked and how negative polarity is emphatic and how it interacts with double negation Metalinguistic negation and neg raising are also explored in the volume Leading specialists in the field present novel ideas by employing various experimental methods in felicity judgments eye tracking self paced readings prosody and ERP Particular attention is given to extensive crosslinguistic data from French Catalan and Korean along with analyses using semantic and pragmatic methods corpus linguistics diachronic perspectives and longitudinal acquisitional studies as well as signed and gestural negation Each contribution is situated with regards to major previous studies thereby offering readers insights on the current state of the art in research on negation and negative polarity highlighting how theory and data together contributes to the understanding of cognition and mind

Perspectives on Negation Frances Blanchette, Cynthia Lukyanenko, 2025-03-31 Although negation has been studied extensively by philosophers linguists and psychologists it remains an active area of inquiry across the language sciences This dynamic and cross disciplinary volume contains a unique collection of chapters by language scientists from a variety of disciplines Readers will explore novel connections and gain insights into the nature of negation one of the few uncontroversial universal elements of natural language

The Grammatical Realization of Polarity Contrast Christine Dimroth, Stefan Sudhoff, 2018-11-15 The polarity of a sentence is crucial for its meaning It is thus hardly surprising that languages have developed devices to highlight this meaning component and to contrast statements with negative and positive polarity in discourse Research on this issue has started from languages like German and Dutch where prosody and assertive particles are systematically associated with polarity contrast Recently the grammatical realization of polarity contrast has been at the center of investigations in a range of other languages as well Core questions concern the formal repertoire and the exact meaning contribution of the relevant devices the kind of contrast they evoke and their relation to information structure and sentence mood This volume brings together researchers from a theoretical an empirical

and a typological orientation and enhances our understanding of polarity with the help of in depth analyses and cross linguistic comparisons dealing with the syntactic semantic pragmatic and or prosodic aspects of the phenomenon

Negative and Positive Polarity Ljiljana Progovac,1994-02-17 In this book Ljiljana Progovac presents cross linguistic data on negative polarity reflexive binding and the subjunctive mood and proposes a unified analysis for various languages including English and Serbian Croatian She argues that Negative Polarity Items NPIs such as anyone and ever are anaphoric in nature and must be bound in their governing category while Positive Polarity Items PPIs such as someone and already are subject to Principle B of the Binding Theory She also suggests that possible binders and SUBJECTS for polarity items are negation or else a polarity operator in the complementiser of questions conditionals and other clauses with an unfixed truth value Her analysis not only captures many similarities between polarity and anaphora but also accounts for a number of hitherto unexplained facts about polarity items *Expression and Interpretation of Negation* Henriëtte de Swart,2010-05-03 This study in cross linguistic semantics deploys the framework of bi directional Optimality Theory to develop a typology of the relationship between syntax and semantics in negation markers and negation indefinites **Negative and Positive Polarity** Ljiljana Progovac,2010-01-26 In this book Ljiljana Progovac presents cross linguistic data on negative polarity reflexive binding and the subjunctive mood and proposes a unified analysis for various languages including English and Serbian Croatian She argues that Negative Polarity Items NPIs such as anyone and ever are anaphoric in nature and must be bound in their governing category while Positive Polarity Items PPIs such as someone and already are subject to Principle B of the Binding Theory She also suggests that possible binders and SUBJECTS for polarity items are negation or else a polarity operator in the complementiser of questions conditionals and other clauses with an unfixed truth value Her analysis not only captures many similarities between polarity and anaphora but also accounts for a number of hitherto unexplained facts about polarity items
